Pharmacoepidemiology

Edited by
Brian L. Strom, M.D., M.P.H.

Associate Professor of Medicine and
Pharmacology and
Co-Director
Clinical Epidemiology Unit
Section of General Internal Medicine
Department of Medicine
University of Pennsylvania School of Medicine
Attending Physician
Hospital of the University of Pennsylvania
Philadelphia, Pennsylvania

CHURCHILL LIVINGSTONE
New York, Edinburgh, London, Melbourne
Contents

I. Introduction

1. What is Pharmacoepidemiology?
   Brian L. Strom 3

2. Study Designs Available for Pharmacoepidemiology Studies
   Brian L. Strom 13

3. Sample Size Considerations for Pharmacoepidemiologic Studies
   Brian L. Strom 27

4. When Should One Perform Pharmacoepidemiologic Studies?
   Brian L. Strom 39

II. Perspectives on Pharmacoepidemiology

5. A Public Health Perspective from Academia
   Paul D. Stolley 51

6. A View from Industry
   Roger M. Sachs and Gretchen S. Dieck 57

7. A View from a Regulatory Agency
   Janet B. Arrowsmith and Charles Anello 69

8. A View from the US Court Room
   Sidney H. Willig 85

III. Systems Available for Pharmacoepidemiology Studies

9. The Spontaneous Reporting System in the United States
   Carlene Baum and Charles Anello 107

10. Spontaneous Reporting Systems Outside the United States
    Bengt-Erik Wiholm and Sten Olsen 119
11. Intensive Hospital-Based Cohort Studies
   David H. Lawson and K. Beard
12. Group Health Cooperative of Puget Sound
   Andy Stergachis
13. Kaiser Permanente Medical Care Program: Northern California and Other Regions
   Gary D. Friedman
14. Medicaid Data Bases
   Jeffrey L. Carson, Brian L. Strom, and M. Lee Morse
15. Health Data Bases in Saskatchewan
   Linda M. Strand and Roy West
16. The Rhode Island Drug Use Reporting System
   John W. Norton and Carol A. Welch
17. Inpatient Data Bases
   Judith K. Jones
18. Other Approaches to Pharmacoepidemiologic Studies
   Brian L. Strom
19. Choosing Among the Available Approaches for Pharmacoepidemiologic Studies
   Brian L. Strom

IV. Selected Methodologic Issues in Pharmacoepidemiology
20. Studies of Drug Utilization
   David Lee and Ulf Bergman
21. Determining Causation from Case Reports
   Judith K. Jones
22. Screening for Unknown Effects of Newly Marketed Drugs
   Jeffrey L. Carson, Brian L. Strom, and Greg Maislin
23. The Use of Pharmacoepidemiology to Study Beneficial Drug Effects
   Brian L. Strom and Kenneth L. Melmon
24. Pharmacoeconomics: Economic Evaluation of Pharmaceuticals 325
   John M. Eisenberg, Henry Glick, and Harris Koffer

25. Using Epidemiologic Methods to Individualize Drug Therapy 351
   Craig R. Smith and Richard D. Moore

V. Conclusion

26. The Future of Pharmacoepidemiology 363
   Brian L. Strom
