Chapter 10 Use of PET to Study Addiction in Humans ...............281
Nora D. Volkow and Joanna S. Fowler

Chapter 11 Inter-Rater Reliability in Positron Emission Tomography Image Analysis ..................297
William E. Semple, Jeannette L. Johnson, and Robert Cohen

Chapter 12 Immunohistochemistry as a Strategy for Investigating the Functional Neuroanatomy of Drug Actions in the Brain .........................317
Nathan M. Appel

Chapter 13 In Situ Hybridization Histochemistry ....................337
Martin K.-H. Schafer, James P. Herman, and Stanley J. Watson

Chapter 14 Identifying and Localizing Gene Expression Important for the Actions of Abused Drugs ............379
George R. Uhl

Chapter 15 Advanced Electrophysiological Imaging Techniques for Studying Drug Effects .................389
Scott E. Lukas

Index .................................................................405
