Preface S.M. MacLeod, A.B. Okey, and S.P. Spielberg xv

I. BIOCHEMICAL PHARMACOLOGY

Perinatal Pharmacology Percy Rajchgot and Stuart MacLeod 3
Maturation of Various Testosterone Hydroxylase Activities in Hepatic Microsomes From AKR/J Mice Roy L. Hawke and Allen H. Neims 25
Growth Hormone: A Regulator of the Sexually Differentiated Steroid Metabolism in Rat Liver Jan-Åke Gustafsson, Agneta Mode, Gunnar Norstedt, Peter Eneroth, and Tomas Hökfelt 37
Drug Detoxification: Epoxide Hydrolase Franz Oesch 81
In Vitro Human Pharmacogenetics of Reactive Drug Metabolite Detoxification Stephen P. Spielberg 107
The CO₂ Breath Tests as Monitors of the Cytochrome P450 Dependent Mixed Function Monoxygenase System George H. Lambert, Alvin N. Kotake, and Dale Schoeller 119
Teratology Testing: I. Development and Status of Short-Term Prescreens. II. Biotransformation of Teratogens as Studied in Whole Embryo Culture Thomas H. Shepard, Alan G. Fantel, Philip E. Mirkes, Jean C. Greenaway, Elaine Faustman-Watts, Marlissa Campbell, and Mont R. Juchau 147

II. NEUROPHARMACOLOGY

Pharmacogenetics of Methyl Conjugation Richard M. Weinshilboum 167
Purification and Molecular Characterization of Neurotransmitter Receptors J. Craig Venter, Barbara Eddy, Jayne S. Schaber, Leslie Lilly, and Claire M. Fraser 183
Developmental and Pharmacological Aspects of Attention Deficit Disorder (ADD)
George M. Anderson, Bennett A. Shaywitz, James F. Leckman, Robert D. Hunt, Sally E. Shaywitz, and Donald J. Cohen 207

III. PULMONARY PHARMACOLOGY
Arachidonic Acid Metabolites and the Pulmonary Circulation of Fetus and Newborn
S. Cassin 227

Controversies in the Pharmacotherapy of Childhood Asthma
Alan F. Isles 251

Surfactant in the Treatment of Respiratory Distress Syndrome
Goran Enhorning 267

IV. ANTI-INFECTIVE THERAPY
Interferon-Induced Biochemical Changes in Cell Membranes: Possible Role of Cellular Enzyme Superoxide Dismutase
Raveendran Pottathil and David J. Lang 275

Antiviral Drugs: Where Do We Stand in 1982?
Paul S. Lietman 299

The Role of Chloramphenicol in Pediatric Therapy
Ralph E. Kauffman 315

Anti-infective Therapy in the Immunosuppressed Patient
Walter T. Hughes 329

V. CLINICAL PHARMACOLOGY
Teratology: Information Useful in Advising Health Personnel and At-Risk Individuals
Thomas H. Shepard 343

Epidemiology of Pediatric Drug Poisoning: The Hospital for Sick Children Experience
M. McGuigan 351

VI. BRIEF COMMUNICATIONS
Changes in Phospholipid Synthesis of the Hepatic Endoplasmic Reticulum During Development
M.S.I. Dhami, F.A. de la Iglesia, and G. Feuer 361

Physiological and Environmental Determinants of Phenytoin Teratogenicity: Relation to Glutathione Homeostasis, and Potentiation by Acetaminophen
Peter G. Wells 367

Competitive Interaction for the Ah Receptor by Polycyclic Aromatic Hydrocarbons Which Do Not Induce Aryl Hydrocarbon Hydroxylase in C3H/10T½ Mouse Embryo Fibroblasts
Malcolm M. Feeley and Michael J. Dufresne 373
Endogenous Growth Hormone and the Regulation of Hepatic Drug Oxidation in the Male Rat
Bruce B. Virgo .......................................................... 379

Effects of β-Naphthoflavone Administration During Midgestation on Ovarian Steroid Metabolism and Fetal Development
Carolyn Fuhrman-Lane, Elsa Ortiz, and Kathleen T. Shiverick ................. 383

Placental Transfer of Calcium (Ca) and Phosphorus (P) in the Guinea Pig: Lack of Correlation With Placental Ca-ATPase and Alkaline Phosphatase (AP) Activities
H.G. McKercher, L.O. Derewlany, and I.C. Radde ............................. 389

Nuclear Drug Metabolism: Its Ontogeny in the Rat and Its Presence in Human Fetal Life
M. Romano, F. Tursi, B.M. Assael, M. Buscaglia, C.A. Dell’Agnola, and M. Salmona ........................................... 395

Genetic Differences in Brain Dopamine Receptors and Amphetamine Response: Possible Model for Hyperkinetic Children
Daiga M. Helmeste and Philip Seeman ........................................... 401

α2 Adrenergic Receptor in Bovine Median Eminence: Influence of GTP and Mg++
Louise Beaulac-Baillargeon and Marjolaine Tremblay .......................... 405

Placental Transfer of Acetylsalicylic Acid (ASA) and Salicylic Acid (SA) in Near-Term Ewes
J.J. Thiessen, F. Coceani, P.M. Olley, and R.B. Salama ....................... 409

Furosemide Biotransformation in a Premature Infant: Urinary Excretion of Furosemide and its Glucuronide Metabolite
Wayne R. Snodgrass, Susan Whitfield, and Avinoam Rachmel .................. 413

Interaction of Digoxin With Verapamil, Indomethacin, and Other Coadministered Drugs: A Comparative Study in Rat Tissue
G. Koren, S. Soldin, and S.M. MacLeod ........................................ 417

Chloramphenicol in the Newborn Infant
P. Rajchgot, C.G. Prober, S. Soldin, C. Golas, F. Good, E. Harding, and S. MacLeod .................................................. 421

Index ................................................................. 427
