Message from the Lord Mayor of Westminster ix
Contents xi
Preface xvii

I: Homœostasis and Clinical Medicine

President's Opening Address
   Professor Dorothy Hodgkin 1
Cobalamin Homœostasis
   H. Ray Bhatt 5
Cobalamin metabolism in vegetarians and vegans
   C.J. Vesey, J.C. Linnell and H.R. Bhatt 13
Cobalamin and diet
   Israël Chanarin 19
Markers for gastric mucosal atrophy and
intrinsic factor deficiency in man
   H.C. Heinrich and E.E. Gabbe 29
Auto-antibodies against gastric intrinsic factor
in pernicious anaemia-patient urine
   V. Wahlstedt and R. Gräsbeck 47
Experimental basis of oral and parenteral therapy
with cyanocobalamin and aquacobalamin
   H.C. Heinrich and E.E. Gabbe 51
Cobalamin metabolism is deranged by alcohol
   P. Hayes and H.R. Bhatt 65
Inherited disorders of cobalamin metabolism
   John C. Linnell 71
The nature of the defect in cobalmin G mutation
   C.A. Hall, R.H. Lindenbaum, E. Arenson,
   J.A. Begley and R.C. Chu 79
Methylcobalamin depletion in a case of sudden infant death syndrome
H.R. Bhatt and J.C. Linnell 83
Cobalamin metabolism in Duchenne muscular dystrophy
E. Sowter and H.R. Bhatt 87
Adenosyl-homocystinuria, hyperglycinuria, glutathioninuria and methylmalonic aciduria induced by streptozotocin in rats
H.R. Bhatt, D. Burston and J.C. Linnell 91

II: Pathophysiology and the Nervous System
Cobalamin influx into rat brain in vivo
H.R. Bhatt and J.C. Linnell 97
The rôle of cobalamins in the nervous system
R. Green and D.W. Jacobsen 107
Multiple Sclerosis and vitamin B12 deficiency
Edward H. Reynolds 121
Hypomethylation produces vitamin B12 associated neuropathy in the pig
Recovery of neuropathy in pernicious anaemia
E. Hippe, K. Andersen, J. Brynskov, P. Gimsing, E. Kjaersgaard and B. Stigsby 155
Cobalamin C mutation: exaggeration of neurological signs with hydroxocobalamin
J. Zittoun, J. Marquet and B. Echenne 161
CSF S-adenosylmethionine in neurological and psychiatric patients: effects of treatment with parenteral and oral S-adenosylmethionine
T. Bottiglieri, P. Godfrey, M.W.P. Carney, B.K. T Toone and E.H. Reynolds 167
The effect of alcohol on the development of cobalamin deficiency in the rat
   E. Sowter and H.R. Bhatt 175

Nitroprusside cyanogenesis and diabetes
   H.R. Bhatt, J.C. Linnell and P. Elliott 179

Cobalamin metabolism in diabetes mellitus
   H.R. Bhatt and J.C. Linnell 183

Methylcobalamin and thyroid function
   H.R. Bhatt, J.C. Linnell and P. G. Elliott 189

III: Leukaemia and Tumour Development
Cobalamin metabolism in acute lymphoblastic leukaemia in children
   Nina V. Myasishcheva 193

Cobalamin metabolism in human leukaemia cell lines
   J.E. Faludy and J.C. Linnell 199

Vitamin B12 and methyl group metabolism in carcinogenesis
   Lionel A. Poirier 207

Pancreatic islet-cell tumours and disturbance in cobalamin metabolism
   H.R. Bhatt, P. Elliott, A.C. Branfoot & J.C. Linnell 225

Cobalamin inactivation as a target in cancer chemotherapy
   A.A.M. Ermens, A.C.M. Kroes, J. Lindemans and J. Abels 229
IV: **Binders, Receptors and Enzymes**

The rôle of TCII in the cellular uptake of cobalamin  
*Charles A. Hall*  
239

Structural studies of cobalamin-binding proteins  
255

Regulation of TC II-mediated uptake of cobalamin by cells  
*J. Lindemans, J. van Kapel and J. Abels*  
263

Genetic aspects of TC II  
*F. Arwert, J.C. Pronk, B. Zelle, M. Fräter-Schröder, H. J. Porck and A.W. Eriksson*  
277

The structure and biosynthesis of human TC II  
*E.V. Quadros and S.P. Rothenberg*  
281

Some observations on the proteins that associate with serum transcobalamins in humans  
*Mads Hansen and Ebba Nexø*  
289

Synthesis and recycling of the TC II receptor  
*D.W. Jacobsen, T. Amagasaki and R. Green*  
293

The affinity of types XX and MM for cyanocobalamin and for tissue receptors  
*J.A. Begley and C.A. Hall*  
307

New data on the porcine and human intrinsic factor receptors  
*Ralph Gräsbeck and Jean-Louis Guéant*  
313

Structural studies on methylmalonyl-CoA mutase from *Propionibacterium shermanii*  
*Peter F. Leadlay*  
321

Molecular cloning and characterization of human methylmalonyl-CoA mutase  
*Fred D. Ledley*  
329
Primary sequence homology between methylmalonyl-CoA mutase from *Propionibacterium shermanii* and *Homo sapiens*

*Peter F. Leadlay and Fred D. Ledley*  
Page 341

Exocrine secretion of haptocorrin

*Ebba Nexø*  
Page 353

Saturation of vitamin B12 binding sites in the basolateral plasma membrane of the cat salivary epithelium

*G.E. Mann, D.L. Yudilevich and L.H. Smaje*  
Page 359

The transport of cobalamin across differentiated monolayers of Caco-2 cells

*C.J. Dix, I.F. Hassan, H.Y. O'Bray, R. Shah and G. Wilson*  
Page 367

V: Methods and Measurements

Cobalamin (Vitamin B-12) deficiency: improved diagnosis using new assays for serum methylmalonic acid and total homocysteine

*R.H. Allen, S.P. Stabler and J. Lindenbaum*  
Page 377

The Westminster metabolic screening programme - chemical ionisation in organic acid profiling by GC/MS

*H.R. Bhatt, P. Lamba, G. Woffendin and P. Bishop*  
Page 389

Total corrinoids and cobalamin analysis in biological material by high performance liquid chromatography followed by radio-isotope dilution assay

*M. Djalali, J.L. Guéant, S. El Khalafy, D. Lambert, I. Sbéti and J.P. Nicolas*  
Page 397
Ligand binding and radio-immunoassay for cobalamin
   S.P. Rothenberg and E.V. Quadros

Protein A assay for intrinsic factor-cobalamin complex and its applications
   N.A. Sourial and A.H. Waters

Erythrocyte total cobalamin in patients with multiple sclerosis and normal controls: a methodological evaluation
   J.E. Faludy and J.C. Linnell

VI: Abstracts

Studies on cobalamin-dependent methionine synthase from Escherichia coli
   Rouvena G. Matthews

Isolation of cDNA and genomic clones for human intrinsic factor
   J.E. Hewitt, M. Gordon and D.H. Alpers

Modification of the carcinogenic effect of N-nitrosoethylurea by methylcobalamin in organ cultures of mouse embryonic kidney
   O.D. Golenko, N.I. Ryzhova and N.V. Myasishcheva

Cobalamin metabolism after 20% deep burn
   H. Belcher, P. Lamba, E. Sowter, P. Elliott and H.R. Bhatt

Lactobacillus leichmannii as a probe for the quantitation of vitamin B-12
   S.M. Evans and C.S. Dow

VII: Index
