New Drugs for Asthma Therapy

Edited by

G.P. Anderson
I.D. Chapman
J. Morley

Birkhäuser Verlag
Basel • Boston • Berlin
Contents

Section I: Novel Bronchodilators

R.C. Small, R.W. Foster, J.L. Berry, I.D. Chapman and K.R.F. Elliott
*The Bronchodilator Action of AH 21-132* ...................................................... 3

K.J. Murray, R.J. Eden, P.J. England, J. Dolan, D.C. Grimsditch,
C.A. Stutchbury, B. Patel, M.L. Reeves, A. Worby, T.J. Torphy, L.M. Wood,
B.H. Warrington and W.J. Coates
*Potential Use of Selective Phosphodiesterase Inhibitors in the Treatment of Asthma* ... 27

D.R. Buckle and J.F. Taylor
*The Effects of BRL 38227 on Antigen-Induced Extravasation and Cellular Infiltration into the Peritoneal Cavity of Actively Sensitised Rats* ................................. 47

I.D. Chapman, L. Mazzoni and J. Morley
*Actions of SDZ PCO 400 and Cromakalim on Airway Smooth Muscle In Vivo* ............ 53

J. Cooper and J. Maclagan
*The Effect of Potassium Channel Opening Drugs on Pulmonary Nerves* ...................... 63

L.-A. Svensson
*Mechanism of Action of Bambuterol: A Beta-Agonist Prodrug with Sustained Lung Affinity* ................................................................. 71

M. Johnson
*Salmeterol: A Novel Drug for the Treatment of Asthma* ........................................ 79
G.P. Anderson  
*Pharmacology of Formoterol: An Innovative Bronchodilator* ................................................. 97

H.N. Doods  
*Selective Muscarinic Antagonists as Bronchodilators* ............................................................ 117

U. Kilian, R. Beume, M. Eltze, D. Häfner, G. Hanauer and Ch. Schudt  
*Telenzepine and its Enantiomers, M1-Selective Antimuscarinics in Guinea Pig Lung Function Tests* .......................................................... 131

S. Suskovic, B. Jurcic and A. Lenardic  
*Evaluation of Slow-Release Theophylline Pharmacokinetics by Fourier's Harmonic Analysis* .......................................................... 149

A.E. Tattersfield  
*Prospects for Bronchodilating Drugs in the 1990s* ................................................................. 157

Section II: Allergic Mediators as Targets for Asthma Drugs

R.N. Young  
*Development of Novel Leukotriene-Based Anti-Asthma Drugs: MK-886 and MK-571* ............. 179

A.N. Payne, W.P. Jackson, J.A. Salmon, A. Nicholls, M. Yeadon and L.G. Garland  
*Hydroxamic Acids and Hydroxyureas as Novel, Selective 5-Lipoxygenase Inhibitors for Possible Use in Asthma* .......................................................... 189

*WY-50, 295 Tromethamine: An Orally Active 5-Lipoxygenase Inhibitor with Anti-Allergic Activity* .......................................................... 201

R.A. Coleman  
*GR32191 and the Role of Thromboxane A2 in Asthma – Preclinical and Clinical Findings* .......... 211

V.A. Alabaster, R.F. Keir, M.J. Parry and R.N. de Souza  
*UK-74, 505, A Novel and Selective PAF Antagonist, Exhibits Potent and Long Lasting Activity In Vivo* .......................................................... 221

H.O. Heuer  
*The Effects of Hetrazepine PAF Antagonists in Preclinical Models of Asthma* ......................... 229
K. Boubekeur, A. Kristersson, I.D. Chapman and J. Morley
Development of Airway Hyperreactivity in the Guinea-Pig Following Allergic Reactions ............................................ 247

L. Mazzoni, I.D. Chapman and J. Morley
Changes in Airway Sensitivity to Histamine are not Necessarily Paralleled by Changed Sensitivity to Acetylcholine .................. 257

Section III: Prophylactic Anti-Asthma Drugs

J. Bernheim, C. Arendt and C. De Vos
Cetirizine: More than an Antihistamine? ................................ 269

Azelastine: A Multifaceted Drug for Asthma Therapy .................. 295

SCH 37370: A New Drug Combining Antagonism of Platelet-Activating Factor (PAF) with Antagonism of Histamine .................... 313

K. Hoshiko, I.D. Chapman and J. Morley
Histamine (H1) Antagonists and Airway Hyperreactivity in the Guinea-Pig .................... 323

O.-H. Wilhelms, A. Roesch and W. Schaumann
Picumast Dihydrochloride (Auteral), A New Anti-Allergic Inhibitor of Mediator Release and Action ............................... 335

S.A. Saeed, F. Mahmood, A. Naqvi and M.H. Jafary
Inhibitory Effect of Oral Ketotifen on Ex-Vivo Platelet Activating Factor - Induced Platelet Aggregation ...................... 351

I.M. Richards, S.K. Shields, M.J. Bienkowski, C.J. Dunn and E.J. Jacobsen
Novel Inhibitors of Pulmonary Eosinophil Accumulation .................. 359

A. Koda, Y. Yanagihara and N. Matsuura
IPD-1151T: A Prototype Drug for IGE Antibody Synthesis Modulation ................. 369

C. Schudt, S. Winder, M. Eltze, U. Kilian and R. Beume
Zardaverine: A Cyclic AMP Specific PDE III/IV Inhibitor ................ 379

J. Morley, I.D. Chapman and L. Mazzoni
SDZ MKS 492 .................. 403
Section IV: New Approaches to Anti-Asthma Drug Detection

T. Higenbottam
The Importance of Inflammatory Cells in Asthma ............................................. 413

M.L. Watson and T.J. Williams
Measurement of Cell Accumulation ................................................................. 429

G.U. Di Maria, L.S. Malatino, S. Bellofiore and A. Mistretta
Endothelin Potently Constricts Rat Airways In Vivo ....................................... 439

I.D. Chapman, K. Boubekeur and J. Morley
Airway Eosinophilia and Airway Hyperreactivity Are Parallel Rather Than
Sequential Events in the Guinea-Pig ................................................................. 445

S. Sanjar
Measurement and Pharmacology of Mucociliary Clearance ............................ 457

C.G.A. Persson
Airway Plasma Exudation in Detection of Antiasthma Drugs ........................... 471

S.R. O'Donnell, A. Miller-Larsson, R. Brattsand and K.L. Rauchle
An In Situ Preparation of Rat Trachea for Studying the Effects of Mucosally
Applied Anti-Asthma Drugs on Mediator-Induced Plasma Exudation ............... 491

L.G. Garland and J.J. Adcock
New Approaches to the Attenuation of Sensory Reflexes in Airway Inflammation .. 497

S.A. Silbaugh, S.L. Cockerham and P.W. Stengel
Effects of Inhaled or Intravenous Thiorphan on Substance P-Induced Airway
Obstruction ........................................................................................................ 519

C.D. Wegner, R. Rothlein and R.H. Gundel
Adhesion Molecules in the Pathogenesis of Asthma .......................................... 529

Index ..................................................................................................................... 545
