Preface

Introduction LAC2010: First International Landscape Archaeology Conference

How did Landscape Change?

Cultural Landscapes of Seusamora in Eastern Georgia

Irrigation and Landscape: An interdisciplinary approach

Principles of preservation and recalling of memory traces in an industrial landscape: A case study of decayed monument recreation in the brown-coal mining area of Bilina, Czech Republic

Cultural forces in the creation of landscapes of south-eastern Rhodope: Evolution of the Byzantine monastic landscape

The change analysis of the green spaces of the Historical Peninsula in Istanbul, Turkey

The evolution of an agrarian landscape. Methodological proposals for the archaeological study of the alluvial plain of Medellín (Guadiana basin, Spain)

Talking ruins: The legacy of baroque garden design in Manor Parks of Estonia

Configuring the landscape: Roman mining in the conventus Asturum (NW Hispania)

English town commons and changing landscapes

From feature fetish to a landscape perspective: A change of perception in the research of pingo scars in the late Pleistocene landscape in the Northern Netherlands

Improving Temporal, Chronological and Transformational Frameworks

Pre-industrial Charcoal Production in southern Brandenburg and its impact on the environment

Landscape transformations in North Coastal Etruria

Can the period of Dolmens construction be seen in the pollen record? Pollen analytical investigations of Holocene settlement and vegetation history in the Westensee area, Schleswig-Holstein, Germany

Geo- and Landscape archaeological investigations in south-western Lazio (Italy): An approach for the identification of man-made landscape transformation processes in the hinterland of Rome

The medieval territory of Brussels: A dynamic landscape of urbanisation

Linking Landscapes of Lowlands to Mountainous Areas

A qualitative model for the effect of upstream land use on downstream water availability in a western Andean valley, southern Peru

Connecting lowlands and uplands: An ethno-archaeological approach to transhumant pastoralism in Sardinia (Italy)

The prehistoric peopling process in the Holocene landscape of the Grosseto area: How to manage uncertainty and the quest for ancient shorelines

Applying Concepts of Scale

Landscape scale and human mobility: Geoarchaeological evidence from Rutherford Creek, New South Wales, Australia

Surface contra subsurface assemblages: Two archaeological case studies from Thesprotia, Greece

New Directions in Digital Prospection and Modelling Techniques

Biting off more than we can chew? The current and future role of digital techniques in landscape archaeology
Using Google Earth and GIS to survey in the Peruvian Andes  p. 321
The occupation of the Antequera Depression (Malaga, Spain) through the 1st millennium BC: A geographical and archaeological perspective into Romanisation  p. 339
Mapping the probability of settlement location for the Malia-Lasithi region (Crete, Greece) during the Minoan Protopalatial period  p. 353
Using LiDAR-derived Local Relief Models (LRM) as a new tool for archaeological prospection  p. 369
The use of digital devices in the research of Hungarian monastic gardens of the 18th century  p. 379
Thinking topographically about the landscape around Besançon (Doubs, France)  p. 395
Modelling the agricultural potential of Early Iron Age settlement hinterland areas in southern Germany  p. 413
Radiography of a townscape. Understanding, visualising and managing a Roman townsite  p. 429
New methods to analyse LiDAR-based elevation models for historical landscape studies with five time slices  p. 443
How will Landscape Archaeology Develop in the Future?  p. 461
The future of landscape archaeology  p. 461
Look the other way - from a branch of archaeology to a root of landscape studies  p. 471
The past informs the future: landscape archaeology and historic landscape characterisation in the UK  p. 485
'landscape', 'environment' and a vision of interdisciplinarity  p. 503
Landscape studies: The future of the field  p. 515
