Treatment Modalities in Lung Cancer

Volume Editors
R. Arriagada, Villejuif
T. Le Chevalier, Villejuif

Associate Editors
J.R. Bertino, New York, N.Y.; N.M. Bleehen, Cambridge;
J.H. Goldie, Vancouver; H.H. Hansen, Copenhagen;
D.C. Ihde, Bethesda, Md.

40 figures and 50 tables, 1988

KARGER
Basel • München • Paris • London • New York • New Delhi • Singapore • Tokyo • Sydney
Contents

List of Participants ................................................................. XI

Inaugural Conference
Tubiana, M. (Villejuif): The Combination of Radiotherapy and Chemotherapy ..... 1

Mathematical Models
Goldie, J.H.; Coldman, A.J.; Ng, V. (Vancouver, B.C.); Hopkins, H.A.; Looney, W.B. (Charlottesville, Va.): A Mathematical and Computer-Based Model of Alternating Chemotherapy and Radiation Therapy in Experimental Neoplasms ................................................................. 11

Biological Bases and Mechanisms of Cell Resistance to Therapy
Looney, W.B.; Hopkins, H.A. (Charlottesville, Va.): The Relationship of Experimental, Theoretical and Clinical Studies of Alternating Chemotherapy and Radiotherapy in the Management of Lung Cancer ......................... 35
Milas, L. (Houston, Tex.): Effects of Radiotherapy and Chemotherapy on Tumor Bed Stroma ............................................................... 48
Contents VIII

Treatment Response Evaluation and Statistical Analysis

Ihde, D.C. (Bethesda, Md.): How Should We Report Results of Clinical Trials of Combined Chemotherapy and Chest Irradiation in Limited Stage Small Cell Lung Cancer? .................................................. 65

Choi, N.C.; Carey, R.W. (Boston, Mass.): Reassessment of Loco-Regional Failure Rate in Relation with Radiation Dose in Combined Modality Approach of Multidrug Chemotherapy and Radiotherapy for Limited Stage Small-Cell Lung Carcinoma ................................................. 70

Bénichou, J.; Chastang, C. (Paris): Use of the Triangular Test in the Analysis of Randomized Clinical Trials when the Response Criterion is Censored: Application to Two Trials in Lung Cancer ........................................ 83

Concurrent Combinations

Payne, D.G.; Feld, R. (Toronto, Ont.): Concurrent Radiotherapy and Chemotherapy in Lung Cancer at the Princess Margaret Hospital ........................................ 96

Lange, O.F. (Bonn): Concurrent Chemo-Radiotherapy in Small Cell Lung Cancer. 102

Sequential Combinations

Aisner, J. (Baltimore, Md.): Combined Modalities in the Treatment of Small Cell Carcinoma of the Lung. A Review of Current Standings ....................... 142
Unconventional Combinations

Arriagada, R. (Villejuif): Review of Unconventional Combinations of Radiotherapy and Chemotherapy in Lung Cancer .................................................. 150
Hurman, D.C; Urtasun, R.C; Belch, A.R.; Kinney, B.; Amy, R.; Hanson, J. (Alberta, Ed.); Feldstein, M. (Boston, Mass.): Sequential Wide Field Irradiation and Systemic Chemotherapy as Part of the Induction Treatment of Small Cell Lung Cancer ...................................................... 168
Looney, W.B.; Hopkins, H.A. (Charlottesville, Va.): The Integration of Multifractionated Radiotherapy into Combined Chemotherapeutic-Radiotherapeutic Approaches to Lung Cancer Treatment ...................................................... 176
Le Chevalier, T.; Arriagada, R.; Thomas, F.; Baldeyrour, P.; Ruffie, P. (Villejuif); Cremoux, H. de; Martin, M. (Créteil); Cerrina, M.L. (Clamart); De Thé, H.; Tarayre, M.; Sancho-Garnier, H.; GROP (Villejuif): Experience of the Institut Gustave-Roussy in Alternating Radiotherapy and Chemotherapy Schedules as Induction Treatment in Limited Small-Cell Lung Cancer ...................................................... 190
Arriagada, R.; De Thé, H.; Thomas, F. (Villejuif); Cremoux, H. de (Créteil); Dewar, J.; Sancho-Garnier, H.; Le Chevalier, T.; GROP (Villejuif): Prognostic Value of Initial Chemotherapy Doses in Limited Small Cell Lung Cancer .......................... 194

Treatment Toxicity and Long-Term Sequelae

Le Chevalier, T. (Villejuif): Review of Toxicity and Long-Term Sequelae in Lung Cancer ...................................................... 199
Feld, R.; Payne, D.; Hodson, I.; Coy, P. for the NCI Clinical Trials Group (Toronto, Ont.): Complications of Treatment of Small Cell Carcinoma of the Lung ...................................................... 204
Johnson, B.E.; Glatstein, E.; Ihde, D.C. (Bethesda, Md.): The National Cancer Institute Experience with Early and Late Effects of Combined Modality Therapy in Small Cell Lung Cancer ...................................................... 210
Choi, N.C; Kanarek, D.J.; Kazemi, H. (Boston, Mass.): Prospective Study of Pulmonary Tolerance to Radiotherapy or Radiotherapy plus Multidrug Chemotherapy for Loco-Regional Lung Carcinoma ...................................................... 213
Contents

Kaasa, S.; Olsnes, B.T.; Thorud, E.; Høst, H. (Oslo): Reduced Short-Term Neuropsychological Performance in Patients with Nonsmall-Cell Lung Cancer Treated with Cisplatin and Etoposide ........................................ 226

Consensus Report

Subject Index ............................................................... 242
