Contents

vii Foreword

1 γ-Aminobutyric Acid (GABA): From Discovery to Visualization of GABAergic Neurons in the Vertebrate Nervous System
   E. Roberts

27 Physiological and Pharmacological Characterization of the Actions of GABA
   M.A. Simmonds

43 Membrane Actions of GABA in Cultured Central Neurones
   R.N. McBurney

59 Evidence for Functional Roles of GABA Pathways in the Mammalian Brain
   K.G. Lloyd, B. Zivkovic, B. Scatton, and G. Bartholini

81 Heterogeneity of Mammalian GABA Receptors

109 GABA Agonists: Structural Requirements for Interaction with the GABA-Benzodiazepine Receptor Complex
   P. Krogsgaard-Larsen, E. Falch, and P. Jacobsen

133 GABA and the Anticonvulsant Action of Benzodiazepines and Related Drugs
   B. Meldrum and C. Braestrup

155 Benzodiazepine Receptors and Their Ligands
   H. Möhler

167 Is There any Evidence for Multiple Benzodiazepine Receptors?
   I.L. Martin, C.L. Brown, and A. Doble

179 GABARINS and the Nexus Between GABA and Benzodiazepine Receptors
   G.A.R. Johnston and J.H. Skerritt
CONTENTS

191 Role of GABA-Modulin and of an Endogenous Effector of Beta-Carboline Binding Sites in the GABA-Benzodiazepine Receptor Interaction
A. Guidotti, M.G. Corda, F.M. Vaccarino, and B.C. Wise

203 Pharmacological Effects of Clinically Important Drugs on the Excitability of Cultured Mouse Spinal Neurons
J.L. Barker, E. Gratz, D.G. Owen, and R.E. Study

217 GABA and Benzodiazepine Receptors in Neurologically Mutant Mice
T.J. Biscoe and J.P. Fry

239 Some Biochemical, Behavioural, and Electrophysiological Tests of the GABA Hypothesis of Anti-Anxiety Drug Action

263 Actions and Interactions of Benzodiazepine Agonists and Antagonists at GABAergic Synapses
W. Haefely

287 Overview: Some Key Questions and Future Trends
D.W. Straughan

291 Subject Index
