Contents

Preface iii

1. Solutions and Solubility 1

   Introduction 2
   Methods of Expressing Concentration and Solubility 3
   Electrolyte Solutions 7
   Determination of Activity Coefficients 16
   The Gibbs-Duhem Equation 35
   Determination of Solubility 36
   Simplex Search for Optimum Solvent Blends 52

2. The Liquid State 61

   The Unexpanded Gas Model 62
   The Quasi-Crystalline Model 68
   Intermolecular Forces 77
   Dielectric Constant 81
   Bulk Properties of Liquids 82
   Water 87
   Assessment of Polarity from Molecular Structure 87
   Supercritical Fluids 87

3. A Qualitative Treatment of Solubility 91

   The Like-Dissolves-Like Classification of Solubilities 91
Balance Between Hydrophilic and Hydrophobic Groups 115
Dielectric Constant 121

4. Ideal Solutions 127
   Ideal Solutions of Liquids in Liquids 128
   Ideal Solutions of Solids in Liquids 130
   Melting Point 140
   "Really" and "Nearly" Ideal Solutions 146

5. Regular Solutions 149
   Solutions of Liquids in Liquids 150
   Energy of Mixing of Regular Solutions 156
   The Two-Dimensional Approach to Regular Solubility 166
   Determination of Solubility Parameters 168
   Determination of Volume Fractions 203
   Determination of Molar Volumes 204
   Effect of Temperature on Solubility Parameters 206
   Internal Pressure 208

6. "Nearly Regular" Solutions 213
   Entropy of Mixing 213
   Extensions of Regular Solution Theory 218

7. Solute-Solute and Solvent-Solvent Associations 235
   Chemical Interpretation 236
   Physical Interpretation 237
   Experimental Methods 239
   Hydrophobic Interaction 247

8. Solute-Solvent Complexation 251
   The Association Process 251
   The Complexation Constant 257
   The Stoichiometric Proportion 257
   Methods of Determining Equilibrium Parameters 258

9. The Distribution Law 279
   Formal Partition Coefficients 280
   Influence of Association and Dissociation on
      Partitioning 287
   The Collander Equation 299
   Linear Free-Energy Relationships 309
   Other Methods of Predicting Partition Coefficients 331
   Measurement of Partition Coefficients 341
Contents

10. Aqueous Solubilities 355
   Aqueous Solubilities of Nonelectrolytes 355
   Effect of Additives on Aqueous Solubilities of Nonelectrolytes 375
   Aqueous Solubilities of Electrolytes 390
   Effect of Additives on Aqueous Solubilities of Electrolytes 395

Index 441
