Tropical rain forests of the Far East

SECOND EDITION

T. C. WHITMORE

WITH A CHAPTER ON SOILS BY C. P. BURNHAM

CLARENDON PRESS  OXFORD

1984
Contents

14. MONSOON FOREST FORMATIONS 196
   14.1. Monsoon forests and savanna 196
   14.2. Tropical moist deciduous forest 199
   14.3. Transition from rain to monsoon forest north of Malaya: the Kra ecotone 201

15. ANIMAL LIFE AND FOREST FORMATIONS 204

16. CONIFERS IN THE FORESTS 208
   16.1. Agathis 211
   16.2. Araucaria 212
   16.3. Pinus 215

17. VARIATION WITHIN THE TROPICAL LOWLAND EVERGREEN RAIN FOREST AND ITS CAUSES 217
   17.1. Variation through the region 218
   17.2. Regional variation within dipterocarp forest 219
   17.3. Local variation within dipterocarp forest 222
   17.4. Variation within a rain forest in the Solomon Islands 233
   17.5. On the nature of variation within lowland rain forest 236
   17.6. On species-richness in tropical rain forest 237
   17.7. Species evolution in tropical rain forest 239
   17.8. Breeding systems in tropical-rain-forest trees 240

18. MOUNTAIN RAIN FORESTS 243
   18.1. Montane forest Formations 243
   18.2. The tree line and beyond 250
   18.3. The mountain floras 251
   18.4. The upper montane and heath-forest Formations compared 252
   18.5. The montane environment 253
   18.6. Correlations between elevational changes in forest and environment 255
   18.7. Zonation of animals on tropical mountains 257

Part V: Man and the tropical rain forest

19. MAN AND THE TROPICAL RAIN FOREST 263
   19.1. The three ages of Man 263
   19.2. Man's current impact on the forest 267
   19.3. Effect of intensive logging on the rain forest 269
   19.4. The effects of logging on the rain-forest animals 272

20. SECONDARY FOREST AND SHIFTING CULTIVATION 276
   20.1. Shifting cultivation 278
   20.2. General course of secondary successions 281

21. LOOKING AHEAD 285
   21.1. Trends in forestry and forest industry 285
   21.2. Importance of the rain forest 286
   21.3. Trends in conservation 288

APPENDIX 293
Select list of publications containing description of tropical rain forest in the countries of the Far East

BIBLIOGRAPHY 297
INDEX OF PLANT NAMES 329
GENERAL INDEX 341

The front end-paper shows a map of the tropical Far East, with some of the main conservation areas included (see Chapter 21), and the back end-paper a map of Malesia, Australia, Melanesia, and Micronesia.
