ADVANCES IN
BIOMEDICAL ALCOHOL RESEARCH
Proceedings of the 5th ISBRA/RSA Congress
Toronto, Canada
17–22 June 1990

Edited by
H. KALANT, J. M. KHANNA and Y. ISRAEL

Published as Supplement No. 1 (1991) to the
journal Alcohol and Alcoholism

PERGAMON PRESS
Oxford • New York
Seoul • Tokyo
CONTENTS

Preface vii

INVITED LECTURES

B. Tabakoff and P.L. Hoffman
Recent advances in alcohol research — 1990 (ISBRA Presidential address) 1

D.H. Van Thiel
Gender differences in the susceptibility and severity of alcohol-induced liver disease
(RSA Presidential address) 9

R.G. Worton
Molecular genetic approaches to the study of individual risk in alcoholism 19

K. Poikolainen
Epidemiologic assessment of population risks and benefits of alcohol use 27

D.L. Alkon, L.D. Matzel and C. Collin
Molecular mechanisms of memory and drug dependence 35

S.I. Dworkin and J.E. Smith
Mechanisms of reinforcement and their relation to future developments in pharmacotherapy 39

D.C. Drummond
Comprehensive strategies for the therapy of alcoholism: where have we gone wrong? 49

S.W. French
The mechanism of organ injury in alcoholics: implications for therapy 57

E. Gordis
Science and social policy problems: resolution of some, creation of others 65

MOLECULAR BIOLOGY OF ALCOHOL AND ACETALDEHYDE METABOLIZING SYSTEMS

H.J. Edenberg
Expression of the human alcohol dehydrogenase genes 79

A.E.O. Trezise, B. Cheung, R.S. Holmes and I.R. Beacham
Molecular genetics and evolution of baboon liver alcohol dehydrogenase 85

H. Weiner, T.T.Y. Wang and J. Farrés
Molecular biological studies on liver mitochondrial aldehyde dehydrogenase 91

F.J. Gonzalez, T. Ueno, M. Umeno, B.J. Song, R.L. Veech and H.V. Gelboin
Microsomal ethanol oxidizing system: transcriptional and posttranscriptional regulation of
cytochrome P450, CYP2E1 97

L.G. Lange
Non-oxidative ethanol metabolism by fatty acid ethyl ester synthase 103
GENETIC STUDIES IN ALCOHOLISM

A — Experimental studies

T.J. Phillips, S. Burkhart-Kasch and J.C. Crabbe
Locomotor activity response to chronic ethanol treatment in selectively bred FAST and SLOW mice

K. Kiianmaa, K. Stenius and J.D. Sinclair
Determinants of alcohol preference in the AA and ANA rat lines selected for differential ethanol intake

T.-K. Li, L. Lumeng, D.P. Doolittle and L.G. Carr
Molecular associations of alcohol-seeking behavior in rat lines selectively bred for high and low voluntary ethanol drinking

R. Haber and D. Goldman
Expression of mouse serotonin transporter RNA in Xenopus laevis oocytes

B — Human studies

J. Kaprio, R.J. Rose, K. Romanov and M. Koskenvuo
Genetic and environmental determinants of use and abuse of alcohol: the Finnish twin cohort studies

K. Romanov, J. Kaprio, R.J. Rose and M. Koskenvuo
Genetics of alcoholism: effects of migration on concordance rates among male twins

A.C. Heath and N.G. Martin
The inheritance of alcohol sensitivity and of patterns of alcohol use

M.A. Schuckit
A 10-year follow-up of sons of alcoholics: preliminary results

R.O. Pihl and J.B. Peterson
A biobehavioural model for the inherited predisposition to alcoholism

E.J. Devor, C.R. Cloninger, P.L. Hoffman and B. Tabakoff
Adenylate cyclase activity in the families of alcoholics is controlled by a single major gene

EFFECTS OF ALCOHOL ON NEURONAL MEMBRANES

A — Neurotransmitters, receptors and ion channels

F.F. Weight, D.M. Lovinger and G. White
Alcohol inhibition of NMDA channel function

P.L. Hoffman and B. Tabakoff
The contribution of voltage-gated and NMDA receptor-gated calcium channels to ethanol withdrawal seizures

J.J. Woodward, L. Brown and R.A. Gonzales
Modulation of ethanol-induced inhibition of N-methyl-D-aspartate-stimulated neurotransmitter release by glycine

D.M. Lovinger
Ethanol potentiates ion current mediated by 5-HT3 receptors on neuroblastoma cells and isolated neurons

L.G. Aguayo
Demonstration that ethanol potentiates the GABA_A-activated Cl^- current in central mammalian neurons

S.N. Treistman
Electrophysiological approaches to studying ethanol targets
CONTENTS

N.P. Franks and W.R. Lieb
An anaesthetic-activated potassium channel 197

M. Clark and M. Saeed Dar
In vitro autoradiographic evidence for adenosine modulation of ethanol-induced motor disturbances in rats 203

A. Ebel, M.T. Strosser, M. Felix, J. Kempf and E. Kempf
Are chronic alcohol-induced central vasopressin changes determinant in strain dependency of tolerance in mice? 207

F. Le, P.A. Wilce, I. Cassady, D.A. Hume and B.C. Shanley
Acute administration of ethanol suppresses pentylenetetrazole-induced c-fos expression in rat brain 211

B — Membrane lipids

G.Y. Sun, M. Navidi, F.-G. Yoa and T.-N. Lin
Effects of acute and chronic ethanol administration on phosphoinositide metabolism in mouse brain 215

W.G. Wood, F. Schroeder and A. Murali Rao
Significance of ethanol-induced changes in membrane lipid domains 221

C. Alling, F.D. Rodriguez, L. Gustavsson and P. Simonsson
Continuous and intermittent exposure to ethanol: effect on NG 108-15 cell membrane phospholipids 227

F. Beaugé
Physico-chemical membrane alterations during ethanol intoxication 233

T.F. Taraschi, J.S. Ellingson, N. Janes and E. Rubin
The role of anionic phospholipids in membrane adaptation to ethanol 241

ACETALDEHYDE-PROTEIN ADDUCTS

E. Baraona, U.J. Behrens, X.-L. Ma, R. Hernández-Muñoz, R. Uppal and C.S. Lieber
Contribution of exogenous ethanol and endogenous substrates to acetaldehyde-adduct formation in liver injury 249

S. Worrall, J. de Jersey, B.C. Shanley and P.A. Wilce
Acetaldehyde-modified proteins and associated antibodies in ethanol-fed rats 255

S. Worrall, J. de Jersey, B.C. Shanley and P.A. Wilce
Alcohol abusers exhibit a higher IgA response to acetaldehyde-modified proteins 261

R.C. Lin and L. Lumeng
Formation of the 37KD liver protein–acetaldehyde adduct in vivo and in vitro 265

D.J. Tuma, T. Hoffman and M.F. Sorrell
The chemistry of acetaldehyde–protein adducts 271

M.A. Kolber and H. Terabayashi
Cytotoxic T lymphocytes can be generated against acetaldehyde–modified syngeneic cells 277

ALCOHOL AND ORGAN DAMAGE

A — Mechanisms of cell injury

C.S. Lieber
Biochemical mechanisms of alcohol-induced hepatic injury 283

A.I. Cederbaum
Microsomal generation of reactive oxygen species and their possible role in alcohol hepatotoxicity 291
CONTENTS

D.J. Tuma, C.A. Casey and M.F. Sorrell  
Effects of alcohol on hepatic protein metabolism and trafficking  
297

R.K. Zetterman  
Immunologic abnormalities in alcoholic hepatitis  
305

R. Bühler, K.O. Lindros, K. von Boguslawsky, P. Kärkkäinen, J. Mäkinen and M. Ingelman-Sundberg  
Perivenous expression of ethanol-inducible cytochrome P450 11E1 in livers from alcoholics and chronically ethanol-fed rats  
311

Ethanol-induced focal cell necrosis via microcirculatory disturbance in the perfused rat liver  
317

B. Nalpas, F. Driss, S. Pol, B. Hamelin, C. Housset, C. Brechot and P. Berthelot  
Hepatitis C infection in alcoholics  
321

R. Uppal, A. Rosman, R. Hernández, E. Baraona and C.S. Lieber  
Effects of liver disease on red blood cell acetaldehyde in alcoholics and non-alcoholics  
323

An international study of the relationship between alcohol consumption and postmenopausal estradiol levels  
327

K.M. Parrish and M.C. Dufour  
Drinking patterns and liver cirrhosis mortality  
331

Role of blood ethanol on gastric mucosal injury and gastric hemodynamics  
335

B — Mechanisms of fibrogenesis

C.S. Lieber  
Alcohol and fibrogenesis  
339

P. De Bleser, A. Geerts and E. Wisse  
Role of fat-storing cells in hepatic fibrogenesis. Retinoids as possible therapeutic agents  
345

O. Niemelä, J. Risteli, J.E. Blake, L. Risteli, K.V. Compton and H. Orrego  
Connective tissue metabolism and alcohol intake in alcoholic liver disease  
351

S.W. French, H. Takahashi, K. Wong and C.L. Mendenhall  
Ito cell activation induced by chronic ethanol feeding in the presence of different dietary fats  
357

E. Mezey  
Approaches to treatment of fibrogenesis in alcoholic liver disease  
363

K. Maruyama, I. Okazaki, T. Takagi and H. Ishii  
Formation and degradation of basement membrane collagen  
369

C — Alcohol-related neuropathology

C. Harper and J. Kril  
If you drink your brain will shrink. Neuropathological considerations  
375

A. Torvik  
Wernicke's encephalopathy — prevalence and clinical spectrum  
381

G. Freund and W.E. Ballinger  
Loss of synaptic receptors can precede morphologic changes induced by alcoholism  
385
CONTENTS

R.J. Pentney
Remodeling of neuronal dendritic networks with aging and alcohol 393

M. Berglund
Clinical and physiological implications and correlations 399

M. Ledig, L. Megias-Megias and G. Tholey
Effect of maternal alcohol consumption on nerve cell development in the offspring 403

CENTRAL REGULATION OF ETHANOL INTAKE

W.J. McBride, J.M. Murphy, G.J. Gatto, A.D. Levy, L. Lumeng and T.-K. Li
Serotonin and dopamine systems regulating alcohol intake 411

A.D. Levy, J.M. Murphy, W.J. McBride, L. Lumeng and T.-K. Li
Microinjection of sulpiride into the nucleus accumbens increases ethanol drinking in alcohol-prefering (P) rats 417

L.A. Grupp
The renin–angiotensin system: a multidimensional source of control over alcohol consumption 421

F.R. George and M.C. Ritz
Common mechanisms of reinforcement from alcohol and other drugs 427

A.H. Rezvani, D.H. Overstreet and D.S. Janowsky
Drug-induced reductions in ethanol intake in alcohol preferring and Fawn-Hooded rats 433

F. Fadda, G. Colombo and G.L. Gessa
Genetic sensitivity to effect of ethanol on dopaminergic system in alcohol preferring rats 439

I.P. Anokhina, L.N. Ovchinnikova and I. Yu. Shamakina
Mechanisms of pathological influence of parent alcoholism on the progeny: possible means of prophylaxis 443

EARLY DETECTION AND SECONDARY PREVENTION

H. Stibler, S. Borg and M. Joustra
A modified method for the assay of carbohydrate-deficient transferrin (CDT) in serum 451

B. Nalpas, A. Vassault, R.E. Poupon, S. Pol and P. Berthelot
An overview of serum mitochondrial aspartate aminotransferase (mAST) activity as a marker of chronic alcohol abuse 455

P. Kärkkäinen and M. Salaspuro
β-Hexosaminidase in the detection of alcoholism and heavy drinking 459

J. Persson
Detection and intervention of excessive drinking in somatic outpatient care 465

J. Persson
Early intervention in patients with excessive alcohol consumption: a controlled study 473

J. Chick
Early intervention for hazardous drinking in the general hospital 477

G. Elvy
A concept for problem drinking 481

T.P. Beresford, F.C. Blow, E.M. Hill and K. Singer
When is an alcoholic an alcoholic? 487

N.N. Ivanets and M.I. Lukomskaya
Evaluation of early intervention strategies used in primary health care: a report on the World Health Organization (WHO) project on identification and treatment of persons with harmful alcohol consumption 489
CONTENTS

Psychiatric symptoms and DWI offenders 493

CLINICAL PATTERNS, TREATMENT, EVALUATION AND RELAPSE

M. Windle
Salient issues in the development of alcohol abuse in adolescence 499

R.A. Zucker
Scaling the developmental momentum of alcoholic process via the lifetime alcohol problems score 505

M.A. Schuckit
Importance of subtypes in alcoholism 511

M. Sanchez-Craig, B. Neumann, M. Souza-Formigoni and L. Rieck
Brief treatment for alcohol dependence: level of dependence and treatment outcome 515

R.F. Fuller
Assessment of treatment outcome 519

C.A. Naranjo and K.E. Kadlec
Possible pharmacological probes for predicting and preventing relapse in treated alcoholics 523

H.M. Annis
A cognitive-social learning approach to relapse: pharmacotherapy and relapse prevention counselling 527

R.J. Sokol, L. Chik, S.S. Martier and V. Salari
Morphometry of the neonatal fetal alcohol syndrome face from ‘snapshots’ 531
