

Executive summary	p. 17
The impact of arts education: From advocacy to evidence	p. 21
Context of our study: Education for innovation, arts advocacy and arts education	p. 22
Assessing the impact of arts education on non-arts outcomes	p. 32
Methods of this report	p. 37
Preview of our conclusions	p. 41
Cognitive outcomes of multi-arts education	p. 57
REAP meta-analyses of multi-arts education and general academic achievement studies	p. 58
Other studies on multi-arts and general academic achievement identified by REAP	p. 70
Post-REAP quasi-experimental studies of multi-arts education and general academic achievement	p. 72
Conclusion	p. 74
Cognitive outcomes of music education	p. 85
Music education and general academic achievement	p. 86
Music education and intelligence quotient (IQ)	p. 88
Music education, reading, and the reading-relevant skill of phonological awareness	p. 92
Music education and non-native language learning	p. 101
Music education and maths	p. 102
Music education and visual-spatial skills	p. 109
Music education and attention	p. 114
Music education and memory	p. 116
Concluding thoughts about music education and cognitive functioning	p. 119
Cognitive outcomes of visual arts education	p. 135
Visual arts education and general academic achievement	p. 136
Visual arts education and reading	p. 140
Visual arts education and geometric/spatial reasoning	p. 143
Visual arts education and observational skills	p. 147
Summary and conclusion	p. 149
Cognitive outcomes of theatre education	p. 155
Theatre education and general academic achievement	p. 156
Theatre education and verbal skills	p. 157
Cognitive outcomes of dance education	p. 175
Dance education and general academic achievement	p. 176
Dance education and reading	p. 178
Dance education and visual-spatial skill	p. 179
Dance education, problem solving and critical thinking	p. 180
Creativity outcomes of arts education	p. 185
Multi-arts education and creativity	p. 188
Music education and creativity	p. 191
Visual arts education and creativity	p. 192

Theatre education and creativity	p. 193
Dance education and creativity	p. 194
Creativity outcomes: Conclusions	p. 196
Motivational outcomes of arts education	p. 201
Multi-arts education and academic motivation	p. 202
Motivational outcomes: Conclusions	p. 210
Social skills outcomes of arts education	p. 213
Multi-arts education and academic self-concept	p. 214
Music education and social skills outcomes	p. 215
Visual arts education and social skills outcomes	p. 219
Theatre education and social outcomes	p. 223
Dance education and social outcomes	p. 233
Social skills outcomes of arts education: Conclusions	p. 236
Brain outcomes of arts education	p. 243
Why arts education? Summary and conclusions	p. 249
Skills and education for innovation	p. 250
A new review on the impact of arts education	p. 251
An agenda for further research	p. 256
A policy agenda	p. 261
Concluding remarks	p. 264
Boxes	
Methodological issues in the study of transfer of learning from the arts	p. 43
REAP meta-analyses and effect sizes reported	p. 60
Multi-arts education is positively correlated with academic performance	p. 63
Arts integration: Inconsistent effects on content knowledge	p. 67
SPECTRA +: Arts integration group improves no more than control group	p. 69
CAPE schools: High arts and high academic performance - with multiple possible explanations	p. 70
Learning through the arts: Inconsistent transfer findings	p. 74
Music lessons increase children's IQ	p. 91
The effects of music education in kindergarten on reading, maths and music at the end of grade	p. 98
Music training improves auditory perception of speech as well as music	p. 100
Music education and geometric reasoning	p. 107
The effects of integrated math and music education on musical and mathematical skills	p. 108
A longitudinal study shows no effects on cognitive and spatial skills after three years of piano instruction	p. 112
Violin training enhances attentional response in the brain	p. 116
Superior verbal memory: A result of music training or IQ?	p. 118
Studio habits of mind stressed by visual arts teachers	p. 137
visual arts majors outperform psychology majors on a test of geometric reasoning	p. 144

High school visual arts majors outperform theatre and writing majors in test of geometric reasoning p. 146

Multi-arts education and creativity: Is it the arts or the innovative teachers? p. 190
