Lippincott's Illustrated Reviews: Pharmacology

editors
Richard A. Harvey, Ph.D.
Professor of Biochemistry
Department of Biochemistry
University of Medicine and Dentistry of New Jersey
Robert Wood Johnson Medical School
Piscataway, New Jersey

Pamela C. Champe, Ph.D.
Associate Professor of Biochemistry
Department of Biochemistry
University of Medicine and Dentistry of New Jersey
Robert Wood Johnson Medical School
Piscataway, New Jersey

contributing authors
Mary J. Mycek, Ph.D.
Adjunct Professor of Pharmacology
Department of Pharmacology
University of Medicine and Dentistry of New Jersey
New Jersey Medical School
Newark, New Jersey

Sheldon B. Gertner, Ph.D.
Interim Chairman
Department of Pharmacology
University of Medicine and Dentistry of New Jersey
New Jersey Medical School
Newark, New Jersey

Maria Menna Perper, Ph.D.
Adjunct Assistant Professor of Psychiatry
Department of Psychiatry
University of Medicine and Dentistry of New Jersey
Robert Wood Johnson Medical School
Piscataway, New Jersey

Brief Contents

UNIT I: Introduction to Pharmacology

Chapter 1: Absorption, Distribution, and Elimination of Drugs  1
Chapter 2: Pharmacokinetics and Drug Receptors  15

UNIT II: Drugs Affecting the Autonomic Nervous System

Chapter 3: The Autonomic Nervous System  25
Chapter 4: Cholinergic Agonists  35
Chapter 5: Cholinergic Antagonists  45
Chapter 6: Adrenergic Agonists  55
Chapter 7: Adrenergic Antagonists  71

UNIT III: Drugs Affecting the Central Nervous System

Chapter 8: Treatment of Parkinson's Disease  83
Chapter 9: Anxiolytic and Hypnotic Drugs  91
Chapter 10: CNS Stimulants  101
Chapter 11: Anesthetics  109
Chapter 12: Antidepressant Drugs  119
Chapter 13: Neuroleptic Drugs  127
Chapter 14: Opioid Analgesics and Antagonists  133
Chapter 15: Drugs Used to Treat Epilepsy  143

UNIT IV: Drugs Affecting the Cardiovascular System

Chapter 16: The Treatment of Congestive Heart Failure  151
Chapter 17: Antiarrhythmic Drugs  161
Chapter 18: Antianginal Drugs  171
Chapter 19: Antihypertensive Drugs  175
Chapter 20: Drugs Affecting Blood  185
Chapter 21: Antihyperlipidemic Drugs  199

UNIT V: Drugs Affecting Other Organ Systems

Chapter 22: Drugs Affecting the Respiratory System  207
Chapter 23: Diuretic Drugs  211
Chapter 24: Gastrointestinal Drugs  223
Chapter 25: Hormones of the Pituitary and Thyroid  229
Chapter 26: Insulin and Oral Hypoglycemic Drugs  235
Chapter 27: Steroid Hormones  243

UNIT VI: Chemotherapeutic Drugs

Chapter 28: Principles of Antimicrobial Therapy  259
Chapter 29: Folate Antagonists  265
Chapter 30: Inhibitors of Cell Wall Synthesis  273
Chapter 31: Protein Synthesis Inhibitors  285
Chapter 32: Quinolones, Urinary Tract, and Antitubercular Agents  297
# Expanded Contents

## UNIT I: Introduction to Pharmacology

**Chapter 1: Absorption, Distribution, and Elimination of Drugs**  
1. Overview 1  
2. Routes of Drug Administration 1  
3. Absorption of Drugs 3  
4. Bioavailability 4  
5. Drug Distribution 6  
6. Volume of Distribution 7  
7. Binding of Drugs to Plasma Proteins 10  
8. Drug Metabolism 11

**Chapter 2: Pharmacokinetics and Drug Receptors**  
1. Overview 15  
2. Kinetics of Intravenous Infusion 15  
3. Kinetics of Fixed-Dose, Fixed-Time Interval Regimens 17  
4. Dose-Response Quantitation 18  
5. Therapeutic Index 20  
6. Drug Elimination 21

## UNIT II: Drugs Affecting the Autonomic Nervous System

**Chapter 3: The Autonomic Nervous System**  
1. Overview 25  
2. Introduction to the Nervous System 25  
3. Chemical Signaling Between Cells 29  
4. Second Messenger Systems 31

**Chapter 4: Cholinergic Agonists**  
1. Overview 35  
2. The Cholinergic Neuron 35  
3. Direct-acting Cholinergic Agonists 39  
4. Anticholinesterases (Reversible) 41  
5. Anticholinesterases (Irreversible) 42

**Chapter 5: Cholinergic Antagonists**  
1. Overview 45  
2. Antimuscarinic Agents 45  
3. Ganglionic Blockers 48  
4. Neuromuscular Blocking Drugs 49

**Chapter 6: Adrenergic Agonists**  
1. Overview 55  
2. The Adrenergic Neuron 55  
3. Characteristics of Adrenergic Agonists 59  
4. Direct-acting Adrenergic Agonists 61  
5. Indirect-acting Adrenergic Agonists 67  
6. Mixed-action Adrenergic Agonists 68
Chapter 7: Adrenergic Antagonists  71
I. Overview  71
II. α-Adrenergic Blocking Agents  71
III. β-Adrenergic Blocking Agents  74
IV. Drugs Affecting Neurotransmitter Release or Uptake  79

UNIT III: Drugs Affecting the Central Nervous System

Chapter 8: Treatment of Parkinson’s Disease  83
I. Overview of the Central Nervous System  83
II. Neurotransmission in the CNS  83
III. Synaptic Potentials  84
IV. Overview of Parkinson’s Disease  85
V. Drugs Used in Parkinson’s Disease  86

Chapter 9: Anxiolytic and Hypnotic Drugs  91
I. Overview  91
II. Benzodiazepines  91
III. Other Anxiolytic Agents  95
IV. Barbiturates  96
V. Nonbarbiturate Sedatives  98

Chapter 10: CNS Stimulants  101
I. Overview  101
II. Psychomotor Stimulants  101
III. Convulsants and Respiratory Stimulants  107
IV. Hallucinogens  107

Chapter 11: Anesthetics  109
I. Overview  109
II. Depth of Anesthesia  109
III. Kinetics of Anesthesia  110
IV. Molecular Mechanism of Anesthesia  111
V. General Anesthetics: Inhaled  112
VI. General Anesthetics: Intravenous  114
VII. Combination Anesthetics  115
VIII. Local Anesthetics  116
IX. Preanesthetic Medications  116
X. Muscle Relaxants  117

Chapter 12: Antidepressant Drugs  119
I. Overview  119
II. Tricyclic/Polycyclic Antidepressants  119
III. Serotonin-Uptake Inhibitors  122
IV. Monoamine Oxidase Inhibitors  123
V. Lithium Salts  125

Chapter 13: Neuroleptic Drugs  127
I. Overview  127
II. Schizophrenia  127
III. Neuroleptic Drugs  127

Chapter 14: Opioid Analgesics and Antagonists  133
I. Overview  133
II. Opioid Receptors  133
III. Strong Agonists 134
IV. Moderate Agonists 139
V. Mixed Agonist-antagonists 140
VI. Antagonists 140
VII. Opioid Peptides (Opiopeptins) 141

Chapter 15: Drugs Used to Treat Epilepsy 143
I. Overview of Epilepsy 143
II. Antiepileptic Drugs 145

UNIT IV: Drugs Affecting the Cardiovascular System

Chapter 16: Treatment of Congestive Heart Failure 151
I. Overview of Congestive Heart Failure 151
II. Physiology of Muscle Contraction 151
III. Cardiac Glycosides 155
IV. Alternative Therapies in Heart Failure 158

Chapter 17: Antiarrhythmic Drugs 161
I. Overview 161
II. Causes of Arrhythmias 161
III. Class I Antiarrhythmic Drugs 162
IV. Class II Antiarrhythmic Drugs 167
V. Class III Antiarrhythmic Drugs 167
VI. Class IV Antiarrhythmic Drugs 168
VII. Other Antiarrhythmic Drugs 170

Chapter 18: Antianginal Drugs 171
I. Overview 171
II. Organic Nitrates 171
III. Calcium-Channel Blockers 172
IV. $\beta$-Adrenergic Blockers 174

Chapter 19: Antihypertensive Drugs 175
I. Overview 175
II. Etiology of Hypertension 175
III. Mechanisms for Controlling Blood Pressure 175
IV. Treatment Strategies 176
V. Antihypertensive Drugs 179
VI. Hypertensive Emergency 183

Chapter 20: Drugs Affecting Blood 185
I. Overview 185
II. Normal Response to Vascular Trauma 185
III. Platelet Activation 186
IV. Blood Coagulation 188
V. Platelet Aggregation Inhibitors 188
VI. Anticoagulants 189
VII. Thrombolytic Drugs 192
VIII. Drugs Used to Treat Bleeding 195
IX. Agents Used to Treat Anemia 196

Chapter 21: Antihyperlipidemic Drugs 199
I. Overview 199
II. Hyperlipidemias 199
III. Drugs that Lower Serum Lipoprotein Concentration 202
UNIT V: Drugs Affecting Other Organ Systems

Chapter 22: Drugs Affecting the Respiratory System 207
I. Overview 207
II. Drugs Used to Treat Asthma 207
III. Drugs Used to Treat Rhinitis 209
IV. Drugs Used to Treat Cough 210

Chapter 23: Diuretic Drugs 211
I. Overview 211
II. Regulation of Fluid and Electrolytes by the Kidneys 211
III. Carbonic Anhydrase Inhibitors 214
IV. Loop or High-Ceiling Diuretics 215
V. Thiazides and Related Agents 217
VI. Potassium-sparing Diuretics 219
VII. Osmotic Diuretics 221

Chapter 24: Gastrointestinal Drugs 223
I. Overview 223
II. Drugs Used to Treat Peptic Ulcers 223
III. Laxatives 227

Chapter 25: Hormones of the Pituitary and Thyroid 229
I. Overview 229
II. Hypothalamic and Pituitary Hormones 229
III. Thyroid Hormones 231

Chapter 26: Insulin and Oral Hypoglycemic Drugs 235
I. Overview 235
II. Metabolic Roles of Insulin and Glucagon 235
III. Diabetes Mellitus 235
IV. Insulin 237
V. Insulin Preparations 238
VI. Oral Hypoglycemic Agents: Sulfonyureas 240

Chapter 27: Steroid Hormones 243
I. Overview 243
II. Estrogens 243
III. Progestins 246
IV. Oral Contraceptives 248
V. Androgens 250
VI. Adrenal Corticosteroids 252

UNIT VI: Chemotherapeutic Drugs

Chapter 28: Principles of Antimicrobial Therapy 259
I. Overview 259
II. Selection of Antimicrobial Agents 259
III. Bacteriostatic Versus Bactericidal Drugs 261
IV. Chemotherapeutic Spectra 261
V. Combinations of Antimicrobial Drugs 262
VI. Drug Resistance 262
VII. Prophylactic Antibiotics 263
VIII. Complications of Antibiotic Therapy 263
Chapter 29: Folate Antagonists 265
I. Overview 265
II. Sulfonamides 265
III. Trimethoprim 267
IV. Co-Trimoxazole 269

Chapter 30: Inhibitors of Cell Wall Synthesis 273
I. Overview 273
II. Penicillins 273
III. Cephalosporins 279
IV. Other β-Lactam Antibiotics 281
V. β-Lactamase Inhibitors 282
VI. Other Agents Affecting the Cell Wall 283

Chapter 31: Protein Synthesis Inhibitors 285
I. Overview 285
II. Tetracyclines 285
III. Aminoglycosides 288
IV. Erythromycin 290
V. Chloramphenicol 292
VI. Clindamycin 293
VII. Spectinomycin 294

Chapter 32: Quinolones, Urinary Tract, and Antitubercular Agents 297
I. Overview 297
II. Quinolones 297
III. Urinary Tract Antiseptics 300
III. Chemotherapy of Tuberculosis 301
IV. Chemotherapy of Leprosy 305

Chapter 33: Antifungal Drugs 307
I. Overview 307
II. Drugs for Subcutaneous and Systemic Mycotic Infections 307
III. Drugs for Superficial Mycotic Infections 311

Chapter 34: Antiprotozoal Drugs 313
I. Overview 313
II. Chemotherapy of Amebiasis 313
III. Chemotherapy of Leishmaniasis 316
IV. Chemotherapy of Trypanosomiasis 317
V. Chemotherapy of Toxoplasmosis 320
VI. Chemotherapy of Malaria 320

Chapter 35: Anthelmintic Drugs 325
I. Overview 325
II. Drugs for the Treatment of Nematodes 325
III. Drugs for the Treatment of Trematodes 326
IV. Drugs for the Treatment of Cestodes 327

Chapter 36: Antiviral Drugs 329
I. Overview 329
II. Treatment of Respiratory Viruses 329
III. Treatment of Herpes Virus Infections 331
IV. Treatment for Acquired Immunodeficiency Syndrome (AIDS) 334

Chapter 37: Anticancer Drugs 337
   I. Overview 337
   II. Principles of Cancer Chemotherapy 337
   III. Antimetabolites 341
   IV. Antibiotics 346
   V. Alkylating Agents 349
   VI. Mitotic Spindle Poisons 351
   VII. Hormones 353
   VIII. Other Chemotherapeutic Agents 355

UNIT VII: Anti-inflammatory Drugs and Autacoids

Chapter 38: Anti-inflammatory Drugs 361
   I. Overview 361
   II. Prostaglandins 361
   III. NSAIDs 363
   IV. Non-narcotic Analgesics 371
   V. Slow-acting, Anti-inflammatory Agents 373
   VI. Drugs Employed in the Treatment of Gout 374

Chapter 39: Autacoids and Autacoid Antagonists 379
   I. Overview 379
   II. Prostaglandins 379
   III. Angiotensins 380
   IV. Angiotensin Antagonists 381
   V. The Kinins: Bradykinin and Kallidin 384
   VI. Serotonin and Its Antagonists 384
   VII. Ergot Alkaloids 387
   VIII. Overview of Histamine 388
   IX. Blockers of Histamine H₁ Receptors 390
   X. Blockers of Histamine H₂ Receptors 393
