Chemical bonding of moving cations in superionic conductors
Electronic state of silver and copper halides based on DV-X[alpha] method
Physical studies of electronic structure and ionic dynamics in superionic conductors
LDA study on polarizabilities of ions in copper halide crystals with the zinc-blende structure
Crystal structure of the superionic phase of CuAgSe
Application of ion-conducting microelectrodes for cation doping into oxide materials
Reliability and limitations of dielectric continuum model for ionic mobility in subcritical liquid methanol and water
Proton conductivity of superionic conductor Ti[subscript 3]H(SO[subscript 4])[subscript 2]
Structural and compositional analysis of LaF[subscript 3] thin films suitable for oxygen sensor
Fast migration phenomenon of Ti[superscript +] ions diffusing in a KCl crystal through the interface with liquid TiCl and solid KCl
Pressure dependence of the effective charge in copper halides
Ab initio molecular-dynamics simulations of superionic phases of Cu halides and Ag chalcogenides
Modeling conduction pathways in ionic conductors
Ion conduction path and low-temperature form : argyrodite-type superionic conductors
Glassy and polymeric ionic conductors : statistical modeling and Monte Carlo simulations
Universalsities of ion-hopping in random systems
Excitons in AgI-based-glasses and composites
Hopping models for ion conduction in noncrystals
Coordination environment and network structure in AgI doped As-chalcogenide glasses
Scaling properties of ion conduction and what they reveal about ion motion in glasses
Study on superionic conductors by optical measurements
Phase stabilization and heat capacity of zirconia
Computer simulation study of anomalous diffusion in [beta]-AgI
NMR study on Li[superscript +] ionic diffusion in Li[subscript x]V[subscript 2]O[subscript 5] prepared by solid-state reaction
Direct diffusion studies of solids using radioactive nuclear beams
X-ray absorption spectroscopy of Li ion battery and electronic materials
Hole burning spectroscopy and site selective spectroscopy for rare earth ions doped La[subscript 0.5]Li[subscript 0.5]TiO[subscript 3]
Relation between structure and lithium ion conductivity in La[subscript 4/3-y]Li[subscript y]Ti[subscript 2]O[subscript 6] prepared by solid-state reaction
Dispersion of permittivity in ionic and mixed conductors
Diffuse x-ray scattering and molecular dynamics studies of K-hollandite at high temperatures p. 185

Frequency dependence of spin-lattice relaxation of $^{27}\text{Al}$ in one-dimensional ionic conductor, priderites p. 189

Ion conduction in hollandite-type one-dimensional superionic conductors (K, Cs)-priderites p. 195
