Introduction
Otto Stern, the GDH Sum Rule and Various Spin Crises p. 1
Quark-Hadron Duality and Photoabsorption Sum Rules p. 17
SLAC Experiments with Real and Virtual Polarized Photons, Results and Future Opportunities p. 27
HERMES Results for the Generalized GDH Integral p. 37
Theory of the Nucleon Spin-Polarizabilities (I) p. 47
Helicity Amplitudes and Sum Rules for Real and Virtual Photons p. 57
The GDH for the Deuteron p. 67
Sum Rules and Positivity Constraints p. 79
Higher Twist Contributions to the Generalized GDH Sum Rule p. 89
The GDH Experiment at MAMI p. 99
Helicity Dependence of Single-Pion Photoproduction in the [Delta] Region p. 109
Double Pion Photoproduction Asymmetries in the GDH Experiment at MAMI/Mainz p. 119
Analysis and First Results of the Helicity Dependent Double-Point Production at MAMI p. 125

Status of the GDH Experiment at ELSA p. 133
Past, Present and Future Studies of the GDH Sum Rule for d and [superscript 3]He at TUNL145

Polarized Solid Target for Tagged Photon Scattering Experiments p. 157
Polarized Scintillating Targets at PSI p. 169
The Polarized HD Ice Target at LEGS p. 175
The Jefferson Lab Polarized [superscript 3]He Target p. 181
Dispersion Analysis of the Spin Polarizabilities p. 187
Compton Scattering and the Spin-Dependent Observables of the Nucleon p. 193
Spin Polarizabilities of the Nucleon at NLO in the Chiral Expansion p. 199
Theory of the Nucleon Spin Polarizabilities (II) p. 205
The Importance of S-Wave Pion Production for the GDH Sum Rule and the Spin Polarizabilities p. 209
Double Polarization Virtual Compton Scattering in the Threshold Regime p. 215
Dispersion Analysis for Generalized Spin Polarizabilities p. 225
The Spin Structure of the Neutron and [superscript 3]He: Overview of the JLab Experiments in Hall A p. 231
An Overview of Spin Physics in Hall B at JLab p. 243
Polarization Observables in [pi][superscript +] Electroproduction with CLAS p. 253
Helicity Structure of Baryon Resonances p. 259
The [superscript 3]He and Neutron Spin Structure Functions in the Resonance Region p. 267

The Polarized Beam at MAMI p. 277
A New Injector for Polarized Electrons at ELSA p. 283
The Status of the SPring8 Project p. 289
Polarization Program at GRAAL and GDH p. 299
The GDH Sum Rule and the Spin Structure of [superscript 3]He and the Neutron Using Nearly Real Photons p. 307
