Preface
Progress in Structural Modeling of GPCRs
The GPCR Crystallography Boom: Providing an Invaluable Source of Structural Information and Expanding the Scope of Homology Modeling
Modeling of G Protein-Coupled Receptors Using Crystal Structures: From Monomers to Signaling Complexes
GPCRs in Motion: Insights from Simulations
Structure and Dynamics of G Protein-Coupled Receptors
How the Dynamic Properties and Functional Mechanisms of GPCRs are Modulated by their Coupling to the Membrane Environment
Coarse-Grained Molecular Dynamics Provides Insight into the Interactions of Lipids and Cholesterol with Rhodopsin
Beyond Standard Molecular Dynamics: Investigating the Molecular Mechanisms of G Protein-Coupled Receptors with Enhanced Molecular Dynamics Methods
GPCR-Focused Rational Design and Mathematical Modeling
From Three-Dimensional GPCR Structure to Rational Ligand Discovery
Mathematical Modeling Of G Protein-Coupled Receptor Function: What Can We Learn From Empirical And Mechanistic Models? Section IV. Bioinformatics Tools and Resources for GPCRs

GPCRs & Company: Databases and Servers for GPCRs and Interacting Partners
Bioinformatics Tools for Predicting GPCR Gene Functions
