Benzodiazepine Recognition Site Ligands: Biochemistry and Pharmacology

Advances in Biochemical Psychopharmacology
Volume 38

Volume Editors

Giovanni Biggio, Ph.D.
Professor of Pharmacology
School of Biology
University of Cagliari
Cagliari, Italy

E. Costa, M.D.
Chief, Laboratory of Preclinical Pharmacology
National Institute of Mental Health
Saint Elizabeths Hospital
Washington, D.C.

Raven Press  ■  New York
Contents

1 Selective Anxiolytics: Are the Actions Related to Partial "Agonist" Activity or a Preferential Affinity for Benzodiazepine Receptor Subtypes?  
K. W. Gee and H. I. Yamamura

11 Interaction of Benzodiazepine Agonists and Antagonists with Different Benzodiazepine Receptors  
W. Sieghart, G. Drexler, A. Mayer, and A. Schuster

21 Agonist and Antagonist Interactions at Benzodiazepine Receptors  
J. F. Tallman

29 Benzodiazepine Receptor Ligands with Negative Efficacy: Chloride Channel Coupling  
C. Braestrup, T. Honoré, M. Nielsen, E. N. Petersen, and L. H. Jensen

37 Distinction of Benzodiazepine Receptor Agonists and Inverse Agonists by Binding Studies In Vitro  
M. Karobath, P. Supavilai, and P. A. Borea

47 Benzodiazepine Receptors: Differential Ligand Interactions and Purification of the Receptor Protein  
H. Möhler

57 Differential Pharmacological Effects of Benzodiazepine Receptor Inverse Agonists  
E. N. Petersen, L. H. Jensen, T. Honoré, and C. Braestrup

65 Interactions of Different Ligand Classes with the Benzodiazepine Receptor  
I. L. Martin and C. L. Brown

73 Antagonists of Benzodiazepines: Functional Aspects  
W. Haefely

95 Strategies for the Isolation and Characterization of an Endogenous Effector of the Benzodiazepine Recognition Sites  
A. Guidotti, M. G. Corda, and E. Costa

105 The Action of Stress, β-Carbolines, Diazepam, and Ro15-1788 on GABA Receptors in the Rat Brain  
G. Biggio

121 Involvement of GABA in the Facilitation of Punishment Suppressed Behavior Induced by β-Carbolines in Rat  
M. G. Corda, E. Costa, and A. Guidotti
129 Benzodiazepine Receptor Ligands with Opposing Pharmacologic Actions
B. Petrack, A.J. Czernik, J.P. Cassidy, P. Bernard, and N. Yokoyama

139 Pharmacological, Electrophysiological, and Neurochemical Actions of the Convulsant Benzodiazepine Ro 5-4864 (4’-Chlordiazepam)
B.A. Weissman, J. Cott, D. Hommer, R. Quirion, S. Paul, and P. Skolnick

153 Pharmacological and Behavioural Studies of Benzodiazepine Antagonists and Contragonists
D. Nutt

175 Distinct Behavioral and Pharmacological Effects of Two Benzodiazepine Antagonists: Ro 15-1788 and Methyl β-Carboline
L. Prado de Carvalho, P. Venault, E. Cavalheiro, M. Kajjima, A. Valin, R.H. Dodd, P. Potier, J. Rossier, and G. Chapouthier

189 Benzodiazepines Receptor Binding In Vivo: Pharmacokinetic and Pharmacological Significance
T. Mennini and S. Garattini

201 Effect of Agonists, Inverse Agonists, and Antagonists of Benzodiazepine Receptors on the Firing Rate of Substantia Nigra Pars Reticulata Neurons
G. Mereu and G. Biggio

211 Behavioral and EEG Effects of Benzodiazepines and Their Antagonists in the Cat
E. Ongini

227 Chronic Chlordiazepoxide Treatment on Adult and Newborn Rats: Effect on the GABA-Benzodiazepine Receptor Complex
M.P. Abbracchio, W. Balduini, E. Coen, G. Lombardelli, G. Peruzzi, and F. Cattabeni

239 Properties of Benzodiazepine Binding Sites in Peripheral Tissues
M. Del Zompo, A. Bocchetta, G.U. Corsini, J.F. Tallman, and G.L. Gessa

249 Concluding Remarks: Are Benzodiazepine Recognition Sites Functional Entities for the Action of Endogenous Effector(s) or Merely Drug Receptor(s)?
E. Costa

255 Subject Index
