CONTENTS

Preface. By WILLIAM G. JOHNSON and MANUEL R. GOMEZ .......... xi

Part 1. Clinical Phenotypes of Tuberous Sclerosis
Nervous System and Retinal Involvement

Phenotypes of the Tuberous Sclerosis Complex with a Revision of
Diagnostic Criteria. By MANUEL R. GOMEZ .......................... 1

Neuropsychiatric Aspects of Tuberous Sclerosis. By P. CURATOLI, R.
CUSMAI, F. CORTESI, C. CHIRON, I. JAMBAQUE, and O. DULAC ...... 8

Ophthalmic Manifestations of Tuberous Sclerosis. By DENNIS M.
ROBERTSON .......................................................... 17

Extraneural Manifestations

History and Significance of White Macules, Earliest Visible Sign of
Tuberous Sclerosis. By THOMAS B. FITZPATRICK ....................... 26

Renal Involvement in Tuberous Sclerosis. By JAY BERNSTEIN and
THOMAS O. ROBBINS ............................................... 36

Cardiac Rhabdomyomas in Tuberous Sclerosis. By G. H. WATSON .... 50

Cardiac, Pulmonary, and Vascular Involvements in Tuberous Sclerosis.
By J. T. LIE ......................................................... 58

Hartomatous Rectal Polyps Are Common in Tuberous Sclerosis. By
STUART R. GOULD .................................................. 71

a This volume is the result of a conference entitled Tuberous Sclerosis and Allied Disor-
ders, which was sponsored by the New York Academy of Sciences and the National Tuber-
ous Sclerosis Association and held on April 23–25, 1990 in Bethesda, Maryland.
Part 2. Imaging in Tuberous Sclerosis

Imaging of Intracranial Tuberous Sclerosis. By O. WAYNE Houser, Charles W. Shepherd, and Manuel R. Gomez 81

Imaging of Tuberous Sclerosis Lesions Outside of the Central Nervous System. By Alan D. Hoffman 94

Diagnosis of Symptomatic and Asymptomatic Gene Carriers of Tuberous Sclerosis by CCT and MRI. By E. S. Roach, Jeffrey Kerr, Dianne Mendelsohn, D. Wayne Laster, and Catherine Raeside 112

Part 3. Epidemiology of Tuberous Sclerosis

Epidemiology of Tuberous Sclerosis. By John P. Osborne, Alan Fryer, and David Webb 125

Part 4. Histopathology and Biochemical Pathology of Tuberous Sclerosis

Pathology of Tuberous Sclerosis. Neuropathologic Aspects. By Edward P. Richardson, Jr. 128

Cellular Neuropathology of Tuberous Sclerosis. By Peter R. Huttenlocher and Robert L. Wollmann 140

Glycoprotein and Proteoglycan Alterations in Tuberous Sclerosis. By Zhila Khalkhali-Ellis, Keiran Henderson, and Frank W. Hemming 149

Part 5. Cell Biology, Neuronal Migrations, and Tuberous Sclerosis

Cell Lineage and Cell Migration in the Neural Crest. By Thomas E. Lallier 158

Cell Adhesion Molecules in Embryogenesis and Disease. By Kathryn L. Crossin 172

Cerebral Lesions of Tuberous Sclerosis in Relation to Normal Histogenesis. By Verne S. Caviness, Jr. and Takao Takahashi 187

Neuron-Like Cells in Culture of Tuberous Sclerosis Tissue. By M. Davidson, H. Yoshidome, E. Stenroos, and W. G. Johnson 196

Origin of the Neuron-Like Cells in Tuberous Sclerosis Tissues By W. G. Johnson, H. Yoshidome, E. S. Stenroos, and M. M. Davidson 211

The Hexabrachion Gene as a Candidate for a Tuberous Sclerosis Gene. By Jeff Gulcher and Kari Stefansson 220
Abnormal Gene Expressions of Stroma Cells in Patients with Tuberous Sclerosis. By YASUMASA ISHIBASHI, RYOJI WATANABE, TOSHITATSU NOGITA, TETSUO TAKAHASHI, KAZUKIYO ONODERA, and GENKI KIMURA .......................................................... 228

Part 6. Cytogenetics in Tuberous Sclerosis

A Cytogenetic Abnormality in Tuberous Sclerosis. Report of an Affected Infant with 47,XX,+der22,t(11;22)(q23.3;q11.2) mat. By ROBIN DAWN CLARK .......................................................... 243

Part 7. Linkage Analysis of Tuberous Sclerosis

Locating Disease Genes through Linkage. Special Problems in Working with Tuberous Sclerosis. By P. MICHAEL CONNEALLY .......................................................... 252

Part 8. Molecular Biology of the Other Phakomatoses

The NF1 Translocation Breakpoint Region. By Peter O’Connell, Richard M. Cawthon, David Viskochil, Ray White, John C. Carey, and Arthur M. Buchberg

Toward the Isolation of the Primary Genetic Defect in Von Hippel-Lindau Disease. By Bernd R. Seizinger

Molecular Genetics of Neurofibromatosis 2 and Related Tumors (Acoustic Neuroma and Meningioma). By Bertrand Fontaine, Guy A. Rouleau, Bernd R. Seizinger, Ann G. Menon, Ann F. Jewell, Robert L. Martuza, and James F. Gusella

Heterogeneity. By J. H. Edwards

Summary of the Meeting. By John Edwards

Part 9. Poster Papers

Abnormal Fibronectin Produced in Tuberous Sclerosis. By Z. KhalkHali-Ellis and F. W. HEMMING

Defining the Clinical Phenotype of Von Hippel-Lindau Disease. Experience with a Large Newfoundland Family. By J. S. Green, T. Cummings, M. Bense, and M. I. Bowmer

Estimating “Probability of Tuberous Sclerosis” for Genetic Linkage Studies. By Nicholas J. Lenn

Medical Research and a Tuberous Sclerosis Support Group. By Debbie Fields Murphy and Stephen G. KAhler

Mortality in the Mayo Clinic Tuberous Sclerosis Complex Study. By C. W. Shepherd and M. R. Gomez

Autism and Psychiatric Disorders in Tuberous Sclerosis. By Susan Smalley, M. Smith, and P. Tanguay ....................................................... 382

Linkage Studies for Markers on 9q to Tuberous Sclerosis. By H. Northrup and S. H. Blanton ............................................................... 384

Index of Contributors ............................................................... 387

Subject Index ........................................................................... 389

Financial assistance was received from:

Major funder

- THE NATIONAL TUBEROUS SCLEROSIS ASSOCIATION

Supporter

- NATIONAL INSTITUTE OF NEUROLOGICAL DISORDERS AND STROKE/NIH

Contributor

- PARKE-DAVIS

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
