Neurotoxins and Their Pharmacological Implications

A Biological Council Symposium

Editor

Peter Jenner, B.Pharm., Ph.D., D.Sc., M.P.S.

MRC Movement Disorders Research Group
University Department of Neurology and
Parkinson's Disease Society Research Centre
Institute of Psychiatry and
King's College Hospital Medical School
Denmark Hill, London SE5, England

Raven Press New York
Contents

Site Directed Neurotoxicity

1 Neurotoxins and the Selective Vulnerability of Brain
R. C. Collins

19 Neuronal Degeneration in Animals and Man: The Quinolinic Acid Connection

33 Excitatory Amino Acid Antagonists as Potential Therapeutic Agents
B. Meldrum

55 Second Messenger Control of Neurotransmitter Release Studied at Synapses and Neurosecretory Cells with $\alpha$ Latrotoxin and Congener Stimulatory Toxins
L. Madeddu and J. Meldolesi

Neurotoxins as Probes for Ion Channels

65 Polypeptide Toxins as Tools to Study Na$^+$ Channels and Ca$^{2+}$ Activated K$^+$ Channels

81 Neuronal Acceptor Sub-Types for Demdrotoxin and Their Relation to K$^+$ Channels

97 Pharmacological Actions of Facilitatory Neurotoxins on Peripheral Synapses
A. L. Harvey and A. J. Anderson

115 The Interactions of Toxins with Calcium Channels
