Contents

1 Leukotriene B₄: Biosynthesis and Role in Lymphocytes
Bengt Samuelsson and Hans-Erik Claesson

14 Structure-Function Relationships in Sheep, Mouse and Human Prostaglandin Endoperoxide G/H Synthases

22 Regulation of Prostanoids Synthesis in Human Fibroblasts and Human Blood Monocytes by Interleukin-1, Endotoxin and Glucocorticoids
Amiram Raz, Angela Wyche, Jiyi Fu, Karen Seibert, and Philip Needleman

28 The Regulation of 5-Lipoxygenase Activity in Rat Basophilic Leukemia Cells
Angela Wong, Shing Mei Hwang, and Michael N. Cook

35 Properties of Leukotriene A₄-Hydrolase
Olof Rådmark and Jesper Haeggström

46 Biosynthesis and Functions of Leukotriene C₄
Takao Shimizu, Takashi Izumi, Zen-ichiro Honda, Yousuke Seyama, Yohihisa Kurachi, and Tsuneaki Sugimoto

54 Lipoxin Formation: Evaluation of the Role and Actions of Leukotriene A₄
Charles N. Serhan, Kelly-Anne Sheppard, and Stefano Fiore

63 Platelet-Granulocyte Interactions and the Production of Leukotrienes and Lipoxins
Jan Åke Lindgren and Charlotte Edenius

71 Incorporation of Arachidonic Acid into Glycerophospholipids of a Murine Bone Marrow Derived Mast Cell
Laura Bettazzoli, Joseph A. Zirrolli, Charles T. Reidhead, Mona Shahgholi, and Robert C. Murphy

79 Characterization of a Secretable Phospholipase A₂ from Human Platelets
Ruth M. Kramer, Berit Johansen, Catherine Hession, and R. Blake Pepinsky
87 Novel Eicosanoids Generated by Cytochrome P450: Effects on Platelet Aggregation and Protein Phosphorylation
K. Malcolm, J. R. Falck, and F. A. Fitzpatrick

95 A Concept for the Mechanism of Prostacyclin and Thromboxane A₂ Biosynthesis
Volker Ullrich and Markus Hecker

102 I-BOP, the Most Potent Radiolabelled Agonist for the TXA₂/PGH₂ Receptor

110 Classification of Prostanoid Receptors
Phillip J. Gardiner

119 Peptide Leukotriene Receptors and Antagonists
R. D. Krell, D. Aharony, C. K. Buckner, and E. J. Kusner

127 Signal Transduction Processes for the LTD₄ Receptor
Stanley T. Crooke, Henry Sarau, David Saussy, James Winkler, and James Foley

138 Eicosanoid Receptors of the Gastrointestinal Tract
K.-F. Sewing and M. Beinborn

146 Leukotrienes in the Cardiovascular System
P. J. Piper, A. P. Sampson, H. bin Yaacob, and J. M. McLeod

153 Microvascular Actions of Eicosanoids in the Hamster Cheek Pouch
P. Hedqvist, J. Raud, and S.-E. Dahlen

161 Modification of the Lipoxygenase Pathway of Arachidonic Acid Metabolism
Anthony W. Ford-Hutchinson

170 Interactions of Eicosanoids and Cytokines in Immune Regulation
Robert A. Lewis

179 Leukotrienes in Shock Syndromes: Metabolism and Detection in Vivo
D. Keppeler, A. Guhlmann, M. Huber, H. A. Ball, I. Leier, and G. Jedlitschky

187 Binding Sites for Histamine and Sulfidopeptide Leukotrienes in Normal and Hypersensitized Human Lung Fragments
Teresa Viganò, Simonetta Nicosia, Maria Rosa Accomazzo, Maria Teresa Crivellari, Daniella Oliva, Alberto Verga, Maurizio Mezzetti, and Giancarlo Folco
CONTENTS

193 Studies of Leukotrienes as Mediators in the Human Lung in Vitro
   Sven-Erik Dahlén, Thure Björck, Maria Kumlin, Elisabeth Granström, and Per Hedqvist

201 The Role of Eicosanoids in Allergen-Induced Early and Late Bronchial Responses in Allergic Sheep
   William M. Abraham

209 The Role of Leukotrienes and Prostaglandins in Asthma: Evidence from Clinical Investigations
   Clive Robinson and Stephen T. Holgate

217 Modification of the Arachidonic Acid Cascade through Phospholipase A2 Dependent Mechanisms
   Edward A. Dennis

224 Essential Fatty Acid Deficiency: Probing the Role of Arachidonate in Biology
   J. B. Lefkowith

232 The Modification of the Arachidonic Acid Cascade by n-3 Fatty Acids
   Peter C. Weber

241 Modification of Arachidonic Acid Metabolism via the Cytochrome P450-Related Monooxygenase System
   Michal Laniado Schwartzman

250 Pharmacologic Modulation of the Cyclooxygenase Pathway in the Human Kidney
   Carlo Patrono

257 Subject Index
