Contents

Introduction
B.L. McMichael and H. Persson

Short review of the present state of root research
L. Kutschera-Mitter

Effect of exogenous factors on water relations in maize roots
T.A. Borisova

The development of absorption and transport systems in the corn root
structural and experimental evidence
M.F. Danilova, Yu.A. Hazel, N.N. Jitneva and M.N. Telepova

Properties of root membrane lipids as related to mineral nutrition
W. Diepenbrock

Composition of root exchange sites in acidic soil solutions
J.E. Dufey, D. Drimmer, I. Lambert and Ph. Dupont

Calcium stimulation of ammonium absorption in plants
L.B. Penn and R.M. Taylor

Effect of the nitrate level on growth and some aspects of energy metabolism
in maize roots
O. Gašparíková, T. Pšenáková, T. Ješko and M. Luxová

Effects of Al$^{3+}$ on seedling growth of silver birch, Scots pine and Norway
spruce at steady state nutrition
A. Göransson and D.T. Eldhuset

Growth of excised maize roots (Zea mays L.) at increasing N-levels
J.M. Greef and G. Geisler

Nitrate uptake in response to soluble carbohydrates from roots and shoots
of young maize plants (Zea mays L.)
J.M. Greef and G. Geisler

Physiological and morphological changes in maize plants under various
flood conditions
G.M. Grinieva

Short term determination of the actual respiration rate of intact plant
roots
H.M. Helal and D. Sauerbeck

Soil and root phosphatase activity and the utilization of inositol
phosphates as dependent on phosphorus supply
H.M. Helal and D. Sauerbeck

Biological weathering of micas in the rhizosphere as related to potassium
absorption by plant roots
Ph. Hinsinger, J.E. Dufey and B. Jaillard

The effect of platinum complexes and other heavy metal salts on root growth
V.B. Ivanov and P.A. Cheltsov

Cytochemical localization of ATPase in root tissues
E.B. Kurkova
Significance of physiological differentiation of root activities among rice plants (Oryza sativa L.)
K.-L. Lai, C.-R. Hou and Y.-Z. Tsai 120

Water content and cell elongation in protruding and growing roots
N.V. Obroucheva 130

Growth of cereal roots in different concentrations of metal ions
G. Ozolina 136

Effect of soil water and nutrient supply on root characteristics and nutrient uptake of plants
K. Rajkai Vágh 143

Morphology of maize root systems influenced by local supply of nitrate or ammonia
B. Sattelmacher and K. Thoms 149

Ultrastructural features of epidermis and cortex in aerial roots of Bulbophyllum
M.N. Telepova 157

Various forms of root action influencing the availability of soil and fertilizer phosphorus
A. van Diest 164

Input of organic matter to the soil by tree roots
K.A. Vogt, D.J. Vogt and J. Bloomfield 171

Root growth of spruce seedlings cultivated on a lime-rich, acidified soil substrate
I. Al-Windi and H. Persson 191

Root investigations in energy forests on rotavated peat soils in Southern Sweden
A. Brunner 199

Variation in nutrient concentrations of Scots pine roots
H.-S. Helmisaari 204

Below-ground tree productivity of Norway spruce forest: a preliminary report
M. Ivask, K. Lõhmus and E. Rästa 213

Above-ground and below-ground biomass of the herb layer in Slovakia’s forest ecosystems
F. Kubček and V. Šimonovič 218

Effect of aluminium on the roots of Picea abies seedlings
J. Kulhavy and M. Červená 225

The influence of climatic and soil physical conditions on growth and morphology of Norway spruce roots
K. Lõhmus, R. Lasn and T. Oja 233

Effect of acid pollutants on the development of the root systems of Norway spruce (Picea abies L. Karst.)
O. Mauer and E. Palátová 240

Root-shoot balance of Hevea planting materials
H. Othman, S.K. Leong and Z. Samsuddin 248
Effect of increasing Ca on NH₄ absorption and growth of Norway spruce (Picea abies L.) seedlings
H. Persson, I. Al-Windi, G. Gobran and L. Fenn 257

Combined effects of aluminium and nitrogen forms on root growth of ten ecologically distinct plant species
M.W. Rode and M. Runge 263

Biomass of roots in natural oak-hornbeam ecosystems
V. Šimonovič 273

Estimation of rate transfer from dead rootlets to organic matter in acid forest soil
H.J. Van Praag 280

Quantification of edaphic factors influencing root growth
M. Voško 285

The importance of mycorrhiza for roots
K.G. Mukerji, R. Jagpal, M. Bali and R. Rani 290

VAM fungi in reforestation
R. Jagpal and K.B. Mukerji 309

Microbial ecology of the rhizosphere microflora of Crotalaria retusa L. in relation to flyash
A. Panigrahi and K.G. Mukerji 314

Influence of waterlogging on root distribution, fine-root biomass and mycorrhizal number in Norway spruce
N. Rastin 319

Correlation between root morphogenesis, VA mycorrhizal infection and phosphorus nutrition
A. Trotta, C. Carminati, L. Schellenbaum, A. Fusconi and G. Berta 333

Nitrogen nutrition and mycorrhiza development
H. Wallander 340

Root research in natural ecosystems
R. Schubert 344

C-14 translocation to the below ground subsystem in a temperate humid grassland (Argentina)
U.M. Doll 350

Spatial root types
E. Lichtenegger and L. Kutschera-Mitter 359

Influence of environmental conditions on anatomic structures of roots of cirsium acaule
M. Sobotik 366

Productivity in grasslands of the U.S.S.R.
A.A. Titlyanova 374

Root functions in agricultural systems
M. Van Noordwijk and P. De Willigen 381

Interaction between VA mycorrhizal fungi and root microflora of jute
M. Bali and K.G. Mukerji 396
Effect of tillage practice on maize (Zea mays L.) root distribution  
S.A. Barber and J.L. Kovar 402

Factors affecting the growth and distribution of winter wheat roots under UK field conditions  
P.B. Barraclough, A.H. Weir and H. Kuhlmann 410

The effects of waterlogging on rooting of soft red winter wheat  
J.E. Box Jr. 418

Root growth of kiwifruit vines and the impact of canopy manipulations  
J.G. Buwalda 431

Effect of soil CaCO content on root growth and nutrient uptake  
G. Fuleky and S.A. Hussain 442

Effects of soil volume on root growth and nutrient uptake  
G. Fuleky and H.J. Nooman 446

Root exudation in Beta vulgaris: a comparison with Zea mays  
A. Guckert, M. Chavanon, M. Mench, J.L. Morel and G. Villemin 449

Morphological aspects of root systems in rice plants  
J. Harada and K. Yamazaki 456

Responses of growth, shoot to shoot ratio and cytokinin concentrations in root tissue of two barley varieties, differing in their salt resistance  
D. Kuiper and E. Steingrüber 463

The influence of cultivation on root growth of winter barley  
L.A. Mackie-Dawson and L.A.F. Morrice 472

Rooting depth and spatial arrangement of roots in winter wheat  
J. Masse, F. Tardieu and C. Colnenne 480

The effect of non-ionic and ionic detergents on the growth of cucumber seedlings  
N.E. Mishustina, D.B. Vakmistrov, O.A. Zverkova and E.Yu. Koroleva 487

Effect of VA mycorrhiza inoculated on roots of Zea mays  
R. Rani and K.G. Mukerji 494

Mycorrhizal colonization in roots of tetraploid and hexaploid wheat species  
Suvercha and K.G. Mukerji 498

Spatial arrangement of maize roots in the field  
F. Tardieu 506

Review of quantitative root length data in agriculture  
M. Van Noordwijk and G. Brouwer 515

Peltophorum pterocarpa (Dc.) back (Caesalpiniaceae), a tree with a root distribution suitable for alley cropping on acid soils in the humid tropics  
M. Van Noordwijk, K. Hairiah, M.S. Syekhfani and E.N. Flach 526

Castor roots in a vertic inceptisol  
G.D. Smith, L.S. Jangawad and K.L. Srivastava 533

The effect of root/shoot ratios on the water relationship of sorghum  
(Sorghum bicolor L. Moench)  
E.B. So and K.S. Jayasekara 543
Some methods of root investigations

Root length density from core-break observations: sources of error
W.L. Bland 565

Digital picture processing applied to the evaluation of plant root dynamics
M. Casarin, S. Jacquey, A. Fouere and Ph. Girardin 570

A technique for the study of plant growth and dry matter partitioning at steady state nutrition
T. Ericsson and A. Göransson 576

Visual estimation of root length along observation tubes
J. Groenwold and J. Vos 583

Root structure of corn (Zea mays L.). 1. Parameters describing the structure
M.O. Jordan and L. Pages 587

A plant growth system to facilitate root observations and treatments
W.A. Kendall and K.T. Leath 597

Comparison of in situ root observations with rhizoscope, video recording and endoscope
Ph. Girardin, R. Trendel, S. Jacquey, M. Casarin, M. Goss and A. Fouere 603

Root structure of corn (Zea mays L.). 2. A three-dimensional simulation model
L. Pages and M.O. Jordan 608

Modelling the root system architecture: experimental data on maize root systems geometry
S. Pellerin, F. Tardieu and F. Tricot 620

An intermittent aeroponics system adaptable to root research
L.A. Peterson, N.T. Welander and O. Hellgren 628

A rapid screening method to describe genetic variability in root development of cereals
K.-U. Schwarz and G. Geisler 632

Genetic variability in root development of spring barley (H. vulgare L.) and oats (A. sativa L.)
K.U. Schwarz, J. Léon and G. Geisler 639
