Contents

Preface xi

1. Characterization of Stationary Phase and Drug
   I. Introduction 1
   II. The Column, the Support, and the Stationary Phase 4
       References 17

2. Derivatization
   I. Introduction 19
   II. Acids 23
   III. Bases 30
   IV. Phenols and Alcohols 36
   V. Steroids 38
   VI. Miscellaneous Derivatization Techniques 40
   VII. The Effect of Reaction Conditions on Derivatization 42
       References 46

3. The Control of Purity and Stability of Pharmaceuticals
   I. Introduction 49
   II. Control of Purity 49
   III. Drug Stability 56
   IV. Determination of Water Content 59
   V. Measurement of Surface Areas of Powders by Gas Chromatography 60
       References 61
4. Analysis of Excipients, Preservatives, and Related Compounds in Pharmaceutical Preparations

I. The Analysis of Waxes 63
II. Ethanol in Drug Preparations 65
III. Sorbitol and Mannitol 72
IV. Antioxidants and Preservatives 73
References 76

5. The Determination of Therapeutically Active Substances in Pharmaceutical Preparations

I. Anti-Inflammatory and Analgesic Agents 77
II. Antihistamines 79
III. Hypnotics, Sedatives, and Tranquilizers 83
IV. Stimulants 87
V. Steroids and Glycosides 87
VI. Antibiotics and Other Antiinfective Drugs 94
VII. Alkaloids and Other Related Bases 99
VIII. Essential and Other Oils 101
IX. Vitamins 104
X. Local Anesthetics 105
References 107

6. Measurement of Drugs in Body Fluids

I. Choice of Body Fluid 110
II. Extraction of Drugs from Body Fluids 110
III. Developing a Method 120
IV. Use of an Internal Standard 120
V. Anticonvulsants 121
VI. Antihypertensive Drugs 123
VII. Pentylenetetrazol 137
VIII. Terodiline 137
IX. Medroxyprogesterone Acetate 138
X. Phenothiazines 139
XI. Phanquone 140
XII. Itanoxone 141
XIII. Nonsteroidal Anti-Inflammatory Drugs 142
XIV. Antidepressants 145
XV. Quality Control 148
References 153
7. Measurement of Metabolites

I. Tolmetin and Metabolites 158
II. Diethylpropion 159
III. Alclofenac 160
IV. Carbamazepine and Its Epoxide 162
V. Benzodiazepines and Related Drugs 163
VI. Probenecid 168
VII. Chloral Hydrate and Its Metabolites 170
VIII. Metoprolol Metabolites 171
IX. Phenothiazine Metabolites 174
X. Glucuronides 178
XI. Narcotics 181
XII. Local Anesthetics and Their Metabolites 189
References 192

8. Drug Screening

I. Emergency Clinical Screening 195
II. Forensic Screening 202
III. Drugs in Sport 207
IV. Quality Control in Drug Screening 208
References 210

Envoi: Enlightenment by G. Machata 213
Index 215
