3. Selection of Drug Candidates for Transdermal Drug Delivery

Richard H. Guy and Jonathan Hadgraft

I. Introduction
II. Biological properties of the drug
III. Physicochemical properties of the drug
IV. Determination of drug candidate feasibility
V. In vitro assessment of skin permeability
VI. System design
References

Richard J. Schmidt

I. Introduction
II. Toxicological responses of the skin
III. Conclusions
References

5. Drug Metabolism in the Skin: Advantages and Disadvantages

Ulrich Tauber

I. Introduction
II. The role of skin metabolism in systemic drug therapy
III. The role of skin biotransformation in topical and transcutaneous drug therapy
IV. Conclusions
References

6. Microbial Metabolism of Topically Applied Drugs

Stephen P. Denyer and Clare McNabb

I. Introduction
II. Microbiology of the skin
III. Drug metabolism by skin microorganisms
IV. Conclusions
References

Saeho Chong and Ho-Leung Fung

I. Introduction 135
II. Relationships between in vitro and in vivo release rates from DDS 136
III. Constancy in plasma drug concentration after transdermal DDS 137
IV. Constancy in therapeutic effects after transdermal DDS application 139
V. Pharmacological consequences of abrupt removal of transdermal DDS 145
VI. Pharmacologic properties ideal for transdermal delivery 147
References 148

8. Transdermal Drug Delivery to the Newborn Infant

Nicholas Evans and Nicholas Rutter

I. Introduction 155
II. Mode of drug administration 157
III. Structure of the newborn infant's skin 158
IV. Skin permeability in the newborn 161
V. Hazards of a high skin permeability 164
VI. Transdermal delivery of theophylline 165
VII. Transdermal delivery of other drugs 173
References 174

9. The In Vitro Evaluation of Transdermal Delivery

Christopher L. Gummer

I. Introduction 177
II. Delivery of the molecule to the skin surface 180
III. Passage of the molecule through the skin 183
IV. Recovery of the molecule in vitro 187
V. Conclusions 193
References 194
10. Penetration Enhancers and Their Use in Transdermal Therapeutic Systems

Kenneth A. Walters

I. Introduction
II. Skin permeability
III. Chemicals used to enhance skin permeability
IV. Incorporation of enhancers into transdermal systems
V. Conclusions
References

11. Iontophoresis

Ronald R. Burnette

I. Introduction
II. Overview
III. Skin permselectivity
IV. Ion transport via "pores"
V. Modeling of iontophoretic transport
VI. Conclusions
References

12. Materials Selection for Transdermal Delivery Systems

Richard W. Baker and Jorge Heller

I. Background
II. Device components
III. Selection of membrane and matrix materials
IV. Other components
References
