Foreword

J. RUPREHT xxiii

Editors' preface xxiv

The United Kingdom Organising Committee xxv

International Advisers xxv

Retrospect of the symposium

P. J. F. BASKETT xxvi

Problems and sources in the history of anaesthesia

J. BEINART xxviii

PART I SPECIAL PRESENTATIONS

Chapter 1 Presentation during the opening ceremony

1.1 Dr John Snow. His London residences, and the site for a commemorative plaque in London

R. H. ELLIS 1

Chapter 2 British pioneer presentations

2.1 Saved by the Flagg

SIR ROBERT MACINTOSH 8

2.2 The introduction of depolarizing relaxants into clinical practice

C. F. SCURR 9

2.3 Anaesthesia in a teaching hospital sixty years ago

J. A. LEE 12

2.4 Anaesthetic books which influenced me in my early days

W. W. MUSHIN 14

2.5	Luck was a lady T. CECIL GRAY	16
------------	---------------------------------------------------	----

PART II THE EARLY DEVELOPMENT AND ORGANIZATION OF THE SPECIALTY OF ANAESTHESIA

Chapter 3 The origins of anaesthesia

3.1	Anaesthesia in ancient times—fact and fable J. F. NUNN	21
3.2	Mandrake in the history of anaesthesia J. B. BOWES	26
3.3	Hog beans, poppies and mandrake leaves—a test of the efficacy of the mediaeval ‘soporific sponge’ M. INFUSINO, Y. V. O’NEILL and S. CALMES	29
3.4	The mandrake legend J. L. COUPER	34
3.5	Anaesthesia with mandrake in the tradition of discorides and its role in classical antiquity U. von HINTZENSTERN	38
3.6	The role of atropine in antiquity and in anaesthesia M. ADT, P. SCHMUCKER and I. MÜLLER	40
3.7	Anaesthesia 1000 years ago A. A. AL-MAZROOA and R. E. ABDEL-HALIM	46
3.8	Anaesthesia in the history of Islamic medicine M. T. JASSER	48
3.9	Background of scientific law to the discovery of surgical anaesthesia B. R. FINK	52
3.10	Metaphysical conclusions derived from a proposed mode of anaesthetic action S. TIRER	56

Chapter 4 The introduction of modern anaesthesia in the USA and the spread of the good news to the United Kingdom

4.1	The start of modern anaesthesia L. D. VANDAM	64
4.2	Early ether anaesthesia: the news of anaesthesia spreads to the United Kingdom R. H. ELLIS	69
4.3	A quick look at the first London etherists B. M. DUNCUM	76
4.4	The first anaesthetics in St George’s Hospital, London D. D. C. HOWAT	79

Chapter 5 The knowledge spreads through Europe

5.1	The news extends across the European continent J. RUPREHT	82
------------	-------------------------------------------------------------------------------	----

5.2	The first years of anaesthesia in the Netherlands	
	J. RUPREHT	86
5.3	Theodoor Hammes (1874–1951): The first Dutch professional anaesthetist	
	J. J. de LANGE	89
5.4	The development of regional anaesthesia in the Netherlands	
	J. W. van KLEEF	92
5.5	Anaesthesia in the Netherlands from the thirties to 1948	
	M. MAUVE	95
5.6	The history of pain control in dentistry in the Netherlands	
	D. M. E. VERMEULEN-CRANCH	97
5.7	The development of anaesthesia in Malta	
	N. AZZOPARDI	101
5.8	The development of anaesthesia and intensive therapy in Poland	
	M. KUŚ, M. SYCH, W. JURCZCK and Z. RONDIO	105
5.9	The history of anaesthesia in Jordan	
	M. S. M. TAKROURI	107
5.10	The early use of ether anaesthesia in Ljubljana, Yugoslavia	
	S. DOBAN	109
 Chapter 6 Early anaesthesia in North America		
6.1	The origins of anaesthesia in Canada 1846–1848	
	J. R. MALTBY	112
6.2	The earliest ether anaesthetic in British North America—a first for St John, New Brunswick?	
	J. A. MacDOUGALL	119
6.3	Anaesthesia in Quebec—the first twelve months	
	A. J. C. HOLLAND	126
6.4	Anaesthesia in early California	
	S. H. CALMES	129
6.5	To keep Ether Dome a show place	
	M. TVERSKOY	133
 Chapter 7 How the news of anaesthesia came to the Antipodes		
7.1	The news spreads along the trade routes of the British Empire	
	G. WILSON	134
7.2	How the news of anaesthesia reached South Africa	
	J. L. COUPER	147
7.3	Putting the record straight—the first ether administration in South Africa	
	J. L. COUPER	149
7.4	The history of anaesthesia in Hong Kong	
	Z. LETT	153
 Chapter 8 The organization of the specialty of anaesthesia		
8.1	The Association of Anaesthetists of Great Britain and Ireland	
	T. B. BOULTON	159

8.2	Faculty of Anaesthetists, Royal College of Surgeons of England R. S. ATKINSON	162
8.3	A short history of the Canadian Anaesthetists' Society G. M. WYANT and R. A. GORDON	164
8.4	Attempts to establish anaesthesiology as a specialty in German medicine W. SCHWARZ	170
8.5	Was this certificate the first certificate in anaesthesia? A. B. BAKER	176
8.6	A pictorial progress of Canadian anaesthesia 1954–1986 J. R. MALTBY	178
8.7	The continuing teaching in modern anaesthesia S. KURIMOTO	184
8.8	Anaesthetic literature of 1887 C. N. ADAMS	186
Chapter 9 Military anaesthesia and the transport of casualties		
9.1	Anaesthetics in British military practice (1914–1918) J. RESTALL	192
9.2	Flying intensive care C. A. B. McLAREN	195
PART III THE HISTORY OF ANAESTHETIC AGENTS		
Chapter 10 Inhalational agents		
10.1	The origins of the first gaseous agents W. D. A. SMITH	199
10.2	Volatile agents and vaporizers I. McLELLAN	205
10.3	Faith against science: the Ethanesal mystery D. ZUCK	207
10.4	The first use of di-vinyl ether as an anaesthetic agent in humans R. M. HUMBLE	214
10.5	Cyclopropane and the development of controlled ventilation R. BODMAN	216
10.6	Introduction of halothane to the USA C. R. STEPHEN and L. W. FABIAN	221
10.7	The historical misuse of anaesthetic and related agents A. M. BETCHER	223
Chapter 11 Chloroform		
11.1	The first² human chloroformization R. W. PATTERSON	230
11.2	Chloroform and controversy A. I. HYMAN	233
11.3	Edward Lawrie and the Hyderabad Chloroform Commissions A. RAMACHARI and ABHAY PATWARI	236

11.4 Chloroform for children and the development of paediatric anaesthesia in Poland	
Z. RONDIO	240
11.5 Chloroform to a Royal family	
O. SECHER	242
Chapter 12 Neuromuscular blocking agents	
12.1 Development of skeletal muscle relaxants from the curare arrow poisons	
R. HUGHES	259
12.2 The rapid onset and short duration of the history of Fazadinium	
C. E. BLOGG and M. B. TYERS	268
Chapter 13 Miscellaneous	
13.1 Cocaine intoxication	
J. E. STEINHAUS	278
13.2 The history of morphine analysis	
K. QUINN and G. R. PARK	283
13.3 The origins of intravenous anaesthesia	
T. M. SAVEGE	286
<i>(Published by title only)</i>	
PART IV THE HISTORY OF ANAESTHETIC APPARATUS	
Chapter 14 Anaesthetic machines	
14.1 The Zaaier nitrous oxide anaesthetic apparatus	
M. van WIJHE and H. BEAKERS	287
14.2 Self administered inhalational analgesia in obstetrics	
T. A. THOMAS	295
14.3 The House of Drager	
P. W. THOMPSON	298
Chapter 15 Breathing systems	
15.1 The development and function of anaesthesia breathing systems	
L. RENDELL-BAKER	301
15.2 The 'D-M' gas anaesthesia machine	
R. WESTHORPE	319
Chapter 16	
16.1 A chloroform inhaler dated 1888	
J. D. P. WOLFF	322
16.2 Ether apparatus with an Australian flavour	
C. BALL	323
16.3 The chloroform inhalers in the Geoffrey Kaye Museum	
R. WESTHORPE	325
16.4 The performance of some early vaporizers	
P. JONES	327
<i>(Abstract only)</i>	

Chapter 17 The use of masks and tracheal tubes in anaesthesia

- 17.1 The design of experimental latex paediatric face masks in 1961**
D. H. SOUCEK and L. RENDELL-BAKER 328
- 17.2 Intubation in anaesthesia**
R. K. CALVERLEY 333

PART V THE HISTORY OF RESUSCITATION AND INTENSIVE CARE

Chapter 18 Resuscitation through the ages

- 18.1 Anaesthesia, pain relief and resuscitation in Biblical and Talmudic literature**
L. KAUFMAN 343
- 18.2 The miracles of King Henry VI**
P. W. THOMPSON 346
- 18.3 Development of resuscitation in the United Kingdom**
D. J. WILKINSON 348
- 18.4 Origins of resuscitation in the USA**
G. HUSTON 352
- 18.5 Exhortations to resuscitate in the 18th century. Civic duties in verse and prose**
T. F. DAGI 359
- 18.6 The history of clinical thermometry**
L. G. ALLAN 368

Chapter 19 Early attempts at expired air resuscitation, intubation and manual ventilation

- 19.1 The early days of expired air resuscitation**
A. B. BAKER 372
- 19.2 The first instrument for resuscitation**
L. BRANDT, D. DUDA and M. EL GINDI 375
- 19.3 The development of organized emergency medicine in the 18th century**
L. BRANDT, M. EL GINDI, D. DUDA and S. ELLMAUER 382

Chapter 20 Artificial ventilation

- 20.1 George Edward Fell and the development of respiratory machines**
M. GOERIG, K. FILOS and K. W. AYISI 386
- 20.2 The development of apparatus for intermittent negative pressure ventilation**
C. H. M. WOOLLAM 393
- 20.3 The development of positive pressure ventilators**
L. RENDELL-BAKER and J. L. PETTIS 402
- 20.4 The polio epidemic in Copenhagen in 1952**
O. SECHER 425

Chapter 21 Transfusion

- 21.1 The origins of today's stored blood transfusion practice**
H. REINHOLD and C. BERNARD-DICKSTEIN 433
- 21.2 The history of the permanent intravenous cannula**
T. GORDH 441

Chapter 22 Pulmonary and cardiac surgery and resuscitation

- 22.1 Memories of thoracic anaesthesia before the Second World War**
R. MANSFIELD 443
- 22.2 The first successful pulmonary embolectomy in Britain**
B. OWEN 447
- 22.3 The origins and evolvement of cardiopulmonary resuscitation**
J. R. JUDE 452
- 22.4 The history of defibrillation**
D. DUDA, L. BRANDT and M. EL GINDI 464
- 22.5 An essay on the history of extracorporeal circulation in Germany**
M. EL GINDI, L. BRANDT and D. DUDA 468
- 22.6 The introduction of cardiac anaesthesia to an Australian children's hospital**
R. J. BAILEY 472
- 22.7 The history of oximetry**
J. SEVERINGHAUS 475
(Abstract only)

PART VI BIOGRAPHY**Chapter 23 Before 1846. The pathfinders**

- 23.1 Thomas Beddoes (1760–1808) tuberculosis, and the Medical Pneumatic Institute**
N. A. BERGMAN 477
- 23.2 William Allen (1770–1843). The Spitalfields genius**
P. COE 481
- 23.3 The contribution of Sir Humphry Davy (1778–1829) to inhalational anaesthesia**
D. P. COATES 485
- 23.4 A nitrous anaesthetic declined: Sir Humphry Davy, PRS (1778–1829) portrayed by Sir Thomas Lawrence, PRA (1769–1830)**
G. S. BAUSE 488

Chapter 24 1842–1880. The pioneers

- 24.1 Finding the real Crawford Long (1815–1878). The discovery of an historical photograph**
M. S. ALBIN, J. RAY and S. SMITH 495
- 24.2 John Snow (1813–1858) and his book 'On the Inhalation of the Vapour of Ether in Surgical Operations'**
A. MATSUKI 498
- 24.3 Some interesting patients of John Snow (1813–1858)**
R. S. ATKINSON 500

24.4	J. F. Heyfelder (1798–1869). A pioneer of German anaesthesia U. von HINTZENSTERN	502
24.5	John Tomes (1815–1895) anaesthetist 1847 O. P. DINNICK.	505
24.6	Dr E. D. Worthington (1820–1895). A pioneer Quebec anaesthetist A. J. C. HOLLAND	510
24.7	T. W. Evans (1823–1897) and J. T. Clover (1825–1882) and their common patient O. SECHER	513
24.8	Little known Liverpool contributions (1761–1862) T. C. GRAY	518

Chapter 25 After 1880. The developers

25.1	The contribution of the pioneers in neurosurgery to the development of neuroanaesthesia. Macewen (1847–1924), Horsley (1857– 1916), Krause (1857–1937) and Cushing (1869–1939) E. A. M. FROST	522
25.2	Sir Victor Horsley (1857–1916) and anaesthesia I. D. CONACHER	528
25.3	Harvey Cushing (1869–1939) and his mysterious paper on intracranial hypertension M. S. ALBIN	533
25.4	Amussat (1796–1856) and Senn (1844–1908) the holy duo of venous air embolism M. S. ALBIN and D. ROBINSON	539
25.5	Heinrich Braun (1862–1934): A German pioneer in anaesthesia W. RÖSE	543
25.6	The women physician anaesthetists of San Francisco, 1897–1940: The legacy of Dr Mary E. Botsford (1865–1939) S. H. CALMES	547
25.7	Georg Perthes (1869–1927): A pioneer of local anaesthesia by blocking peripheral nerves with the use of electrical stimulation M. GOERIG, K. FILOS and H. BECK	551
25.8	Dr Mark Lidwell (1873–1968) and his anaesthetic machine C. BALL	558
25.9	Sir Francis Shipway (1875–1968). Anaesthetist by Royal appoint- ment P. A. COE	559
25.10	Dennis Emerson Jackson (1875–1968) J. B. STETSON	564
25.11	D. E. Jackson (1878–1980): A perspective of a centenarian L. E. MORRIS	571
25.12	Matthew Kasner Moss (1879–1945) R. WESTHORPE	574
25.13	A perspective: E. I. McKesson (1881–1935) L. E. MORRIS	575

25.14	Ralph M. Waters (1883–1979). To teach doctors—a scientific basis for practice of anaesthesia L. E. MORRIS	579
25.15	'My Dear Dogfish'. A correspondence between Ralph M. Waters (1887–1974) and Geoffrey Kaye (1903–1986) G. WILSON and L. MORRIS	580
25.16	The contribution of two Brazilian physiologists to the introduction of carbon dioxide absorption into clinical anaesthesia. An acknowledgment by Ralph M. Waters (1883–1979) C. PARSLOE	590
25.17	Arno Benedict Luckhardt (1885–1957) and the introduction of ethylene J. B. STETSON	595
25.18	The life and work of Sir Ivan Magill, KVCO (1888–1986) K. G. LEE	601
25.19	Sir Ivan Magill (1888–1986) and tracheal intubation W. K. PALLISTER	605
25.20	Philip Dudley Woodbridge (1895–1978). A Renaissance man J. B. STETSON	609
25.21	The contribution of Harold Randall Griffith (1896–1985) to anaesthesia D. M. M. GILLIES	614

PART VII SPECIAL PRESENTATIONS, 2.

Chapter 26 Posters

26.1	The history of the Faculty of Anaesthetists of the Royal College of Surgeons of England A. K. ADAMS and R. S. ATKINSON	619
26.2	Memorabilia of Sir Ivan Magill, KVCO D. J. WILKINSON and A. ECCLES	619
26.3	Finding the real Crawford Long. Discovery of an historical photograph M. A. ALBIN	619
26.4	To keep the Ether Dome a show place M. TVERSKOY	619
26.5	John Snow's Monograph 'On the Inhalation of the Vapour of Ether' A. MATSUKI	619
26.6	To teach doctors—a scientific basis for the practice of anaesthesia L. E. MORRIS	619
26.7	Classic papers from the <i>British Journal of Anaesthesia</i> P. A. COE and A. P. ADAMS	619
26.8	Whose were these? P. FROST	619

Chapter 27 Video and film presentation

27.1	Video recordings of eminent anaesthetists The WOOD LIBRARY OF THE AMERICAN SOCIETY OF ANAESTHESIOLOGISTS	620
------	------------------------------------------------------------------------------------------------------------------------------	-----

27.2	Historic films on anaesthesia	
	H. ESSEX-LOPRESTI	620
27.3	Historic films from the ICI Archives	
	IMPERIAL CHEMICAL INDUSTRIES LIMITED	620
	List of registrants	621
	Index	631
