1990

EXCERPTA MEDICA, Amsterdam – New York – Oxford
Contents

Monday 9 July, 1990

Symposium S.1 Analgesia and reward; behavioral studies

S.1.1
Endorphins and pain related mechanisms
L. Terenius

S.1.2
Neuroendocrine and behavioural effects of POMC peptides
J. Herbert and A. McGregor

S.1.3
Endorphins and reward processes
J.M. van Ree

S.1.4
Differential mechanisms mediating β-endorphin- and morphine-induced antinociception in mice
L.F. Tseng and H.H. Suh

S.1.5
Age-related changes in the POMC stress axis in the rat
M. Ines-Morano and H. Akil

S.1.6
Neuroanatomical substrates mediating the motivational effects of opioids
R. Bals-Kubik, T.S. Shippenberg and A. Herz

S.1.7
Effects of β-endorphin on local cerebral glucose utilization
A. Ableitner and R. Schulz

S.1.8
Effect of exercise and anabolic steroid treatment on mu-opioid receptor binding in rat brain
I. Kitchen, S.L. Hart, S.C. Friend and M. Kelly
Poster session P.1

Endogenous factors in analgesia and mechanisms of opioid analgesics

P.1.01
A study on swim-induced antinociception in female mice
C.-L. Wong

P.1.02
Comparison of the effects of naltrindole on swim stress- and electroconvulsive shock-induced antinociception in the rat
H.C. Jackson and D.J. Nutt

P.1.03
Blockade by footshock- and psychological-stress of the development of spinal tolerance to morphine
M. Takahashi, T. Senda, S. Tokuyama and H. Kaneto

P.1.04
Acute imipramine increases the analgesic responses to particular types of stress in mice
L. Menendez, A.I. Baamonde, F. Andres-Trelles and A. Hidalgo

P.1.05
Enkephalin production in tooth pulp cells by cathepsin B
T. Kudo, E.-Q. Wei, B.-F. Zhu and R. Inoki

P.1.06
Effect of intrathecal injection of midazolam on morphine induced antinociception in the rat
G.A. Tejwani, A.K. Rattan and J.S. McDonald

P.1.07
Differential effects of dexamethasone on opioid receptor-mediated analgesia and selective binding
K.M. Standifer, D. Paul, D. Howard, J. Levison and G.W. Pasternak

P.1.08
Plasma assays of beta endorphin and cortisol in patients with cancer under morphine treatment
B. Roquefeuil, N. Bressot, P. Colson, I. Couret, D. Kong A Siou and P. Ginies

P.1.09
Comparative actions of β-endorphin-like peptides in spinal antinociception tests
K. Jhamandas and M. Hong
Cross-regulation between the α2-adrenoceptor and the mu opioid receptor-type in the induction of supraspinal analgesia in mice

P. Sánchez-Blázquez and J. Garzón

Effect of pertussis toxin on opioid and non-opioid induced analgesia

D. Parolaro, G. Patrini, P. Massi, T. Rubino, G. Giagnoni and E. Gori

Effects of opioids on potassium channel blocker-induced behavior

M. Narita, Y. Takahashi, T. Suzuki, M. Misawa and H. Nagase

Effect of morphine on pain induced activity of adenocinetriphosphatase

A.P. Singh and P.P. Singh

Effect of morphine on the release of serotonin (5-HT) from rat spinal cord: An in vivo microdialysis study

F. Fatima Matos, H. Rollema and A.I. Basbaum

Monoaminergic involvement in the analgesic action of E-2078, morphine and U-50,488E in neurotoxin-treated mice

T. Nakazawa, Y. Yamanishi, T. Kaneko and K. Yamatsu

Opioid control of CGRP release from the rat spinal cord

M. Pohl, S. Bourgoin, E. Collin, J.J. Benoliel, A. Mauborgne, M. Hamon and F. Cesselin

Opioid control of Met-enkephalin release from the rat spinal cord

J.-J. Benoliel, E. Collin, S. Bourgoin, A. Mauborgne, M. Hamon and F. Cesselin

An autoradiographic investigation of the distribution of [3H]DAGO and [3H]DPDPE in the spinal cord of sheep and sheep experiencing chronic pain

S.A. Brandt and A. Livingston

Analgesic effects of low-dose intrathecal naloxone in sheep

A. Kyles, A. Waterman and A. Livingston
P.1.20 
Potent, long-lasting antinociceptive effects after injection of low doses of the mu opioid receptor agonist, fentanyl, into the brachial plexus sheath of the rat 
V. Kayser, D. Gobeaux, M.C. Lombard, G. Guilbaud and J.M. Besson

P.1.21 
Dissociation of kappa₁ and kappa₃ analgesia: Pharmacological characterization of naloxone benzoylhydrazine 
D. Paul, C.G. Pick and G.W. Pasternak

P.1.22 
Partial agonist effects of ethylketocyclazocine at supraspinal mu₁ receptors 
L.A. Tive, D. Paul, L. Liu and G.W. Pasternak

P.1.23 
Relative spinal and supraspinal potencies of mu and kappa opioids in reducing spinal nociceptive reflexes 
J.F. Herrero and P. Max Headley

P.1.24 
Two unexpected effects of intravenous mu and kappa agonists on different types of neurones in the spinal dorsal horn 
P. Max Headley and X.-W. Donc

P.1.25 
Can sprouting explain the modifications of mu and delta opioid receptors density in the adult rat superficial dorsal horn after various delays following dorsal rhizotomies? 
D. Besse, M.-C. Lombard and J.-M. Besson

P.1.26 
Opiate receptors involved in descending antinociceptive action from the nucleus raphe magnus (NRM) of the rat 
D.J. Smith, S. Krige, M.O. Urban and B. Robertson

P.1.27 
Effects of intracerebroventricular β-funaltrexamine treatment on opioid receptors: Binding and behavioral studies 
L.-Y. Liu-Chen, S. Li, H. Wheeler-Aceto and A. Cowan

P.1.28 
Low efficacy antinociceptive actions of enkephalinase inhibitors against tonic pain in rats: Effects of naltrindole, ICI 174864 and naloxone 
A. Cowan, R.E. Chipkin and H. Wheeler-Aceto
In vitro and in vivo characterization of a fentanyl-related compound with opioid agonist and antagonist effects

Synthesis and antinociceptive activity of two cyclopropyl-ethyl-normorphine compounds
A. Rezvani, J. Lawson and W. Sadée

The influence of synthetic modifications in ring C of morphine on opioid activity and receptor sensitivity
S. Fürst, T. Friedmann and S. Hosztafi

Structure activity relationship of Met-enkephalin isopropylamides: new opioid peptides of pharmacological interest
R. Raghbir, C.U. Patnaik, K.B. Mathur and B.N. Dhawan

Pharmacological characteristic of a new non-opiate analgesic peptide margartensin
W. Shi-Xiang, T. Yi-Quan, Sheng-Hhai, H. Jia-Cheng and T. Kang

Studies on the relationship between pharmacokinetics and pharmacodynamics of morphine in the rat
H.N. Bhargava, V.M. Villar and A. Gulati

nor-Binaltorphimine (nor-BNI); a potent and selective kappa-opioid receptor antagonist with ultra-long-lasting activity in vivo
T. Endoh, H. Koike, H. Matsuura and H. Nagase

Analgesic properties of systematically active mixed enkephalin-degrading enzyme inhibitors
F. Noble, P. Coric, J.-M. Soleilhac, S. Turcaud, V. Daugé, M.-C. Fournié-Zaluski and B.P. Roques

Dramatic increase of fentanyl analgesia and anesthesia by verapamil and clonidine in rats
M. Szikszay, G. Horváth and G. Benedek
Symposium S.2  Regulation of opioid systems in relation to pain and tolerance

S.2.1  Burn injury of the hind limb activates endogenous opioid systems in rats  
B. Przewlocka, W. Lasoh, H. Machelska, D. Carr, S. Szyfelbein and R. Przewlocki  

S.2.2  Sustained expression and colocalization of proenkephalin and prodynorphin opioids and c-fos protein in dorsal horn neurons revealed in arthritic rats  

S.2.3  The analgesic action of fentanyl on the mechanical threshold response in sheep in chronic pain with lameness caused by footrot  
S. Ley, A. Waterman and A. Livingston  

S.2.4  Antagonism of morphine antinociception by intrathecally administered corticotropin-releasing factor in mice  
Z.H. Song and A.E. Takemori  

S.2.5  αN-acetyl β-endorphin_{1-31} is a potent regulator of supraspinal opioid analgesia in mice  
J. Garzón and P. Sánchez-Blázquez  

S.2.6  Morphone-induced downregulation of mu opioid receptors and peptide synthesis in neonatal rat brain  
A. Tempel  

S.2.7  Morphine blocks the peptide-selective opioid binding change without blocking receptor downregulation  
M. von Zastrow and C.J. Evans  

S.2.8  Autoradiographic evidence for down regulation of mu- and delta-opioid receptor after chronic D-Ala, D-Leu⁵-enkephalin treatment in rats  
P.-L. Tao, C.W. Stevens, V.S. Seybold and H.H. Loh
S.2.9
Regulation of G-proteins by chronic opiate and clonidine treatment in the guinea pig myenteric plexus
H. Ammer, L. Nice and R. Schulz

Symposium S.3 Modulation in opioidergic cells

S.3.1
Cell specificity and glucocorticoid repression of POMC gene transcription
J. Drouin, M. Therrien, Y.L. Sun, A. Mullick and M. Nemer

S.3.2
Post-translational processing of precursor molecules
D.G. Smyth

S.3.3
Release and metabolism of enkephalins
J.-C. Schwartz

S.3.4
Regulation of proEnkephalin a gene in brain cell cultures: Effect of depolarization, opiate agonists and antagonists and various stimulants
R. Simantov and V. Höllt

S.3.5
Expression and processing of POMC in a neuronal cell line
N.C. Day, J.H. Meador-Woodruff and H. Akil

S.3.6
A negative regulatory element in the upstream promoter region of the human proopiomelanocortin gene
J. Kraus and V. Höllt

S.3.7
Ethanol regulation of proopiomelanocortin biosynthesis in the rat hypothalamus
P. Angelogianni and C. Gianoulakis

Postersession P.2 Behavioral studies

P.2.01
DAMGO blocks the acquisition of conditioned responses in the rabbit
V.J. Aloyo, A.G. Romano and J.A. Harvey

P.2.02
Discriminative stimulus effects of delta-receptor-selective ligands in pigeons and monkeys
S.D. Comer, C.P. France, B. DeCosta, K.C. Rice and J.H. Woods
P.2.03
Opioid peptides and alcohol drinking in rhesus monkeys
M. Kornet, C. Goosen and J.M. Van Ree

P.2.04
Prenatal exposure to morphine enhances acquisition of cocaine self-administration in adult rats
N. Ramsey and J.M. van Ree

P.2.05
Naloxone, but not methylnaloxone, suppresses neuropeptide-induced excessive grooming/scratching in rats
Tj.B. van Wimersma-Greidanus, C. Maigret and H. Merz

P.2.06
Reinforcing property of morphine in the CXBK mouse: characteristics of mu opioid receptor subtypes
M. Funada, M. Narita, Y. Hayashi, T. Suzuki, M. Misawa and H. Nagase

P.2.07
Potentiation of pentazocine conditioned place preference by tripelennamine in rats
T. Suzuki, Y. Masukawa and M. Misawa

P.2.08
Lack of conditioned taste aversion in etonitazene or haloperidol treated rats
M. Sala, D. Braida, P. Calcaterra, M. Primula Leone and E. Gori

Receptor regulation/tolerance/dependence

P.2.09
Evidence for human placental kappa opiate receptor down regulation due to methadone use during pregnancy

P.2.10
The cardiovascular response to clonidine before and after opiate detoxification
N. Loimer, K. Lenz, R. Schmid and A. Kranz

P.2.11
Successful treatment of opiate withdrawal using methohexitone and naloxone
L. Linzmayer, N. Loimer and R. Schmid

P.2.12
Protracted opiate tolerance produced by naloxone in mice treated with a single dose of morphine
M. Sofuoglu and A.E. Takemori
P.2.13
The behavioural effects of mu, kappa and sigma antagonists in guinea pigs treated with the mu agonist morphine, the kappa agonist U50,488H or the sigma agonists (+) or (−) SKF 10,047
P.J. Brent, L.A. Chahl and P.A. Johnston

P.2.14
Masking morphine taste by cyclodextrin: A new feeding technique for morphinising rats
R. Schmid, N. Loimer, R. Kupferschmidt and L. Linzmayer

P.2.15
Fractions of brain extract, from morphine tolerant rats, show opiate antagonist activity in vitro and in vivo
G. Giagnoni, L. Basilico, D. Parolaro and E. Gori

P.2.16
Chronic exposure to opioid agonists and an antagonist affects prodynorphin gene expression
P. Romualdi, G. Lesa and S. Ferri

P.2.17
The alpha2 adrenergic agonist clonidine prevents the development of tolerance to morphine analgesia in mice
O. Bourbiaux-Mercier and J.-M. Zajac

P.2.18
Effects of chronic exposure to full and partial mu-opioid agonists on cAMP content, and on acute stimulation of low-Km GTPase and inhibition of adenylate cyclase in neural cells
B.D. Carter and F. Medzihradsky

P.2.19
Downregulation of mu opiate receptors by morphine and presence of Tyr-MIF-1 binding sites in SH-SY5Y human neuroblastoma cells
J.E. Zadina, S.L. Chang, L.-J. Ge, A.J. Kastin and R.E. Harlan

P.2.20
125I-β-Endorphin autoradiography of opioid and non-opioid binding sites in tissue culture
R.I. Cone, J. Lameh and W. Sadée

P.2.21
Transient homologous mu-opioid receptor desensitization in rat locus coeruleus
G.C. Harris and J.T. Williams
The decrease in the number of delta-opioid receptors in neonatal rat brain by the s.c. administration of [D-Ala²,D-Leu⁵]-enkephalin (DADLE)
X.-F. Liu, K. Iwao, N. Ohgiya and T. Oka

A state of the delta opioid receptor that is 'blind' to opioid peptides yet retains high affinity for the opiate alkaloids
C.J. Evans and M. von Zastrow

Effect of up-regulation on the delta opioid binding characteristics of subcellular fractions from NG108-15 and NCB-20 cell cultures

Guanine nucleotide inhibition of DAMGO binding in the mouse brain, as modified by substance P and its fragments
S.A. Krumins, D.C. Kim, O.J. Igwe and A.A. Larson

Approaches to molecular identification of opioid receptor

Differential effects of cyanogen bromide on ligand binding by mu, delta and kappa opioid receptors
J.M. Hiller, L.-Q. Fan and E.J. Simon

Studies using antibodies generated against peptide sequences from opioid binding protein and antibodies against rhodopsin

Affinity labelling the mu-opioid receptor in brain
J.M. Bidlack, R.A. Kaplan, A. Seyed-Mozaffari and S. Archer

Affinity labeling of opioid receptors with enkephalin analogues
A. Borsodi, H.A. Oktem, S. Benyhe, E. Varga, J. Moitra and J. Takacs

Purification of a 58 kDa protein from rat brain membranes which binds selectively delta opioid agonists
S. Loukas, F. Panetsos, M. Merkouris and C. Zioudrou
xvi

P.2.31 175
Characterisation of opioid binding protein using antipeptide
S. Roy, Y.X. Zhu, B. Norris, H.H. Loh and N.M. Lee

P.2.32 175
Immunocytochemical demonstration of opioid binding proteins in NG108-15 cells
C. Lane, T.C. Brelje, R. Elde, H.H. Loh and N.M. Lee

P.2.33 176
Control elements regulating the expression of a protein related to opioid receptor binding
D. Lippman, D. Ann, N.M. Lee and H.H. Loh

P.2.34 176
Molecular characterization of a cDNA regulated by delta opioid treatment of NG108-15 cells

P.2.35 177
Molecular identification of a 60 kDa binding site for non-opioid gamma-type endorphins in rat brain membranes
E. Ronken, J.A.D.M. Tonnaer and V.M. Wiegant

Wednesday 11 July, 1990

Symposium S.4  Dysfunction of opioid systems

S.4.1 181
Naltrexone therapy of autistic children
J. Panksepp and P. Lensing

S.4.2 183
Opioid peptides and epilepsy: Are they endogenous anticonvulsants?
F.C. Tortella

S.4.3 184
β-Endorphin and consummatory behaviors: The case of hyperphagic obesity
A.R. Genazzani, C. Giovannini, M. Negri and F. Facchinetti

S.4.4 186
Neuronal and behaviour excitability studied by enkephalinase inhibitors: Are enkephalins endogenous analeptics?
M. Dzoljic
S.4.5
Neuroprotective effects of a highly potent and selective agonist for the kappa opioid receptor

S.4.6
Sigma and opioid receptors in human cancers

S.4.7
Radioautographic distribution of mu, delta and kappa opioid receptors in the human infant brainstem

S.4.8
The effect of mu1 blockade on ventilatory dynamics in the fetus
P.Y. Cheng and H.H. Szeto

Poster session P.3
Opioid receptor binding studies/novel ligands

P.3.01
Kinetic model for estimating in vivo specific binding of exogenous opioids
M.J. Holland

P.3.02
Sensitivity of opioid antagonist binding to sodium ions and guanine nucleotides
J. Traynor and A. Lawrence

P.3.03
Alterations in the expression of brain opioid receptors during senescence
E.M. Unterwald and M.J. Kreek

P.3.04
Characterization and distribution of receptor-sites to FLFQPQRFamide, a mammalian FMRFamide-like peptide in the rat central nervous system
M. Allard, J.M. Zajac, J.P. Devillers and G. Simonnet

P.3.05
Suppression by cholecystokinin octapeptide (CCK-8) of the binding of mu- and kappa- but not delta-opioid receptors in rat spinal cord
X.-J. Wang and J.-S. Han

P.3.06
Kappa-agonist-like properties of 3H-naloxone binding in guinea pig cerebellum
Y. Murakoshi, K. Ishige, M. Makimura and Y. Ito
P.3.07  
Comparison of the binding of $[^{3}H]$-U-69593 and $[^{3}H]$-diprenorphine in homogenates of rabbit brain  
S.J. Paterson and D.P. Watts

P.3.08  
Evidence for kappa opioid receptor multiplicity  
K. Kinouchi and G.W. Pasternak

P.3.09  
Binding characteristics of $[^{3}H]$U-69593 to opioid receptors in frog brain membranes  
S. Benyhe, M. Szücs, A. Borsodi and M. Wollemann

P.3.10  
BRL 52537: A novel, highly potent kappa opioid receptor ligand  
M. Sbacchi and G.D. Clarke

P.3.11  
New classes of kappa opioid receptor agonist: Spirocyclic 2-alkylaminomethylpiperidines and 4-alkylaminomethylfuro[3,2-C]pyridines  

P.3.12  
Pharmacology of a novel, highly potent and selective agonist for the kappa opioid receptor  

P.3.13  
Structure-activity studies in a series of benzeneacetamido-piperazine analogues: A potent new class of kappa-receptor agonist  

P.3.14  
Solid phase synthetic strategies for the preparation of affinity labels derived from dynorphin A  
J.V. Aldrich and S.C. Story

P.3.15  
$[^{125}I]$Deltorphin-I: A new tool for the identification of delta-opioid receptors  
S. Dupin, H. Mazarguil, M. Tafani and J.-M. Zajac

P.3.16  
Highly selective nonpeptide delta-opioid receptor agonists related to naltrindole  
Potency, affinity and efficacy of currently available delta opioid agonists
T.H. Kramer, K.D. Wild, G. Toth, P. Davis, V.J. Hruby, T.F. Burks and F. Porreca

N,N-Diallyl-Tyr-D-Leu-Gly-Tyr-Leu-OH specifically antagonizes in vivo the excitation induced on CA1 hippocampal field potentials by delta-opioid agonists
E. Angelopoulos, E. Koutsoukos, A. Maillis, A. Andreou, C. Stefanis, S. Loukas and C. Zioudrou

In vitro binding profile of cyprodyme, a reported mu-opioid antagonist
G. Porini, P. Petrillo, M. Colombo and A. Tavani

A novel cyprodime analogue: 6-deoxocyprodime
H. Schmidhammer, H.K. Jennewein and C.F.C. Smith

Functional studies; neuromodulation/ontogeny/signal transduction

Prodynorphin mRNA regulation by GABA_A receptor in the mouse striatum
C. Jomary, J.-C. Schwartz and C. Llorens-Cortes

Microdialysis as a tool for studying the regulation of opioid peptide release in the rat basal ganglia in vivo
N.T. Maidment, B.J. Siddall, V.D. Rudolph, E. Erdelyi and C.J. Evans

Changes in striatal enkephalin release following stimulation of dopaminergic or histaminergic receptors
C. Llorens-Cortes, S. Zini, M. Garbarg and J.-C. Schwartz

Morphine causes release of substance P-like immunoreactivity from guinea pig brain
L.A. Chahl

Cataleptic effect of ohmefentanyl (OMF) in the rat
C. Zhiqiang, X. Heng and Y. Yihe

Nigral output pathways for kappa opiate-induced circling
L.A. Thompson and J.M. Walker
Ultrastructural evidence for interactions between opioid and dopaminergic neurons in the rat mesolimbic system
S.R. Sesack and V.M. Pickel

Enhancement of presynaptic dopamine efflux in brain by delta⁹-tetrahydrocannabinoil is mediated by an endogenous opioid mechanism
E.L. Gardner, J. Chen, W. Paredes, D. Smith, J. Li and J. Lowinson

Opioid receptor-mediated inhibition of dopamine release and of dopamine-sensitive adenylate cyclase in different rat brain regions
M.H. Heijna, F. Hogenboom, J. Bakker, M. Padt, A.H. Mulder and A.N.M. Schoffelmeer

Modulation of norepinephrine (NE) release in cerebellum slices by mu and kappa opioid receptors
M. Bensaid, Y. Quertermont, J.-P. Thouvenot, J.-C. Meunier and Ph. Jauzac

Inhibition of neurotransmitter release and adenylate cyclase activity by opioids: Ontogeny of functional mu, delta and kappa receptors in rat brain
T.J. De Vries, F. Hogenboom, A.H. Mulder and A.N.M. Schoffelmeer

Molecular structure, regulation and subcellular distribution of mu opioid receptors during postnatal development

Opioid inhibition of ³H-thymidine incorporation into DNA or fetal rat brain aggregates
J. Barg, M. Belcheva, R.J. McHale and C.J. Coscia

Mu opioid receptor-mediated inhibition of beta-adrenergic receptor sensitive adenylate cyclase in rat striatal neurons

Opiate receptors in neuronal and astroglial primary cultures from the rat cerebral cortex
P.S. Eriksson, E. Hansson and L. Rönnbäck
Involvement of calcium ions in the actions of methionine enkephalin on submucous neurones of the guinea pig caecum
K. Hirai and Y. Katayama

Kinetic studies of the block of voltage-dependent slow calcium channels in frog skeletal muscle by non-peptide opioid drugs
G.B. Frank and T.G. Kokate

Na\(^+\) ions prevent 'spontaneous' coupling of opioid receptor with G protein in frog brain membranes
A. Roussin-Pascaud, C. Mollereau, A. Puget and J.-C. Meunier

Autoradiographic distribution of \([^3H]-(+)-pentazocine binding sites in guinea pig brain

A correlation between sigma receptor binding and behavioral potency of sigma ligands in rats of various ages

Physiological effects of sigma ligands in the rat red nucleus

Characterization of 'sigma-like' binding sites in rat liver membranes, further evidence for sigma-1 and sigma-2 sites
S.B. Hellewell, A.E. Bruce and W.D. Bowen

Activation of sigma receptors results in down-regulation of muscarinic cholinergic receptors
W.D. Bowen and P.J. Tolentino

Thursday 12 July, 1990

Symposium S.5  Delta opioid receptors

Pharmacology of highly selective, non-peptide delta opioid receptor antagonists
S.5.2
Functions of delta opioid receptors studied with highly selective probes and enkephalin-degrading enzyme inhibitors
B.P. Roques, G. Gacel, A. Baamonde, R. Maldonado, V. Daugé, G. Calenco and M.-C. Fournie-Zaluski

S.5.3
Functional interactions between opioid mu and delta receptors in vivo
F. Porreca

S.5.4
Isolation of a cDNA coding for the delta type opioid receptor
F. Cabon, J. Morser, F.H. Stephenson, A. Dautigny and B. Zalc

S.5.5
Beta-Endorphin binds to a 80 kDa glycoprotein with interacting mu and delta sites in rat striatum

S.5.6
Are delta- and/or mu-receptors involved in the mediation of sufentanil-induced analgesia and respiratory depression?
E. Freye, C. Ternes and L. Latasch

S.5.7
Development of [D-Ala²]deltorphin I analogs with extraordinary delta receptor selectivity
P.W. Schiller, T.M.-D. Nguyen, G. Weltrowska, C. Lemieux and N.N. Chung

Symposium S.6  Opioid signal transduction

S.6.1
Electrophysiological actions of opioids on central neurons
G.R. Siggins

S.6.2
Role of Go, in the inhibition of calcium channels of neuroblastoma x glioma hybrid cells

S.6.3
Intracellular responses to acute and chronic administration of opioids
M. Parenti
S.6.4  
Different modes of coupling of delta-opioid receptors with GTP-binding proteins in membrane preparations from guinea-pig striatum and ileal myenteric plexus  
M. Satoh, H. Ueda, H. Misawa, J. Harada, K. Nishimura, T. Katada and M. Ui

S.6.5  
Pertussis toxin reduces the inhibitory action of morphine and ADP-ribosylates G proteins in guinea pig myenteric neurons  
S.M. Johnson, C.M. Briton-Jones, T.M. Jeitner, M. Costa and M.F. Crouch

S.6.6  
Cyclic nucleotide-mediated protein phosphorylation in rat brain synaptic plasma membranes: The effects of etorphin  
I. Lengyel, Z. Oláh, F. Joó, T. Pollák and M. Szücs

S.6.7  
Induction of tolerance to the inhibitory effect of mu opioid receptor agonists on the calcium current in human neuroblastoma SH-SY5Y cells  
C. Kennedy, E.P. Seward and G. Henderson

Postersession P.4  
Endocrine and immune system

P.4.01  
Rapid detection of POMC heteronuclear RNA in individual pituitary cells by in situ hybridization  
M.K.-H. Schafer, J.P. Herman and S.J. Watson

P.4.02  
Posterior pituitary kappa opioid mechanisms and oxytocin secretion in the pregnant rat  
A.J. Douglas, B.E.H. Sumner, R.J. Bicknell and J.A. Russell

P.4.03  
A high vasopressin output coincides with a high opioid inhibition on oxytocin release: Further evidence for a cross-inhibition of the oxytocin release by dynorphin co-released with vasopressin  
B.J.M. van de Heijning, I. Koekkoek-van den Herik and Tj.B. van Wimersma-Greidanus

P.4.04  
Inhibition of parturition in the rat by a kappa opioid  
G. Clarke, S.J. Macmillan, K.M. Smith and D.M. Wright

P.4.05  
Oxytocin secretion and action in parturient rats are inhibited by pethidine (meperidine)  
P.4.06
Effects of a new delta selective opioid antagonist on LH secretion from pituitary glands of ovariectomized rats
M.C. Armeanu, J.A.M.J. van Dieten, V.M. Kolb, J. Schoemaker and J. de Koning

P.4.07
Formation of immunoreactive β-casomorphin-8 in prolactin simulated human mammary cells
I. Erlandsson, L. Norrhamn, A. Ybo and F. Nyberg

P.4.08
Identification of β-casomorphin-8 immunoreactive material in human pituitaries
E.-L. Glämsta and F. Nyberg

P.4.09
Cytokines and β-endorphin release by rat anterior pituitary cells in vitro
C.G.J. Sweep and A.R.M.M. Hermus

P.4.10
Interleukin-1 (IL-1) is a potent modulator of anterior pituitary proopiomelanocortin (POMC) peptides
S. Zakarian and M.S. Eleazar

P.4.11
Analysis of beta-endorphin-like immunoreactivity in human peripheral blood leukocytes by reversed-phase-HPLC and gel-filtration
A.D. van Woudenberg, D. de Wied and V.M. Wiegant

P.4.12
Effect of subchronic administration of morphine on the immune system in the rat
J.W. van der Laan, H. van Loveren, M. Krajnc-Franken and E. Krajnc

P.4.13
Modulation of natural killer cell activity: possible role of hypothalamic-pituitary-adrenal axis hormones
G. Bodner, H. Albeck, K.M. Soda and M.J. Kreek

P.4.14
Effects of chronic ethanol treatment on the immune response and the brain opioids
M. Sopori, S. Savage, M.S. Rajagopalan, L. Donaldson, P. Gillespie, G. Shopp, A. Rattan and G. Tejwani
Cardiovascular and respiratory systems/CNS disturbances

P.4.15
Effects of the opioid anaesthetic alfentanil on the haemodynamic response to simulated haemorrhage in rabbits
R.G. Evans, J. Ludbrook and A.F. van Leeuwen

P.4.16
Microdialysis of norepinephrine in ventrolateral medulla (VLM) after an administration of methionine enkephalin (Met-enkephalin) in rats
H. Rhee, S. Lee, J. Strickland and P. Mason

P.4.17
IR-Dynorphin B-Like material is differently processed in rat heart and plasma
S. Spampinato, M. Canossa, T. Bachetti and S. Ferri

P.4.18
Binding of dextromethorphan (DM) and (+)-3-(3-hydroxyphenyl)-N-(1-propyl)piperidine ((+)3-PPP) to rat brain: Allosteric effects of ropizine
M. Klein and J.M. Musacchio

P.4.19
Relative involvement of mu, delta and kappa receptor mechanisms in opiate-mediated antitussive effects in rats
J. Kamei, H. Tanihara and Y. Kasuya

P.4.20
Influence of calcium channel agonists on the opiate activity at the respiratory center of cats
M. Hurlé, M. Dierssen, F. Ruiz and J. Flórez

P.4.21
Presence of proenkephalin-derived octapeptide in nerves of larynx and lower respiratory tract: Partial coexistence with VIP/PHI
D. Nohr, J. Krekel, N. Yanaihara, C. Gramsch and E. Weihe

P.4.22
Binding studies with $^{3}$H-sufentanil™ and antagonists in different human brain areas
M. Traub, K.D. Spindler and A. Pasi

P.4.23
Endogenous thebain: cause of epileptic convulsions?
S. Rümeysa, D. Suna, E.D. Dilek, S. Bilge and Ö. Eymire

P.4.24
The role of opioid mechanisms in non-convulsive seizures in WAG/Rij rats
W. Lasoń, B. Przewłocka, R. Przewłocki, A. Coenen and G. van Luijtenaal
The effects of excitatory amino acids and GABA antagonists on proenkephalin and prodynorphin gene expression in the rat hippocampus  
W. Lasoń and B. Przewłocka

Adaptive changes in the proenkephalin system upon the chronic presence of lithium  
M. Dziedzicka, N. Kley, W. Lasoń and R. Przewłocki

Differential effects of lithium on the potency of different opioids in the guinea pig ileum  
O. Sabzevari, M. Hadjsayddjavadi and A.R. Dehpour

Deprenyl increases striatal enkephalin levels and preproenkephalin mRNA abundance  
S.P. Sivam

Ibotenic acid induced changes in the activity of choline acetyltransferase, acetylcholinesterase and opioid peptides in the rat cortex  
A.K. Rattan and G.A. Tejwani

Mongolian gerbil cerebellum possessed a large amount of mu type receptor  
M. Niwa, T. Iwai, K. Tsurumi and M. Nozaki

Characterization of opioid receptors in cerebral ischemia: Receptor binding properties in the mongolian cell brain  

Further purification of an adrenorphin-Gly⁹ generating enzyme (AGE) from ovine adrenal medulla  
D.C. Parish and N. Tezapsidis

Catecholamines inhibit age  
N. Tezapsidis and D.C. Parish
Friday 13 July, 1990

Symposium S.7  **Opioids in peripheral systems**

S.7.1  Functional correlates of opioids in the intestine  
T.F. Burks  
371

S.7.2  Regulation of adrenomedullary opioid gene expression  
V. Hölli, C.-J. Farin, N. Kley and M. Vanetti  
371

S.7.3  Pro-opiomelanocortin derived peptides in cells of the human immune system  
L. McLoughlin, R. Buzzetti, P.M. Lavender, A.J.L. Clark and L.H. Rees  
373

S.7.4  Processing of recombinant enkephalin precursor by proteolytic activity in bovine chromaffin granules  
V.Y.H. Hook and T.J. Krieger  
374

S.7.5  Recovery and characterization of Met-enkephalin-Arg<sup>6</sup>-Phe<sup>7</sup>-like immunoreactive material in human plasma  
M. Thörnwall, M. Einarsson, S. Kankaanranta and F. Nyberg  
377

S.7.6  Release of opioid peptide immunoreactive materials from pituitary tissue upon stimulation with a hemoglobin fragment, hemorphin-4, in vitro  
H. Scheffler, G. Koch, V. Brantl and H. Teschemacher  
379

S.7.7  Interleukin-2 (IL-2) modulates processing of proopiomelanocortin (POMC) in the pars intermedia of the pituitary to activate B-endorphin  
M.S. Eleazar and S. Zakarian  
380

S.7.8  Peripheral opioid receptors mediating antinociception in inflammation: Localization on primary afferent neurons  
C. Stein, A.H.S. Hassan, L. Bartho, C. Gramsch and A. Herz  
383
