BEHAVIOURAL PHARMACOLOGY OF 5-HT

Edited by

Paul Bevan
Duphar, B.V., The Netherlands

Alexander R. Cools
Katholieke Universiteit, The Netherlands

Trevor Archer
University of Gothenburg, Sweden
TABLE OF CONTENTS

SECTION I Introduction
A.R. Cools 1

1 Behavioural pharmacology of 5-HT: an introduction
A.R. Green 3

2 Is rotational behaviour in the rat a 5-HT$_{1A}$ or
5-HT$_{1B}$ mediated response?
T.P. Blackburn, D.A. Martin, P. Slater 21

3 Serotonin-mediated behaviour following central or
peripheral administration of the selective NK-3
tachykinin agonist senktide
A.J. Stoessi, C.T. Dourish, S.D. Iversen 27

SECTION II 5-HT and sexual behaviour
P. Bevan 33

4 New aspects on the serotonergic modulation of male
rat sexual behaviour
S. Ahlenius, K. Larsson 35

5 Differential roles of 5-HT receptor subtypes in
female sexual behaviour
S.D. Mendelson, B.B. Gorzalka 55

6 Hypothalamic sites of action of the dual effect of
5-HT on female sexual behaviour in the rat
M.D. James, S.M. Lane, D.R. Hole, C.A. Wilson 73

7 5-HT$_{1A}$ and 5-HT$_{1B}$ agonists produce opposite
effects on the ejaculatory response induced by
amphetamine in rats
L. Rényi & T. Lewander 79

8 Functional interplay of serotonin (5-HT)–receptor
subtypes
H.H.G. Berendsen, R.J.M. Smets, C.L.E. Broekkamp 83

SECTION III 5-HT & aggression
P. Bevan 87

9 Modulatory action of serotonin in aggressive
behaviour
B. Olivier, J. Mos, M. Tulp, J. Schipper and
P. Bevan 89

10 Brain 5-HT system and inhibition of aggressive
behaviour
K.A. Miczek, P. Donat 117
11 Differential effects of benzodiazepines and 5-HT1A agonists on defensive patterns in wild rattus
D.C. Blanchard, K. Hori, R.J. Rodgers, C.A. Hendrie, R.J. Blanchard 145

12 Competition for sucrose-pellets in triads of male, Wistar rats, the effects of eight 5-HT-agonists
C. Gentsch, M. Lichtsteiner, H. Feer 149

SECTION IV Depression and psychosis
A.R. Cools 153

13 Towards a theory of serotonergic dysfunction in depression
P. Willner 157

14 5-HT receptor subtypes in depression
J.F.W. Deakin 179

15 Modulation of the 5-HT system and antipsychotic activity
J.A.M. van der Heyden 205

16 Mechanism of action of 8-OH-DPAT on a rat model for human depression
G.A. Kennet, G. Curzon 225

17 Reversal of helpless behaviour in rats by serotonin uptake inhibitors
P. Martin, A.M. Laporte, P. Soubrie, S. El Mestikawy, M. Hamon 231

18 Ritanserin (R 55 667), an original thymosthenic

19 The abilities of 5-HT3 antagonists to inhibit the hyperreactivity caused by dopamine infusion into the nucleus accumbens of the rat
N.M. Barnes, B. Costall, A.M. Domeney, M.E. Kelly, R.J. Naylor, M.B. Tyers 239

20 5-HT2 antagonists increase tactile startle habituation in an animal model of a habituation deficit in schizophrenia.
M.A. Geyer 243

SECTION V Feeding behaviour
A.R. Cools 247

21 Pharmacological evidence for the involvement of serotonergic mechanisms in human feeding
E. Goodall, T. Silverstone 249
22 Serotonin and feeding
R. Samanin 259

23 Opposite effects of 5-HT1A and 5-HT1B/1C agonists on food intake

24 Effects of selective serotonergic agonists on palatability-induced ingestion
J.D. Leander 287

25 8-OH-DPAT reliably increases ingestion of solid but not liquid diets
A.M.J. Montgomery, P. Willner, R. Muscat 291

26 Pharmacological manipulation of 5-HT: Effect on intake of diets supplemented with either sweet or bland carbohydrates
C.L. Lawton, J.E. Blundell 295

SECTION VI 5-HT, pain and anxiety
T. Archer 299

27 The behavioural pharmacology of serotonin in pain processes
O-G. Berge, C. Post and T. Archer 301

28 The relationship between various animal models of anxiety, fear-related psychiatric symptoms and response to serotonergic drugs
C.L. Broekkamp, F. Jenck 321

29 5-HT1A receptors: a bridge between anxiety and depression?
P. Soubrie 337

30 A review of the evidence supporting the anxiolytic potential of 5-HT3 receptor antagonists
M.B. Tyers 353

31 Ultrasonic vocalizations by rat pups as an animal model for anxiolytic activity: effects of serotonergic drugs
J. Mos, B. Olivier 361

32 Effects of the 5-HT1A agonist ipsapirone on the behavioural, endocrine and neurochemical responses to conditioned fear
S.A. Lorens, H. Mitsushio, L.D. Van de Kar 367

33 Buspirone, ipsapirone and 5-HT1A-receptor agonists show an anxiogenic-like profile in the elevated plus-maze
P. Moser 371
34 Antianxiety effect of various putative 5-HT₁ receptor agonists on the conditioned defensive burying paradigm
A. Fernández-Guasti, E. Hong

35 The anxiolytic activities of the 5-HT₃ receptor antagonists GR38032F, ICS 205–930 and BRL 43694

36 Behavioural effects of 5-HT₃ antagonists in animal models for aggression, anxiety and psychosis
J. Mos, J.A.M. van der Heyden, B. Olivier

SECTION VII 5-HT: Drug discrimination and aversion
T.U.C. Järbe and T. Archer

37 Receptor mechanisms of the discriminative stimulus properties of putative serotonin agonists
W. Koek, F.C. Colpaert

38 Serotonin and aversion.
F.G. Graeff

39 Stimulus properties of arylpiperazine second generation anxiolytics
R.A. Glennon, R. Young, M.E. Pierson

40 Behavioural, neurochemical and discriminative stimulus effects of spiroxatrine, a putative 5-HT₁A receptor antagonist
J.E. Barrett, S.N. Olmstead, Z. Lei, C. Harrod, S.M. Hoffmann, K. Glover, M.A. Nader, B.A. Weissman

41 Rapid training of the stimulus properties of selective 5-hydroxytryptamine₁A agonists
I. Lucki, J.A. South

SECTION VIII Behavioural pharmacology of 5-HT: Possible progress in the laterality of concepts
P. Bevan, S. Lorens and T. Archer
