Preface
Contents
Introduction p. 1
Overview of selected papers p. 1
Further and related work p. 9
Amsterdam Concurrency Group - Membership p. 13
Amsterdam Concurrency Group - Publications on semantics p. 14
General techniques p. 27
Processes and the denotational semantics of concurrency p. 28
Linear time and branching time semantics for recursion with merge p. 81
Metric semantics for concurrency p. 104
Solving reflexive domain equations in a category of complete metric spaces p. 131
A convergence theorem in process algebra p. 164
Order and metric in the stream semantics of elemental concurrency p. 196
Semantics of parallel object-oriented languages p. 217
Denotational semantics of a parallel object-oriented language p. 218
Semantic correctness for a parallel object-oriented language p. 272
Semantics of parallel logic languages p. 315
Comparative semantics for flow of control in logic programming without logic p. 316
From failure to success: comparing a denotational and a declarative semantics for Horn Clause Logic p. 373
Further topics p. 397
Correctness and full abstraction of metric semantics for concurrency p. 398
Deriving denotational models for bisimulation from Structured Operational Semantics p. 425
