Design of Enzyme Inhibitors as Drugs

Edited by
Merton Sandler
Professor of Chemical Pathology,
University of London

and

H. John Smith
Senior Lecturer in Medicinal Chemistry,
University of Wales

OXFORD NEW YORK TOKYO
OXFORD UNIVERSITY PRESS
1989
## Contents

1 Introduction to the use of enzyme inhibitors as drugs  
   *Merton Sandler and H. John Smith*  
   
2 General approaches to the design of inhibitors  
   2A Substrate and transition-state analogue inhibitors  
      *Lloyd Frick and Richard Wolfenden*  
   2B Active-site-directed irreversible inhibitors  
      *Elliot Shaw*  
   2C Mechanism-based inhibitors  
      *Keith F. Tipton*  
   2D Potential of molecular graphics in the computer-aided design of inhibitors  
      *A. C. T. North*  
   2E Quantitative structure–activity studies of enzyme inhibition  
      *John C. Dearden*  
   
3 Inhibitors of the renin–angiotensin system enzymes  
   *Edgar H. Ulm and William J. Greenlee*  
   
4 β-lactamase inhibitors  
   *R. F. Pratt*  
   
5 Enkephalinase inhibitors as drugs  
   *Jean-Charles Schwartz*  
   
6 Monoamine oxidase inhibitors  
   *Ian A. McDonald, Philippe Bey, and Michael G. Palfreyman*  
   
7 Polyamine oxidase inhibitors  
   *F. N. Bolkenius and N. Seiler*  
   
8 New developments in enzyme-activated irreversible inhibitors of pyridoxal phosphate-dependent enzymes of therapeutic interest  
   *Michel Jung and Charles Danzin*
9 Cholinesterase and esterase inhibitors and reactivators of organophosphorus-inhibited esterases
Norman Aldridge

10 Inhibitors of enzymes of the arachidonic acid metabolic pathways
Gerry Higgs and John Vane

11 Selective inhibitors of dihydrofolate reductases
G. H. Hitchings, L. F. Kuyper, and D. P. Baccanari

12 The antibacterial sulphonamides
L. O. White and D. S. Reeves

13 Inhibitors of enzymes of the de novo pyrimidine pathway
Thomas W. Kensler and David A. Cooney

14 Inhibitors of purine biosynthesis
J. A. Montgomery and L. L. Bennett, Jr.

15 Steroidal inhibitors of Na\(^+\),K\(^+\)-ATPase
Kurt R. H. Repke, Werner Schönfeld, Jürgen Weiland, Rudolph Megges, and Arnulf Hache

16 Inhibitors of steroid biosynthesis
A. M. H. Brodie

17 Inhibition of enzymes involved in bacterial cell wall synthesis

18 Inhibition of proteinases
18A Proteinases: potential role in health and disease
W. H. Hörl

18B Serpins: engineered re-targeting of plasma proteinase inhibitors
P. M. George and R. W. Carrell
Contents

18C Inhibitors of elastases, chymases, and cathepsin G
   James C. Powers and Morris Zimmerman
   596

18D Inhibitors of trypsin and trypsin-like enzymes
   with a physiological role
   Fritz Markwardt and Jörg Stürzebecher
   619

19 Development of selective inhibitors of calmodulin-
   dependent phosphodiesterase and
   adenylate cyclase
   Benjamin Weiss, Walter C. Prozialeck, and Jill M. Roberts-Lewis
   650

20 Inhibitors of carbonic anhydrase
   Sven Lindskog and Per J. Wistrand
   698

21 Inhibition of intracellular methyl transfer and
   aminopropyl transfer reactions by analogues of
   substrates, products, and transition states
   James K. Coward
   751

22 Inhibitors of some other target enzymes as
   potential clinical agents
   H. J. Smith
      751
   22A Dopamine β-hydroxylase inhibitors
      751
   22B α-amylase inhibitors
      762
   22C Xanthine oxidase inhibitors
      770
   22D 5α-reductase inhibitors
      779
   22E Histidine decarboxylase inhibitors
      791
