AMINO ACIDS
Metabolism and Medical Applications

Edited by

George L. Blackburn, MD, PhD
Associate Professor of Surgery
Harvard Medical School
Director, Nutritional Support Service
New England Deaconess Hospital
Boston, Massachusetts

John P. Grant, MD
Assistant Professor of Surgery
Duke University Medical Center
Durham, North Carolina

Vernon R. Young, PhD
Professor of Nutritional Biochemistry
Massachusetts Institute of Technology
Department of Nutrition and Food Science
Cambridge, Massachusetts

Introduction xxi
   Mei Ohno

Section I Physiology of Whole Body Amino Acid Metabolism

1 Metabolism and Functions of Amino Acids in Man—
   Overview and Synthesis 1
   Hamish N. Munro

2 Modulation of Amino Acid Metabolism by Protein
   and Energy Intakes 13
   Vernon R. Young, Russell D. Yang,
   Carol Meredith, Dwight E. Matthews,
   Dennis M. Bier

3 Developmental Aspects of Amino Acid Metabolism,
   with Reference to Sulfur Amino Acids 29
   John A. Sturman

4 Aging: Amino Acid and Protein Metabolism 37
   Kent G. Lundholm

Communications

Whole Body Protein Turnover, Studied with
15N-Glycine, During Weight Reduction by Moderate
Energy Reduction 48
   Leonard J. Hoffer, Bruce R. Bistrian,
   Stephen D. Phinney, George L. Blackburn,
   Vernon R. Young

Amino Acid Requirements of Japanese Young
Men 55
   Goro Inoue, Tatsushi Komatsu, Kyoichi Kishi,
   Yoshiaki Fujita
Section II  Metabolism of Amino Acids

5  Amino Acids and Gluconeogenesis  63  
   Alan D. Cherrington, Kurt E. Steiner,  
   William W. Lacy

6  Urea Metabolism: Regulation and Sources of Nitrogen  77  
   Mackenzie Walser

6A  Effects of Ketone Bodies on Leucine and Alanine Metabolism in Normal Man  89  
    Morey W. Haymond, Steven L. Nissen,  
    John M. Miles

Communications

Hormonal Regulation of Leucine Metabolism in the Conscious Dog  96  
    Naji N. Abumrad, Phillip E. Williams,  
    William W. Lacy

Quantitation of Branched-Chain Amino and α-Ketoacids by HPLC  101  
    Steven L. Nissen, Carol Van Huysen,  
    Morey W. Haymond

Section III  Amino Acid Interrelationships

7  Dispensable and Indispensable Amino Acid Interrelationships  105  
    Alfred E. Harper

8  Factors Influencing Utilization of Glycine, Glutamate and Aspartate in Clinical Products  123  
    Lewis D. Stegink, Edward F. Bell,  
    Tahia T. Daabees, Dean W. Andersen,  
    Wilbur L. Zike, Lloyd J. Filer, Jr.

9  In Vivo and In Vitro Branched-Chain Amino Acid Interactions  147  
    Michael M. Meguid, Hanspeter Schwartz  
    Dwight E. Matthews, Irene E. Karl,  
    Vernon R. Young, Dennis M. Bier
Communications

Interrelationship Between Phenylalanine and Tyrosine Metabolism in the Postabsorptive Rat 155
Lyle L. Moldawer, Isao Kawamura, Bruce R. Bistrian, George L. Blackburn

Relationship of Plasma Leucine and α-Ketoisocaproate 13C Enrichment During a L-[1-13C] Leucine Infusion in Man 159
Dwight E. Matthews, Hanspeter Schwartz Russell D. Yang, Kathleen J. Motil, Vernon R. Young, Dennis M. Bier

Section IV Amino-Acid-Organ Interrelationships

LIVER

10 Role of Amino Acid Availability in the Regulation of Liver Protein Synthesis 167
Leonard S. Jefferson, Kathryn E. Flaim

11 Amino Acid Metabolism as Studied in the Isolated Hepatocyte 183
Khursheed N. Jeejeebhoy

Communications

The Effect of High Doses of Leucine on Protein Synthesis in Rat Tissues 188
Margaret A. McNurlan, Edward B. Fern, Peter J. Garlick

A Possible Role for the Muscle in the Regulation and Oxidation of Branched-Chain Amino Acid in the Liver 191
Harbhajan S. Paul, Siamak A. Adibi

MUSCLE

12 Factors Affecting Protein Balance in Skeletal Muscle in Normal and Pathological States 201
Alfred L. Goldberg
Communication

Is the Liver or the Periphery Limiting for Hepatic Utilization of Amino Acids in Cancer-Induced Malnutrition? 212
Lars Ekman, Kent G. Lundholm

BRAIN

13 Implications of Parenteral and Enteral Amino Acid Mixtures in Brain Function 219
Richard J. Wurtman

14 Amino Acids and the Regulation of Quantitative and Qualitative Aspects of Food Intake 225
G. Harvey Anderson, N. Theresa Glanville, Edmund T.S. Li

Communication

Alterations in Amino Acid Transport Across Blood-Brain Barrier in Rats Following Portacaval Shunting 239
Richard A. Hawkins, Anke M. Mans, Julien F. Biebuyck

GASTROINTESTINAL

15 Amino Acid and Peptide Absorption in Human Intestine: Implications for Enteral Nutrition 255
Siamak A. Adibi

Section V Clinical Aspects of Amino Acid Metabolism

GENERAL CONSIDERATIONS

16 An Evaluation of Techniques for Estimating Amino Acid Requirements in Hospitalized Patients 265
George L. Blackburn, Lyle L. Moldawer

17 Nutritional Consideration of Amino Acid Profiles in Clinical Therapy 291
Calvin L. Long
18 Enteral Administration of Amino Acids in Clinical Nutrition 309
Yasumi Yugari, Ikuo Ohara, Hiroyuki Ohashi, Toru Takami

19 Parenteral Amino Acid Nutrition in Infants 327
Robert W. Winters, William C. Heird, Ralph B. Dell

20 Nutritional Considerations and the Elderly Patient 333
William P. Steffee

Communication

Urinary Excretion of Carnitine, A Lysine Catabolite, in Patients on Partial Parenteral Nutrition 342
Vichai Tanphaichitr, Alice Thienprasert, Siroj Kanjanapanjapol, Auchai Kanjanapitak

MALNUTRITION

21 Clinical Impact of Protein Malnutrition on Organ Mass and Function 347
John P. Grant

22 Repletion of the Malnourished Patient 359
David H. Elwyn

TRAUMA AND INFECTION

23 Amino Acid Support in the Hypercatabolic Patient 377
John M. Kinney

24 Altered Amino Acid Concentrations and Flux Following Traumatic Injury 387
Communications

Protein Dynamics in Stress  396
Robert R. Wolfe, Richard D. Goodenough,
John F. Burke, Marta H. Wolfe

Protein Turnover in Severely Ill Patients As Measured with $^{15}$N-Glycine  401
Samuel D. Ang, T. Peter Stein

Nutritional and Metabolic Response to Intravenous Hyperalimentation in Severely Stressed Surgical Patients  406
Joel Faintuch, Jacob J. Faintuch,
Marcel C.C. Machado, Arrigo A. Raia

Effect of Diet and Pneumococcal Infection on Protein Dynamics of Blood Lymphocytes in Cynomolgus Monkeys  414
Robert W. Wannemacher, Jr.,
George A. McNamee, Jr., Richard E. Dinterman,
David L. Bunner

Intravenous Alanine Tolerance in Conscious Septic and Nonseptic Rats  417
John J. Spitzer, Gregory J. Bagby,
Owen P. McGuinness, Charles H. Lang

Branched-Chain Amino Acid Solutions Enhance Nitrogen Accretion in Postoperative Cancer Patients  421
Michael M. Meguid, Aurora Landel,
Chun-Chih Lo, Chun-Rong Chang,
Daniel Debonis, L. Robert Hill

CANCER

Protein and Amino Acid Metabolism in Cancer-Bearing Man: The Effects of Total Parenteral Nutrition on Alanine Kinetics  429
Murray F. Brennan, Michael E. Burt
RENAL FAILURE

26 Amino Acid Analogues: Metabolism and Use in Patients With Chronic Renal Failure 439
William E. Mitch

27 Amino Acid Metabolism in Chronic Renal Failure 451
Joel D. Kopple

Communication

Purified Rat Kidney Branched-Chain Ketoacid Dehydrogenase Complex Contains Endogenous Kinase Activity 472
Richard Odessey

LIVER FAILURE

28 Branched-Chain Amino Acids in Hepatic Encephalopathy 477
H. Franklin Herlong, Anna Mae Diehl

Communications

Cystine and Tyrosine Requirements During the Nutritional Repletion of Cirrhotic Patients 484
Daniel Rudman, Rajender K. Chawla, Julie C. Bleier

Intravenous Administration of Branched-Chain Amino Acids in the Treatment of Hepatic Encephalopathy 497

Index 501
