Inositol Phosphates and Derivatives

Synthesis, Biochemistry, and Therapeutic Potential

Allen B. Reitz, Editor
R.W. Johnson Pharmaceutical Research Institute

Developed from a symposium sponsored by the Division of Carbohydrate Chemistry at the 200th National Meeting of the American Chemical Society, Washington, D.C., August 26–31, 1990

American Chemical Society, Washington, DC 1991
## Contents

About the Cover .................................................................................................................. x

Preface ................................................................................................................................ xi

1. Biochemistry, Stereochemistry, and Nomenclature of the Inositol Phosphates ........................................................................................................ 1
   R. Parthasarathy and F. Eisenberg, Jr.

2. Phosphoinositides and Their Stimulated Breakdown ................................................. 20
   B. W. Agranoff and S. K. Fisher

3. Enantiospecific Synthesis and Ca\(^{2+}\)-Release Activities of Some Inositol Polyphosphates and Their Derivatives ........................................... 33
   Clinton E. Ballou and Werner Tegge

4. Synthesis of Inositol Polyphosphates and Their Derivatives ..................................... 43
   Shoichiro Ozaki and Yutaka Watanabe

5. Synthesis of myo-Inositol Polyphosphates ................................................................. 66
   Joseph P. Vacca, S. Jane de Solms, Steven D. Young, Joel R. Huff, David C. Billington, Raymond Baker, Janusz J. Kulagowski, and Ian M. Mawer

6. Preparation of Optically Active myo-Inositol Derivatives as Intermediates for the Synthesis of Inositol Phosphates ........................................... 86
   Trupti Desai, Alfonso Fernandez-Mayoralas, Jill Gigg, Roy Gigg, Carlos Jaramillo, Sheila Payne, Soledad Penades, and Nathalie Schnetz

7. Pharmacological Effects of D-my o-Inositol-1,2,6-Trisphosphate ................................ 103
   M. Sirén, L. Linné, and L. Persson
8. Synthesis of New myo-Inositol Derivatives Containing Phosphate, Sulfate, and Sulfonamido Groups
   Peter Westerduin and Constant A. A. van Boeckel

9. Chemical Modifications of Inositol Trisphosphates: Tritiated, Fluorinated, and Phosphate-Tethered Analogues
   Glenn D. Prestwich and James F. Marecek

    Stephen V. Ley, Alison J. Redgrave, and Lam Lung Yeung

11. Enantiospecific Synthesis of Inositol Polyphosphates, Phosphatidylinositides, and Analogues from (−)-Quinic Acid
    J. R. Falck and Abdelkrim Abdali

12. Synthesis and Complexation Properties of Inositol-Phosphates
    V. I. Shvets, A. E. Stepanov, L. Schmitt, B. Spiess, and G. Schlewer

13. Phosphorothioate Analogues of Phosphatidylinositol and Inositol 1,2-Cyclic Phosphate: Application to the Mechanism of Phospholipase C
    Karol S. Bruzik, Gialih Lin, and Ming-Daw Tsai

14. Phosphorothioate Analogues of D-mylo-Inositol 1,4,5-Trisphosphate: Chemistry and Biology
    Barry V. L. Potter

15. Synthesis and Biological Evaluation of Inositol Derivatives as Inhibitors of Phospholipase C
    Franz Kaufmann, D. James R. Massy, Wolfgang Pirson, and Pierre Wyss

16. Synthesis and Biological Evaluation of Inositol Phospholipid Analogues
    John G. Ward and Rodney C. Young
