VOLUME 7

REPRODUCTIVE ECOLOGY OF TROPICAL FOREST PLANTS

Edited by K.S. Bawa and M. Hadley

PUBLISHED BY
UNESCO
PARIS
AND
The Parthenon Publishing Group
International Publishers in Science, Technology & Education
CONTENTS

PREFACE v

LIST OF CONTRIBUTORS xxi

Section 1: Introduction

1. REPRODUCTIVE ECOLOGY OF TROPICAL FOREST
   PLANTS: MANAGEMENT ISSUES 3
   Kamaljit S. Bawa, Peter S. Ashton and Salleh Mohd. Nor
   Introduction 3
   Reproductive cost in relation to stand structure and
   plantation design 4
   Phenology 6
   Pollination and sexual systems 7
   Gene flow, effective population size and genetic variation 10
   Seed biology 11
   Reproduction and population genetic structure 11
   Conclusions 12
   References 12

Section 2: Phenology

2. PHENOLOGY – COMMENTARY 17
   Kamaljit S. Bawa and F.S.P. Ng
   References 20
3. PHENOLOGICAL BEHAVIOUR OF SOME SHOREA SPECIES IN PENINSULAR MALAYSIA
S.K. Yap and H.T. Chan

Abstract
Introduction
Study sites and methods
Flowering behaviour of Shorea species
Flowering at different sites
Variation in flowering for different species
Flowering within a site
Fruiting behaviour of Shorea species
Discussion
References

4. PLANT PHENOLOGY, POLLINATION ECOLOGY, POLLINATOR BEHAVIOUR AND CONSERVATION OF POLLINATORS IN NEOTROPICAL DRY FOREST
Gordon W. Frankie, S.B. Vinson, Linda E. Newstrom, John F. Barthell, William A. Haber and Jutta K. Frankie

Abstract
Introduction
Study sites
Phase I research: wet and dry forests, 1968–1974
Phase II research: dry forest, 1975–1980
Phase III research: dry forest, 1981–1985
Phase IV research: 1986–present
Nesting biology
Habitat preferences
Population ecology
Limiting factors
Conservation implications and considerations
Acknowledgements
References

5. SEASONAL DROUGHT AND THE TIMING OF FLOWERING AND LEAF FALL IN A NEOTROPICAL FOREST
S. Joseph Wright and Fernando H. Cornejo

Abstract
Introduction
Study site
Methods
Results
Section 3: Plant–pollinator interactions, sexual systems and gene flow

6. PLANT–POLLEN INTERACTIONS, SEXUAL SYSTEMS AND POLLEN FLOW – COMMENTARY 65
   Kamaljit S. Bawa
   References 68

7. SOME ASPECTS OF POLLINATION BIOLOGY IN CENTRAL AMERICAN FORESTS 69
   George E. Schatz
   Abstract 69
   Introduction 69
   Community-level characterization of a tropical wet forest 70
   Sexual systems
   Pollination systems
   Taxonomically-related and/or functionally similar neotropical plants and pollinators 74
   Hummingbirds and their flowers
   Neotropical palm groups
   Cyclanthaceae
   Two odour-driven systems
   Euglossini/Orchidaceae
   Dynastine scarab beetles as neotropical pollinators
   Directions for future research 81
   References 81

8. PLANT–POLLEN INTERACTIONS IN MALAYSIAN RAIN FORESTS 85
   S. Appanah
   Abstract 85
   Introduction 85
   Pollination and species diversification studies in Malaysia 87
   Pollination in mangrove swamp and secondary forests 87
   Flowering synusiae in lowland dipterocarp forests 88
   Flowers held above the canopy
   Flowers held within the canopy
   Cauliflorous flowers
   Forest floor flowers, shrubs and herbs
Reproductive ecology of tropical forest plants

Differences among synusiae

Flowering patterns
- General flowering in lowland dipterocarp forests
- Sources of pollinators during a general flowering
- Competition for pollinators

Floral adaptations
- Attractants for pollinators
- Floral colour
- Floral scents

Floral rewards for pollinators
- Nectar
- Pollen and other rewards

Pollinator–plant interactions and pollen dispersal

Species diversity and pollinators

Concluding remarks

References

9. PHENOLOGY AND FLORAL MORPHOLOGY IN RELATION TO POLLINATION OF SOME SRI LANKAN DIPTEROCARPS

S. Dayanandan, D.N.C. Attygalla, A.W.W.L. Abeygunasekera, I.A.U.N. Gunatilleke and C.V.S. Gunatilleke

Abstract

Introduction

Study site

Methods
- Vegetative and reproductive phenology
- Floral biology and flower visitors
- Pollination experiments and fruit-set

Results
- Vegetative and reproductive phenology
- Floral morphology
- Anthesis, flower longevity and fruit development
- Colour changes of flowering and fruiting crowns
- Flower visitors and pollination
- Floral features related to pollination
- Pollination experiments, fruit-set and fruit losses

Discussion
- Time, duration and sequence of flowering
- Floral biology and pollination
- Breeding systems

Acknowledgements

References
10. BEETLE POLLINATION IN TROPICAL FORESTS OF AUSTRALIA
Anthony K. Irvine and Joseph E. Armstrong

Abstract
Introduction
Terminology
Methods
Types of beetle pollination
Beetle pollination in north Queensland rain forests
Pollen/nectar beetle pollination – micro-beetles
Pollen/nectar beetle pollination – small to medium-sized beetles
Herbivorous beetle pollination – micro-beetles
Herbivorous beetle pollination – small beetles

Frequency of beetle pollination in tropical forests
Discussion
Acknowledgements
References

11. POLLINATION AND REPRODUCTIVE BIOLOGY OF AN UNDERSTORY NEOTROPICAL AROID
Helen J. Young

Abstract
Introduction
Methods
Results
Natural history
Neighbourhood size
Male and female reproductive success
Discussion
Acknowledgements
References

12. POLLEN GRAIN DEPOSITION PATTERNS AND STIGMA STRATEGIES IN REGULATING SEED NUMBER PER POD IN MULTI-OVULATED SPECIES
R. Uma Shaanker and K.N. Ganeshaiah

Abstract
Introduction
Materials and methods
Results
Negatively skewed distribution
Discontinuous bimodal distribution
Positively skewed distribution
Repotuctive ecology of tropical forest plants

Discussion 173
Acknowledgements 177
References 177

Section 4: Seed and fruit dispersal

13. SEED AND FRUIT DISPERSAL – COMMENTARY 181
John Terborgh
Introduction 181
Phenological patterns in fruit production 182
‘Competition avoidance hypothesis’
‘Predation satiation hypothesis’
‘Optimal time of ripening hypothesis’
Fruit morphology in relation to dispersers 185
A message for managers 187
References 190

14. SEED DISPERSAL BY BIRDS AND MAMMALS:
IMPLICATIONS FOR SEEDLING DEMOGRAPHY 191
Henry F. Howe
Abstract 191
Introduction 192
Methods 193
Study site
Fruit estimation
Frugivore activity
Depletion and dissemination
Mortality and survival
Results 196
Fruit production
Frugivore activity
Fruit depletion and seed dissemination
Mortality and survival
Discussion 206
Frugivore behaviour and seed deposition
Seed and seedling tactics
Ontogeny of spatial pattern
Extensions and predictions
Implications for conservation
Summary 215
Acknowledgements 216
References 216

18. SEED DORMANCY IN THE TROPICAL RAIN FOREST
C. Vázquez-Yanes and A. Orozco-Segovia

Abstract
Introduction
Dormancy of trees in the mature forest
Dormancy among pioneer plants
Discussion
Acknowledgements
References

19. SEEDLING TYPES AND PLANT ESTABLISHMENT IN AN AFRICAN RAIN FOREST
Annette Hladik and Sophie Miquel

Abstract
Introduction
Seedling terminology based on seedling morphology
Seedling types
Percentages of the five seedling types
Seedling types, seed size and life forms
Seedling types and seed dispersal
Seedling types and plant establishment
Conclusion
Acknowledgements
References

Section 6: Regeneration

20. REGENERATION – COMMENTARY
Richard B. Primack

21. THE ROLE OF DISTURBANCE IN THE REGENERATION OF NEOTROPICAL MOIST FORESTS
David B. Clark

Abstract
Introduction
The definition of disturbance
Ecological and physiological consequences of disturbance
Tree death and disturbance in forest ecosystems
Ecological effects of modes of tree death
Ecological effects of soil disturbance
Physiological consequences of disturbance
Disturbance in neotropical moist forests

xvi
22. THE FATE OF JUVENILE TREES IN A NEOTROPICAL FOREST: IMPLICATIONS FOR THE NATURAL MAINTENANCE OF TROPICAL TREE DIVERSITY

Stephen P. Hubbell and Robin B. Foster

Abstract

Introduction

Study site and methods

Primary census results

Interpreting the primary census results

The recensus results

Interpreting the recensus results
Reproductive ecology of tropical forest plants

Conclusions after the first recensus 338
Acknowledgements 339
References 339

Section 7: Reproductive biology and tree improvement programmes

23. REPRODUCTIVE BIOLOGY AND TREE IMPROVEMENT PROGRAMMES – COMMENTARY 345
Peter S. Ashton and Kamaljit S. Bawa
References 348

24. REPRODUCTIVE BIOLOGY AND TROPICAL PLANTATION FORESTRY 349
Arno Brune
Abstract 349
Introduction 349
Problems in reproduction 350
Early flowering
Seed set
Pollinator–tree interactions
Extended flowering
Conclusions 353
References 354

25. EFFECTS OF INBREEDING ON GROWTH OF FOREST TREES AND IMPLICATIONS FOR MANAGEMENT OF SEED SUPPLIES FOR PLANTATION PROGRAMMES 355
A. Rod Griffin
Abstract 355
Introduction 355
The phenomenon of inbreeding 357
Breeding systems of forest trees 359
Experimental determination of inbreeding depression 360
Evidence for inbreeding depression in plantations of forest trees 363
Measures to minimize problems with inbreeding 367
The natural forest
Unpedigreed plantations
Seed stands or orchards
Importance of recording genetic history 371

Contents

Conclusions 371
References 372

26. GENETIC STRUCTURE OF TROPICAL TREE SPECIES OF BRAZIL 375
Paulo Y. Kageyama
Abstract 375
Introduction 375
Reproductive biology and genetic structure of tropical tree species 376
Genetic structure and silviculture of indigenous species 379
Genetic structure of tropical tree species 380
Variation between provenances of tropical pines and eucalypts
Genetic variation within populations of indigenous species of Brazil
Conclusions 385
Acknowledgements 385
References 385

27. USE OF SMALL, CLONAL PLANTS FOR EXPERIMENTS ON FACTORS AFFECTING FLOWERING IN TROPICAL TREES 389
K.A. Longman, R.M. Manurung and R.R.B. Leakey
Abstract 389
Introduction 390
Flowering experiments 390
Tabebuia pallida
Triplochiton scleroxylon
Other species
Discussion 398
References 399

Section 8: Conclusions

28. REPRODUCTIVE ECOLOGY OF TROPICAL FOREST PLANTS: CONCLUDING REMARKS 403
T.N. Koshoo
Introduction 403
Interface with foresters 405
Conservation forestry
Agroforestry
Industrial forestry
Environmental/revegetation forestry
Biodiversity 408
Minor forest products 409
Reproductive ecology of tropical forest plants

Ecology–economics interface 410
Conclusions 411
