College of Physicians & Surgeons

Fred Brown
Plum Island Animal Disease Center

Richard A. Lerner
Research Institute of Scripps Clinic

COLD SPRING HARBOR LABORATORY PRESS 1991
Contents

Conference Participants, v
Preface, xiii

SECTION I AIDS

A Unique Subunit Immunogen, ISCOM-gp160, Can Elicit MHC Class-I-restricted HIV Envelope-specific CD8+ CTLs
Hidemi Takahashi, Toshiyuki Takeshita, Bror Morein, Scott Putney, Ronald N. Germain, and Jay A. Berzofsky

HIV-1 Principal Neutralization Determinant Elicits Broadly Neutralizing Antibodies

Recognition of the V3 Hypervariable Loop of HIV-1 gp120 Is Not Determined Exclusively by Its Primary Amino Acid Sequence
A. Robert Neurath, Nathan Strick, and Shibo Jiang

Characterization of Enhancement of HIV-1 Infection by Human Monoclonal Antibodies to HIV-1
Akira Takeda, Francis A. Ennis, James E. Robinson, David D. Ho, and Christine Debouck

Induction of HIV-1 Neutralizing Antibodies by Synthetic Peptides
Jorge Ronco, Michel Chevalier, Michel Kaczorek, Agnès Deslandres, Françoise Barre-Sinoussi, and Marc Girard

Clonal Dominance of the Neutralizing Response to the HIV-1 V3 Epitope: Evidence for "Original Antigenic Sin" during Vaccination and Infection in Animals, Including Humans
Peter L. Nara and Jaap Goudsmit

Antigenicity and Antigenic Variation of the V3 Neutralization Domain on the Envelope Glycoprotein gp120 of HIV-1
Gabriël Zwart, Lia van der Hoek, Nicole Back, Chitra Ramautarsing, Tom Wolfs, Jean-Jacques de Jong, Anthony de Ronde, Jaap Goudsmit, Hans Langedijk, and Peter Nara

Vaccination of Primates with Native Recombinant HIV-1 gp120 Generates Broad Spectrum Neutralizing Antibodies
Nancy L. Haigwood, Peter L. Nara, Gary Van Nest, Carl J. Scandella, Jorg W. Eichberg, and Kathelyn S. Steimer

</table>
Definition of the Epitope and Major Histocompatibility Complex Class I Molecule Recognized by Gag-specific Cytotoxic T Lymphocytes in SIVmac-Infected Rhesus Monkeys
Michael D. Miller, David I. Watkins, and Norman L. Letvin

Robust Expression of the SIV Envelope Protein by a Recombinant Human Adenovirus Host-range Mutant

Rhesus Monkey Anti-CD4 Antibody Responses Elicited by Soluble Human CD4
Mamoru Watanabe, Hiroshi Tsubota, Zheng W. Chen, Norman L. Letvin, and Theresa Liu

Epitope Dominance in the Antibody Response to Recombinant gp160 of HIV-IIIB
George K. Lewis, Yusuf Hakan Abacioglu, Tim Fouts, Jacinda Sampson, Mark Moorman, Gerhard Bauer, Robert Tuskan, Gerald A. Cole, and Roberta Kamin-Lewis

Engineered Peptides That Mimic HIV-1 Neutralizing Envelope Structures
Thomas Kieber-Emmons, Kenneth E. Ugen, Michael Merva, Alice Whalley, W.J.W. Morrow, William V. Williams, Peter L. Nara, and David B. Weiner

Biosynthesis and Structure of Chimeric HIV gag Proteins Containing an Amino-terminal Signal/Anchor Peptide
Vicki H. Slone and Lawrence A. Hunt

Conformational Rearrangement of the HIV-1 Envelope Renders Viruses Resistant to Type-specific and Broadly Neutralizing Antibodies
Nicole K.T. Back, Tom F.W. Wolfs, Wagian Sun, Chitra Ramautarsing, Lia Smit, Jaap Goudsmit, Peter L. Nara, and Claudine Bruck

SECTION II VIROLOGY

Restriction of HSV-1 Production In Cell Lines Transduced with an Antisense Viral Vector Targeting the ICP4 Gene
Kamehameha K. Wong, Jr., James A. Rose, and Saswati Chatterjee

Recombinant Feline Herpesviruses as Vectors for Vaccination against Retrovirus Infection in Cats

Mapping of B- and T-cell Epitopes on the Epstein-Barr Virus Major Envelope Glycoprotein gp340
Richard J. Pither, Chang X. Zhang, Andrew J. Morgan, Lesley E. Wallace, and Alan B. Rickinson
Surface Glycoproteins from a Wild-type Influenza-A Parent Virus Modify the Infectivity and Virulence of Live Attenuated Influenza-A Avian-Human Reassortant Viruses for Seronegative Humans 203
Brian R. Murphy, Mark C. Steinhoff, Louis F. Fries, Ned A. Halsey, Modena H. Wilson, James King, and Mary Lou Clements

Intranasal Immunization with Inactivated Influenza Virus and Virosomes 209
Martin J. Ford, Chris Bolwell, John P. Tite, and David J. Rowlands

Analysis of Neutralizing and Infection-enhancing Antibodies of Influenza-A Viruses 217
Manabu Tamura, Francis A. Ennis, and Robert G. Webster

Novel System for Regulated High-level Gene Expression in Vaccinia Virus 221
William A. Alexander, Thomas R. Fuerst, and Bernard Moss

Cloning and Expression of the Structural Gene of Hepatitis-C Virus Obtained from Healthy Virus Carriers in Japan 227
Tatsuo Miyamura, Kenji Takeuchi, Yutaka Takebe, Shizuko Harada, Yoshiharu Matsuura, Yushiro Watanabe, Tetsuo Yoneyama, Izumu Saito, and Joe Chiba

Structure and Function of the 5'-Nontranslated Region of Hepatitis-A Virus RNA 233

Anti-HAV Neutralizing Antibodies Made to Antigens Produced by Recombinant Baculoviruses 239
James McLinden, Elliot Rosen, and Jack Stapleton

Role of Dengue Virus Membrane Protein in Resistance 245
Michael Bray and Ching-Juh Lai

Carboxy-terminally Truncated Dengue Virus Envelope Glycoproteins Expressed on the Cell Surface Exhibit Increased Immunogenicity in Mice 251
Ruhe Men, Michael Bray, and Ching-Juh Lai

Molecular Basis of Attenuation and Immunogenicity of a Live Attenuated Japanese Encephalitis Vaccine Virus SA14-14-2 259
Alan D.T. Barrett, Jing Xin Cao, Bijon K. Sil, Rakesh Sharda, Mark R. Wills, Alison T. Kennedy, Ian Kitchen, N. Jack Burns, Sorachai Nitayaphan, and Dennis W. Trent

Extent and Distribution of Antigenic Polymorphism of Human Rotavirus Outer Capsid Protein VP4 265
Mario Gorziglia, Gisela Larralde, Baoguang Li, Albert Z. Kapikian, and Robert M. Chanock

Improved Immunogenicity of Cell-surface-anchored Rotavirus Antigens 271
Marion E. Andrew, David B. Boyle, Barbara E.H. Coupar, A. Richard Bellamy, David Reddy, and Gerald W. Both
Respiratory Syncytial Virus F, G, M2 (22K), and N Proteins Each Induce Resistance to RSV Challenge, but the Resistance Induced by the M2 and N Proteins Is Relatively Short-lived
Mark Connors, Peter L. Collins, Cai-Yen Firestone, and Brian R. Murphy

Efficacy of Passively Administered Monoclonal Antibodies against Respiratory Syncytial Virus Infection in Cotton Rats
Geetha P. Bansal, Jacqueline Hatfield, James F. Young, Franklin H. Top, Jr., Gregory A. Prince, Robert L. Horswood, Val Hemming, and Sally Hensen

Mechanism of Protection against Infection with Human Respiratory Syncytial Virus by Immunization with a Recombinant Vaccinia Virus Expressing the 22-kD Protein
Judith A. Nicholas, Kathleen L. Rubino, Melissa E. Levely, Annette L. Meyer, and Peter L. Collins

Immunogenicity and Protective Efficacy of Adenovirus Vectored Respiratory Syncytial Virus Vaccine
Kuo-Hom Lee Hsu, Michael D. Lubeck, Alan R. Davis, Ramesh A. Bhat, Bernard H. Selling, Bheem M. Bhat, Satoshi Mizutani, Paul P. Hung, Brian R. Murphy, Peter L. Collins, and Robert M. Chanock

A Role for CD8+ Class I MHC-restricted CTLs in Recovery from Measles: Implications for the Development of Inactivated Measles Vaccines
Robert S. van Binnendijk, Martien C.M. Poelen, Petra de Vries, Fons G.O.M. UytdeHaag, and Albert D.M.E. Osterhaus

Utilization of Recombinant Baculovirus-expressed Rabies N Protein for Preexposure Prophylaxis against Rabies
Zhen Fang Fu, Hildegund C.J. Ertl, and Bernhard Dietzschold

Expression and Immunological Analysis of Hepatitis-B Core Fusion Particles Carrying Internal Heterologous Sequences
Berwyn E. Clarke, Anthony R. Carroll, Alan L. Brown, Jeff Yon, Nigel R. Parry, Erling W. Rud, Michael J. Francis, and David J. Rowlands

Hybrid Hepatitis-B Virus Core/Pre-S Particles Expressed in Live Attenuated Salmonella for Oral Immunization
Florian Schödel, Hans Will, and David R. Milich

Infectious Bovine Rhinotracheitis Virus Vector That Expresses Foot-and-Mouth Disease Virus Epitopes on the Surface of Viral Particles and Virus-Infected Cells
Malon Kit, Saul Kit, Sheila Little, Richard DiMarchi, and Charles Gale

SECTION III IMMUNOLOGY

Isolation and Characterization of Influenza Virus HA-specific Antibodies from a Combinatorial Expression Library
Andrew J. Caton, Joshua Kavaler, Walter Gerhard, and Hilary Koprowski
Toward Engineering of T-cell-presented Epitopes
Thomas G. Goldschmidt, Shan Lu, Victor E. Reyes, Valery Lam, Rochelle R. Torgerson, Quoc V. Nguyen, Robert A. Lew, and Robert E. Humphreys

Synthetic Peptides as Subunit Immunogens: Parameters for Combining T-helper Sites with B-cell Antigenic Determinants
Vidal F. de la Cruz, LeeAnn Benson, Robert M. Woods, and Marc S. Collett

Early Administration of Interferon-γ as an Adjuvant: An Effect on a T-helper Subpopulation?
Andrew W. Heath and John H.L. Playfair

Induction of Cytotoxic T-cell Response to Cas-Br-M Murine Leukemia Virus in Newborn Mice
Marcella Sarzotti and Deanna S. Robbins

Vaccinia-virus-specific Human Cytotoxic-T-cell Clones
Rebecca A. Littaua, Akira Takeda, and Francis A. Ennis

In Vivo Stabilization of a Human Recombinant CD4 Derivative by Fusion to a Serum-albumin-binding Receptor
Per-Åke Nygren, Mathias Uhlén, Per Floidby, Roland Andersson, and Hans Wigzell

SECTION IV BACTERIOLOGY AND PARASITOLOGY

Molecular Characterization of a Theileria parva Surface Sporozoite Antigen
Vishvanath Nene, Keith P. Iams, and Anthony J. Musoke

The Plasmodium falciparum Clustered-asparagine-rich Protein Is a Malaria Vaccine Candidate
Lucia Cavelier, Anders Sjölander, Lena Åslund, Niklas Ahlborg, Helena Helmy, Stefan Ståhl, Birgitta Wåhlin, Klavs Berzins, Peter Perlmann, Mattias Uhlén, Ulf Pettersson, and Mats Wahlgren

Oral Salmonella-Malaria CS Recombinant Vaccine Induces CD8+ Cytotoxic T Cells
Anita Aggarwal, Jerald Sadoff, Sanjai Kumar, David Hone, and Mitchell Gross

Surface Expression of Malarial Antigens in E. coli and S. typhimurium: Induction of Serum Antibody Response upon Oral Vaccination of Mice
Joachim Schorr, Bernhard Knapp, Erika Hundt, Hans Küpper, and Egon Amann
