Agenda p. 33
List of Participants p. 34
List of Documents p. 36
Papers
The Mortality, Epidemiological and Health Transitions: Their Relevance for the Study of Health and Mortality p. 39
Epidemiological Transitions in Developed Countries: Past, Present and Future p. 54
The Measurement of Adult Mortality: an Assessment of Data Availability, Data Quality and Estimation Methods p. 72
Causes of Death in Developing Countries and in Countries with Economies in Transition: An Overview of Current Knowledge, Data Availability and Novel Methods of Data Collection p. 84
Mortality in Sub-Saharan Africa p. 110
Mortality in Latin America p. 132
The Epidemiological Transition in Mexico: What the Data on Cause of Death Reveal p. 158
The use of Surveys to Gather Information on Health Status (Developing Countries) p. 181
Health and Mortality Trends in Countries with Economies in Transition p. 203
The Dynamics of Mortality in Poland p. 227
The Dynamics of Mortality in the Russian Federation p. 262
The Widening Differentials in Adult Mortality by Socio-Economic Status and Their Causes p. 291
The Measurement of Health Status in the United States p. 313
The Limits of Longevity and Their Implications for Health and Mortality in Developed Countries p. 324
The Genetic Make-Up of Population and Its Implications for Mortality by Cause of Death: Links Between Alzheimer's and Ischaemic Heart Disease p. 344
Nutrition, All-Cause and Cardiovascular Mortality: Its Possible Modulation by Other Factors, Especially Physical Exercise p. 357
Alcohol and Smoking as Risk Factors p. 374
Accidents and Other Injuries p. 412
HIV-infection and AIDS-Related Deaths in Africa p. 442
Tables
Reported completeness of death registration, developing countries p. 74
Distribution of developing countries by region and basis of United Nations adult mortality estimates, 1996 revision p. 76
Completeness of death registration, major regions, mid-1990s p. 85
Numbers of deaths by sex and selected age groups, Colombia, 1986 p. 90
Number and mortality rates of suicides per 100,000 population by sex, selected ages, China, selected rural and urban areas, 1990 p. 90
Mortality data collected in sub-Saharan African population censuses, 1985-1994 and DHS surveys p. 112

Under-five mortality rate (\(5q_0\)), Demographic and Health Surveys, birth histories, countries of sub-Saharan Africa, various dates p. 116

Survivorship from age 15 to age 60 (\(45p_{15}\)) by sex, countries in sub-Saharan Africa, 1980s and 1990s p. 120

Recent trends in the probability of dying between age 15 and 60 (\(45q_{15}\)) by sex, Demographic and Health Surveys, siblings histories, countries in sub-Saharan Africa, various dates p. 123

Probabilities of dying in adulthood per 1,000 estimated from orphanhood, Demographic and Health Surveys, household data, countries in sub-Saharan Africa, various dates p. 125

Indicators showing quality of sources of demographic information, countries of Latin America, selected dates p. 133

Life expectancy at birth, at 5 years and at 65 years, and infant mortality rate (per 1,000), by sex, selected countries and periods p. 137

Mortality rates by sex, age and cause (per 100,000), selected countries and periods p. 146

Relative distribution of deaths by sex and cause, selected countries and periods p. 150

Relative distribution of deaths by broad age groups, selected countries and periods p. 151

Mortality differentials for the female adult population, Guatemala and Argentina, selected dates p. 154

Sample size: number of households, women and children successfully interviewed, GFHS-1995-1997 p. 186

Population composition: per cent distribution of the de jure population by broad age groups, GFHS-1995-1997 p. 187

Educational attainment according to sex, GFHS-1995-1997 p. 187

Longstanding illness: among persons aged 15 years and over, the percentage reported to have doctor-diagnosed longstanding illness, by age and sex, GFHS-1995-1997 p. 188

Cardiovascular disease: among persons 15 years of age and over, the percentage reported to have ever had a doctor diagnosed cardiovascular disorder, by age and sex, GFHS-1995-1997 p. 189

Acute sickness: among persons 15 years of age and over, the percentage reported to have had an acute sickness during the two weeks preceding the interview, GFHS-1995-1997 p. 190

Use of health services: among persons 15 years of age and over who have had an acute sickness during the two weeks preceding the survey, the percentage reported to have consulted various health care providers, GFHS-1995-1997 p. 190

Medication: among persons 15 years of age and over who have had an acute sickness during the two weeks preceding the interview, the percentage reported to have taken medicines, GFHS-1995-1997 p. 190
Dental care: percentage of persons 15 years of age and over who had gone to the dentist at least once in the past 12 months, GFHS-1995-1997

Smoking: among persons 15 years of age and over, the percentage who ever smoked cigarettes, and the percentage currently smoking, by age and sex, GFHS-1995-1997

Age at first marriage: median age at first marriage for successive five-year age cohorts of women under 50 years of age, GFHS-1995-1997

Current fertility: age-specific fertility rates (per 1,000 women), total fertility rate, general fertility rate and crude birth rate, for the three years preceding the survey, GFHS-1995-1997

Fertility by residence and education: total fertility rate (TFR) for the three years preceding the survey and the mean number of children ever born (CEB) to all women at ages 40-49, by type of place of residence and education, GFHS-1995-1997

Knowledge, ever use and current use of family planning: among women under 50 years of age, the percentage of ever-married women who know a family planning method, and the percentage of currently married women who currently use a method, GFHS-1995-1997

Maternity care indicators: for all births in the three years preceding the survey, the percentage of respondents who reported having received antenatal, delivery and postnatal care, GFHS-1995-1997

Symptoms of complications during pregnancy: for live births in the last three years, the percentage of respondents who reported presence of specified symptoms during pregnancy, GFHS-1995-1997

Delivery complications: for live births in the three years preceding the survey, the percentage of respondents who reported delivery complications, the percentage of deliveries by caesarean section, and the percentage who reported preterm labor, GFHS-1995-1997

Postpartum haemorrhage and convulsions: for live births in the three years preceding the survey, the per cent distribution by reported pattern of postpartum haemorrhage, and the percentage of respondents who reported having had obstetrical convulsions, GFHS-1995-1997

Postpartum symptoms of infection: for live births in the last three years, the percentage of respondents who reported having had very high fever in the postpartum period, according to specified symptoms of complications, GFHS-1995-1997

Mean birth weight and differentials by maternal education and marital status; births registered in the Czech Republic and Sweden, 1989-1991

Life expectancy at birth in England and Wales in this century

Life expectancy at birth, infant mortality, and probability of survival between ages 35 and 65, Hungary, 1900-1994

Changes in social indicators in CCEE and FSU between 1989 and 1994

Percentage of deaths before a given age, United Kingdom, 1880 and 1980

Estimated risks of various activities

The most important factors influencing human health in the opinion of adult Poles in 1995

Dynamics of expectation of life at birth in Russia and in 22 developed countries, 1900-1995

Age-sex specific death rates per 1,000, Russia, 1946-1996
The component analysis of life expectancy, selected age groups, Russia, 1946-1996

Mortality by cause of death and sex, Russia, 1959-1996

Component analysis of life expectancy by cause of death and sex, Russia, 1959-1996

Mortality by level of education and sex, Russia, 1988-1994

Life expectancy in the geographical regions of Russia, 1996

Age-standardized mortality (per 100,000) and relative age-standardized mortality (upper white-collar employees-1.00) by social class for the economically active population in 1980 and for the whole population, and the distributions of person-years by social class, men and women aged 35-64 in Finland, 1981-1985

Absolute differences and rate ratios (per 100,000) in age-standardized mortality by primary and tertiary education for men in selected age-groups, Finland, 1972-1974 and 1993-1995

Model estimates for different risk factor sets and for cause specific and total mortality

Estimated relative risks of dying and life expectancy at age 80, U.S. whites by sex and APOE genotype

All-cause mortality rates per 100,000, ranked according to male mortality in the age class 55-64, 42 selected countries, 1992-1994

Total cardiovascular mortality rates per 100,000, ranked according to male mortality in the age class 55-64, 42 selected countries, 1992-1994

Mortality rates per 100,000 per year, 42 selected countries, 1992-1994

Dietary recommendations to the population

Mortality ratios of current cigarette-only smokers, by cause of death in eight prospective epidemiologic studies

Mortality by cause in first and second 20 years among non-smokers and cigarette smokers, British doctors cohort study

Summary of estimated relative risks for current cigarette smokers, major disease categories causally related to cigarettes, males and females aged 35 years and older, CPS-I (1959-1965) and CPS-II (1982-1986), United States cohort study

Estimated smoking prevalence among men and women 15 and over, by country, latest available year

Daily smoking prevalence, men and women aged 15 and over, selected regions, early 1990s

Estimated per capita consumption of cigarettes per adult 15 years of age and over, selected countries, 1970-1972 to 1990-1992, ranked according to consumption in 1990-1992

Global and regional estimates and trends in consumption of cigarettes per adult 15 years and over, 1970-1972 to 1990-1992

Alcohol consumption per head in selected countries, 1970-1995

Estimated deaths caused by smoking in developed countries, 1950 to 2000

Estimated percentage of deaths caused by smoking, by sex, age and major cause of death, all developed countries, 1995

Estimated number of deaths from tobacco by region, 1995

Estimated alcohol-attributable fractions for selected injuries, all ages, established market economies, early 1990s
Estimated deaths caused (or prevented) by alcohol use, by region, 1990  p. 404
The completeness of vital registration by region in 1990  p. 414
Thirty leading causes of death worldwide in 1990  p. 418
Percentage distribution of DALYs by cause and region, 1990  p. 419
Mean number of fatalities per 100,000 population and death rates per 1 billion vehicle
kilometres for 1970 and 1993 for selected EME and FSE countries  p. 421
Fatality rates in various LMICs  p. 426
HIV prevalence rate among adults (age 15-59 years), Africa, end of 1994  p. 449
Detailed listing of estimates of HIV-1 and HIV-2 seroprevalence by residence and risk
factors, Africa, early 1990s  p. 451
Two forms of WHO case definitions for AIDS surveillance in adults and adolescents  p. 456

Figures
Epidemiological transitions in the human history  p. 55
Age-related changes in the distribution of death by cause in France, both sexes
combined, 1990-1994  p. 59
Trends in the age distribution of deaths, Sweden, both sexes combined, 1861-1995  p. 61
Trends in the expectation of life in Sweden, for five-year periods from 1861-1865 to
1991-1995  p. 63
Trends in the sex ratio (male/female) of age-specific death rate, Sweden, selected
years  p. 64
Percent of deaths of unknown cause, selected countries  p. 87
Percent of registered deaths of unknown cause by age and sex, Brazil, 1987 and Colombia, 1986  p. 88
Percent of registered deaths of unknown cause by age and sex, Chile, 1962 and 1987  p. 88
Percent of registered deaths of unknown cause by age and sex, Mexico, 1960 and 1986  p. 89
Percent of registered deaths of unknown cause by age and sex, Mexico, 1951 and 1986  p. 89
Percent distribution of deaths by cause, regions of Brazil, 1989  p. 92
Percent distribution of total deaths, by cause of death  p. 95
Percent distribution of infant deaths, by cause of death  p. 98
Percent distribution of deaths at age 1-4, by cause of death  p. 99
Percent distribution of deaths at age 5-14, by cause of death  p. 100
Percent distribution of deaths, ages 15-24, by cause of death  p. 101
Percent distribution of deaths, ages 25-34, by cause of death  p. 102
Percent distribution of deaths, ages 35-44, by cause of death  p. 103
Percent distribution of deaths, ages 45-54, by cause of death  p. 104
Percent distribution of deaths, ages 55-64, by cause of death  p. 105
Percent distribution of deaths, ages 65-74, by cause of death  p. 106
Percent distribution of deaths, ages 75 and over, by cause of death  p. 107
Trends in under-five mortality, eastern and southern Africa and middle and western
Africa  p. 117

Paths from high to low mortality

Changes in infant mortality and life expectancy of men at age 15, 1950-1990: Austria, Czechoslovakia and Hungary

Changes in infant mortality and life expectancy of men at age 15, 1950-1990: Hungary, Czechoslovakia, Romania and Bulgaria

Changes in infant mortality and male life expectancy at age 15, 1950-1990: western Europe and Mediterranean countries

Mortality ratios: east/west and low/high social class in the United Kingdom

Cardiovascular mortality by education and marital status in Warsaw, 10-year follow-up of the MONICA sample

Changes in infant mortality and life expectancy of men at age 15, 1950-1990: Hungary, Czechoslovakia, Romania and Bulgaria

Changes in infant mortality and male life expectancy at age 15, 1950-1990: western Europe and Mediterranean countries

Mortality ratios: east/west and low/high social class in the United Kingdom
APC analysis of Russia’s mortality data. Cohort component of mortality dynamics, 1900-1969 p. 271

Dynamics of mortality from six groups of causes of death, 1965-1995 p. 282

Age-standardized mortality (per 100,000, European standard population) by level of education, men aged 35 and over in Finland, 1972-1995 p. 297

Age-standardized mortality (per 100,000, European standard population) by level of education, men aged 35 and over in Finland, 1972-1995 (log scale) p. 298

Age-standardized mortality (per 100,000, European standard population) by level of education, men aged 35-49 in Finland, 1972-1995 p. 299

Standardized mortality ratios by level of education, men aged 35-49 in Finland, 1972-1995 p. 300

Life expectancy at the age of 35 by occupation class, men and women, 1971-1995 p. 303

Age dependence of cause specific and total mortality functions, model estimates p. 335

Life expectancy, model estimates p. 338

Proportion of the population of research studies areas that has APOE genotype [set membership]4/3 or [set membership]4/4 p. 346

Heart disease mortality rates for males 65-69 and rates estimated from APOE gene frequencies, 16 populations p. 349

The frequency of APOE genotypes among centenarians relative to young adults compared to the same ratio for APOE [set membership]3/3, males and females, Finland and France p. 352

Male mortality rates, all causes, selected developed countries, 1950s to 1990s p. 361

Female mortality rates, all causes, selected developed countries, 1950s to 1990s p. 362

Male mortality rates, cardiovascular causes, selected developed countries, 1950s to 1990s p. 363

Female mortality rates, cardiovascular causes, selected developed countries, 1950s to 1990s p. 364

Male mortality rates, all causes, Finland and Hungary, 1965, 1975 and 1985 p. 369

Female mortality rates, all causes, Finland and Hungary, 1965, 1975 and 1985 p. 370

Mortality ratios for various exposure variables, USA Veterans study, 1954-1962 p. 376

Trend with age in relative risk of death for cigarette smokers compared with life-long smokers p. 380

Ratio of heart attack rates: smokers versus non-smokers of the same age p. 382

Alcohol consumption and incidence of cirrhosis of the liver in men p. 384

Alcohol consumption and incidence of female breast cancer p. 385

Alcohol consumption and incidence of coronary heart disease in men p. 386

Relative likelihood of a motor vehicle collision as a function of blood alcohol concentration (BAC) p. 388

Association between alcohol consumption at conscription, and mortality (violent and other deaths) during follow-up p. 389

Daily smoking prevalence, Spain, 1993 p. 392

Relative change in cigarette consumption: developed versus developing countries p. 397
