Controlled-Release Technology
Pharmaceutical Applications

Ping I. Lee, Editor
Ciba-Geigy Corporation

William R. Good, Editor
Ciba-Geigy Corporation

Developed from a symposium sponsored by the Division of Industrial and Engineering Chemistry at the 191st Meeting of the American Chemical Society, New York, New York, April 13-18, 1986
Contents

Preface ................................................................. ix

1. Overview of Controlled-Release Drug Delivery .................. 1
   Ping I. Lee and William R. Good

FUNDAMENTAL ASPECTS

   W. Mark Saltzman, Stephen H. Pasternak, and Robert Langer

3. Diffusion in Heterogeneous Media .................................. 34
   Bret Berner, J. C. Keister, and Eugene R. Cooper

4. Estimation of Rates of Drug Diffusion in Polymers ................. 49

5. Interpretation of Drug-Release Kinetics from Hydrogel Matrices in Terms of Time-Dependent Diffusion Coefficients ............. 71
   Ping I. Lee

6. Physicochemical Models for Percutaneous Absorption ............... 84
   J. Hadgraft and Richard H. Guy

CHARACTERIZATION METHODOLOGIES

7. Surface Chemical Analysis of Polymeric Drug Delivery Systems by Static Secondary Ion Mass Spectrometry (SSIMS) and SIMS Imaging .......... 100
   M. C. Davies and A. Brown

8. Improved Method for Measuring In Vitro Diffusion of Drugs Through Human Skin ......................................................... 113
   L. R. Brown, J. F. Cline, C. L. Raleigh, and M. B. Henry

9. Simplified Procedure for Measuring Controlled-Release Kinetics .......... 120
   Charles G. Gebelein, Tahseen Mirza, and Robert R. Hartsough

HYDROPHILIC POLYMERS AND HYDROGELS

    D. Attwood, C. J. Tait, and J. H. Collett

11. Release and Delayed Release of Water-Soluble Drugs from Polymer Beads with Low Water Swelling .................................. 139
    Karl F. Mueller

12. Morphine Hydrogel Suppositories: Device Design, Scale-Up, and Evaluation ...................................................... 158
    Marion E. McNeill and Neil B. Graham
