Part I. Chemistry and Antioxidant Functions

Vitamin E as an in Vitro and in Vivo Antioxidant. By G. W. Burton and K. U. Ingold ........................................... 7

The Role of the Low Density Lipoprotein Receptor for α-Tocopherol Delivery to Tissues. By W. Cohn and H. Kuhn ...... 61

Relationship of Tocopherol Structure to Biological Activity, Tissue Uptake, and Prostaglandin Biosynthesis. By A. T. Diplock, G.-L. Xu, C.-L. Yeow, and M. Okikiola .................................................. 72

Part II. Biochemistry: Intracellular Transport and Membrane Function

Tocopherol-Binding Proteins of Hepatic Cytosol. By N. Kaplowitz, H. Yoshida, J. Kuhlenkamp, B. Slitsky, I. Ren, and A. Stolz .................................................. 85

*This volume is the result of a conference entitled Vitamin E: Biochemistry and Health Implications, held in New York City on October 31-November 2, 1988, by the New York Academy of Sciences.
α-Tocopherol as Compared with γ-Tocopherol Is Preferentially Secreted in Human Lipoproteins. By M. G. TRABER AND H. J. KAYDEN .......................................................... 95

Tocopherol Stabilizes Membrane against Phospholipase A, Free Fatty Acids, and Lysosphospholipids. By V. E. KAGAN .......................................................... 121

Part III. The Nervous System

Role of Vitamin E in Neural Tissue. By D. P. R. MULLER AND M. A. GOSS-SAMPSON .......................................................... 146

Neuropathies in Adults with or without Fat Malabsorption. By H. J. KAYDEN AND M. G. TRABER .......................................................... 170

Possible Involvement of Free Radicals in Neuroleptic-Induced Movement Disorders: Evidence from Treatment of Tardive Dyskinesia with Vitamin E. By J. L. CADET AND J. B. LOHR .......................................................... 176

The Endogenous Toxin Hypothesis of the Etiology of Parkinson’s Disease and a Pilot Trial of High-Dosage Antioxidants in an Attempt to Slow the Progression of the Illness. By S. FAHN .......................................................... 186

Prophylaxis of Periventricular Hemorrhage in Preterm Babies by Vitamin E Supplementation. By M. CHISWICK, G. GLADMAN, S. SINHA, N. TONER, AND J. DAVIES .......................................................... 197

Discussion. By H. MINTZ-HITTNER .......................................................... 205

Part IV. Ischemia-Reperfusion Injury: Cardiovascular Disease

The Protective Effect of Administered α-Tocopherol against Hepatic Damage Caused by Ischemia-Reperfusion or Endotoxemia. By S. MARUBAYASHI, K. DOHI, K. SUGINO, AND T. KAWASAKI .......................................................... 208

Brain Injury after Ischemia and Trauma: The Role of Vitamin E. By S. YOSHIDA .......................................................... 219

Plasma Vitamins E and A Inversely Correlated to Mortality from Ischemic Heart Disease in Cross-Cultural Epidemiology. By K. F. Gey and P. Puska

Part V. Protection against Environmental Stresses

Effect of Vitamin E Supplementation on Immune Responsiveness of the Aged. By S. N. Meydani, M. Meydani, P. M. Barklund, S. Liu, R. A. Miller, J. G. Cannon, R. Rocklin, and J. B. Blumberg

Nutritional Assessment of Vitamin E in Oxidative Stress. By M. Mino, M. Miki, M. Miyake, and T. Oghara

The Antioxidant Abnormality in the Stress-Susceptible Pig: Effect of Vitamin E Supplementation. By G. G. Duthie and J. R. Arthur

Vitamin E, Immune Response, and Disease Resistance. By R. P. Tengerdy

Pharmacokinetics of Intravenous Vitamin E in Preterm Infants. By S. Abbasi, B. K. Jensen, J. S. Gerdes, V. K. Bhutani, and L. Johnson

Part VI. Age-Related Health Problems

Vitamin E Intake and Risk of Cataracts in Humans. By J. M. Robertson, A. P. Donner, and J. R. Trevithick

Cancer Mortality and Vitamin E Status. By H. B. Stähelin, K. F. Gey, M. Eichholzer, E. Lüdin, and G. Brubacher

Vitamin E: The Status of Current Research and Suggestions for Future Studies. By W. A. Pryor

Part VII. Poster Papers

Dynamic Properties of the Phospholipid Bilayer of the Erythrocyte Membrane in the Presence of α-Tocopherol. By T. Araiso and T. Koyama

The Effect of Vitamin E on the Immunosuppressive Effects of n-6 Polyunsaturated Fatty Acids. By A. Bendich

Vitamin E Deficiency as a Causative Factor in Equine Degenerative Myeloencephalopathy. By L. L. Blythe, A. M. Craig, E. D. Lassen, and B. D. Hultgren

Vitamin E as an Anticarcinogen. By C. Borek

Relationship between Dose of Vitamin E Administered and Blood Level. By M. F. Brin, S. Faahn, S. Loftus, D. McMahon, and E. Flaster

Increased Vitamin E Content in the Lungs of Chronic Cigarette-Smoked Rats. By C. K. Chow, G. R. Airriess, and C. Changchit

Activated Neutrophil-Induced Membrane Damage in Vitamin E-Deficient Erythrocytes. By S. Claster, A. Quintanilha, B. de Lumen, D. Chiu, and B. Lubin

Decrease of Alpha-Tocopherol and Beta-Carotene by High-Dose Radiochemotherapy Preceding Bone Marrow Transplantation. By M. R. Clemens, C. Ladner, H. Schmidt, G. Ehninger, H. Einsele, K. F. Gey, and H. D. Waller

Mobilization of Vitamin E to the Lung under Oxidative Stress. By N. M. Elsayed ................................................................. 439
Retrospective Evaluation of Vitamin E Therapy in Parkinson’s Disease. By S. A. Factor and W. J. Weiner ........................................... 441
Vitamin E in Preterm Infants during the First Year of Life. By M. L. S. Ferlin, F. E. Martinez, S. M. Jorge, A. L. Gonçalves, and I. D. Desai ......................................................... 443
Antioxidant Therapy and Uptake of Human Oxidized LDL by Macrophages. By J. C. Fruchart, J. Sauzieres, V. Clavey, and M. O. Plancke ................................................................. 447
Increased Platelet-Activating Factor (PAF) Synthesis in Polymorphonuclear Leukocytes of Vitamin E-Deficient Rats. By K. Fukuzawa, Y. Kurotori, A. Tokumura, and H. Tsukatani ................................................................. 449
Effects of Dietary Restriction on Weight and Alpha-Tocopherol Concentration of Tissues in Rats. By F. Hirahara ................................................................. 455
Photooxidative Inactivation of Membrane-Bound Enzymes: Pathological Significance of Heme-Related Metabolites. By M. Inoue and Y. Ando ................................................................. 458
Vitamin E and Membrane Abnormalities in Red Cells of Sickle Cell Disease Patients and Newborn Infants. By S. K. Jain .................. 461
Bilateral Stage 3-Plus Retinopathy of Prematurity (ROP): Effect of Treatment (Rx) with High-Dose Vitamin E. By L. H. Johnson, G. E. Quinn, S. Abbasi, M. Delivoria-Papadopoulos, G. Peckham, and F. W. Bowen Jr. ................................................................. 464
Selective Damage to the Cardiac Conduction System in Vitamin E- and Selenium-Deficient Calves. By S. Kennedy and D. A. Rice ................................................................. 467
Vitamin E Modulation of Retrovirus-Induced Immune Dysfunctions and Tumor-Cell Proliferation. By K. Kline, G. S. Cochran, E. R. Huggins, T. J. Morgan, A. Rao, and B. G. Sanders ..................... 470
Synergistic Inhibition of Oxidation in RBC Ghosts by Vitamins C and E. By M. Miki, T. Motoyama, and M. Mino ................................................................. 474
Tissue α-Tocopherol, Thiobarbituric Acid-Reactive Substances (TBA-RS), and Glutathione Levels in Rats Fed Algal Proteins. By G. V. Mitchell, M. Y. Jenkins, and E. Grundel ................................................................. 478
Alpha-Tocopherol in Microsomal Lipid Peroxidation. By M. E. Murphy, H. Scholich, H. Wefers, and H. Sies ................................................................. 480
Tocopherol Concentrations of Leukocytes in Neonates. By T. Ogihara, M. Miyake, N. Kawamura, H. Tamai, M. Kitagawa, and M. Mino ................................................................. 487

Oxygen-Induced Retinopathy in the Rat: Role of Vitamin E in Defending against Peroxidation. By J. S. Penn and L. A. Thum ................................................................. 495

Evaluation of Vitamin E Deficiency in Patients with Adult Respiratory Distress Syndrome. By J. Pincemail, Y. Bertrand, G. Hanique, B. Denis, L. Leenaerts, L. Vankeerberghen, and C. Deby ........................................ 498

Vitamin E Prevents NADPH-Dependent but not NADH-Dependent Chemoluminescence by Isolated Rat Liver Nuclei. By S. Puntarulo and A. I. Cederbaum ............... 503

Biochemical Evidence of Lipoperoxidation in Venous Stasis Ulcer: Beneficial Role of Vitamin E as Antioxidant. By S. S. Ramasastry, M. F. Angel, K. Narayanan, R. A. Basford, and J. W. Futrell ..................................... 506

Vitamin E, Glutathione Peroxidase, and Polyunsaturated Fatty Acid Concentrations of Heart and Liver in Swine with Dietetic Microangiopathy. By D. A. Rice and S. Kennedy ........... 509

Radiolabeling Microsomes in Vitro with Tritiated Alpha-Tocopherol. By S. M. Robey-Bond, R. D. Mavis, and J. N. Finkelstein ................................................................. 511

Alpha-Tocopherol Ingestion from Birth and Its Effects on Serum Androgens in Rats. By S. G. Sundaram, S. Manimekalai, and P. J. Goldstein ........................................... 518

Mode of Action of Vitamin E as Antioxidant in the Membranes as Studied by Spin Labeling. By M. Takahashi, J. Tsuchiya, and E. Niki ......................................................... 521

Membrane-Stabilizing Effect of Vitamin E. By S. Urano and M. Matsuo .............................................................. 524

Effects of α- and γ-Tocopherol (α-T, γ-T) and α-Tocotrienol (α-TT) on the Spontaneous and Induced Prostacyclin (PGI₂) Synthesis from Cultured Human Endothelial Cells (HEC) and Rat Aorta Segments ex Vivo. By B. J. Weimann, H. Steffen, and H. Weiser .......................................................... 530

Competitive Uptake of Deuterium-Labeled α-Tocopherols in Male Rats. By H. A. Zahalka, G. W. Burton, and K. U. Ingold .......................................................... 533

Subject Index .............................................................. 537
Index of Contributors .................................................. 553

Financial assistance was received from:

- BASF CORPORATION, CHEMICALS DIVISION
- EASTMAN CHEMICAL PRODUCTS, INC.
- EISAI COMPANY, LTD.
- HENKEL CORPORATION, FINE CHEMICALS DIVISION
- HOFFMANN-LA ROCHE INC.
