TEMPORAL CONTROL
OF DRUG DELIVERY

Edited by William J. M. Hrushesky, Robert Langer, and Felix Theeuwes

The New York Academy of Sciences
New York, New York
1991
CONTENTS

Temporally Optimizable Delivery Systems—Sine Qua Non for Molecular Medicine: Preface. By WILLIAM J. M. HRUSHESKY xi

Part I. High Frequency Domain: Physiologic Requirement for Pulsatile Delivery

New Clock Mutations in Drosophila. By AMITA SEHGAL, BERNICE MAN, JEFFREY L. PRICE, LESLIE B. VOSSHALL, and MICHAEL W. YOUNG 1

Dynamic Organization of Endocrine Networks: The Neuroendocrine-Reproductive Axis and the Pineal Gland as Examples. By RUSSEL J. REITER and MARY K. VAUGHAN 11

Physiological Implications of Pulsatile Hormone Secretion. By DAVID R. MATTHEWS 28

Characteristics of Ultradian and Circadian Rhythms of Selected Cardiovascular Variables: Diagnostic and Therapeutic Implications. By F. E. YATES and L. A. BENTON 38

Vagal Mediation of Respiratory Sinus Arrhythmia: Implications for Drug Delivery. By STEPHEN W. PORGES 57

Quantitative Respiratory Sinus Arrhythmia Analysis: A Simple, Noninvasive, Reimbursable Measure of Cardiac Wellness and Dysfunction. By WILLIAM J. M. HRUSHESKY 67

Part II. Circadian Pharmacodynamics

Concepts of Circadian Chronopharmacology. By ALAIN E. REINBERG 102

Chronotherapeutics: Pharmacokinetic Constraints and Opportunities. By GERHARD LEVY 116

Chronophysiologic Determinants of Asthma. By GILBERT E. D’ALONZO and MICHAEL H. SMOLENSKY 123

Physiological Factors in Drug Absorption. By S. S. DAVIS 140

Circadian Dynamics of Gastric Acid Secretion and Pharmacodynamics of H2 Receptor Blockade. By JOHN G. MOORE 150

* This volume is the result of a conference entitled Temporal Control of Drug Delivery, held from February 26 to February 28, 1990 in New York, New York and sponsored by The New York Academy of Sciences.
Circadian Dynamics of Coagulation and Chronopathology of Cardiovascular and Cerebrovascular Events: Future Therapeutic Implications for the Treatment of These Disorders? By H. DECOUSUS, C. BOISSIER, B. PERPOINT, Y. PAGE, P. MISMETTI, S. LAPORTE, B. TARDY, and P. QUENEAU .......................................................... 159

Chronopharmacokinetics and Chronopharmacodynamics of Cardiovascular Active Drugs: Propranolol, Organic Nitrates, Nifedipine. By BJÖRN LEMMER, BERNHARD SCHEIDEL, and SUSANNE BEHNE .......................... 166

Part III. Circadian Dependence of Anticancer Drug Therapeutic Index

The Potential of Using the Natural Rhythmicity of Cell Proliferation in Improving Cancer Chemotherapy in Rodents. By LAWRENCE E. SCHEVING, TIEN H. TSAI, LAWRENCE A. SCHEVING, and RITCHIE J. FEUERS ................................................................. 182

The Multifrequency (Circadian, Fertility Cycle, and Season) Balance between Host and Cancer. By WILLIAM J. M. HRUSHESKY .......................................................... 228

Circadian and Ultradian Cytokinetic Rhythms of Spontaneous Human Cancer. By ROBERT R. KLEVECZ and PATRICIA S. BRALY ......................................................... 257

The Effect of Surgical Timing within the Fertility Cycle on Breast Cancer Outcome. By AVRUM BLUMING and WILLIAM J. M. HRUSHESKY ................................................. 277

The Therapeutic Index of Cytotoxic Chemotherapy Depends upon Circadian Drug Timing. By REINHARD VON ROEMELING ................................................................. 292

When Should the Immune Clock Be Reset?: From Circadian Pharmacodynamics to Temporally Optimized Drug Delivery. By FRANCIS LEVI, CHANTAL CANON, MARIO DIPALMA, IRÈNE FLORENTIN, and JEAN-LOUIS MISSET ........................................................................................................ 312

Part IV. Drug Carriers and Drug Delivery: Patterning in Time

Real Time Response Polymeric Delivery Systems. By ROBERT LANGER and JOSEPH KOST ......................................................... 330

Targetable Polymeric Anticancer Drugs: Temporal Control of Drug Activity. By JINDŘICH KOPEČEK ................................................................. 335

Pharmacokinetic Aspects of Arterial Fluoropyrimidine Delivery. By JERRY M. COLLINS ................................................................. 345

Biochemical Basis for Circadian-Dependent Metabolism of Fluoropyrimidines. By GEORGE C. DAHER, BARRY E. HARRIS, ELLEN M. WILLARD, and ROBERT B. DIASIO ................................................................. 350

Signal-Sensitive Release of Contents from Liposomes Bearing Surface-Grafted Polyelectrolyte Chains. By MIZUO MAEDA, ATSUSHI KUMANO, and DAVID A. TIRRELL ........................................................................................................ 362

Penetration of Tumor Tissue by Antibodies and Other Immunoproteins. By TY R. SHOCKLEY, KE LIN, JANICE A. NAGY, RONALD G. TOMPKINS, HAROLD F. DVORAK, and MARTIN L. YARMUSH ........................................................................................................ 367

Drug Delivery by Genetically Engineered Cell Implants. By JAMES A. ZWIEBEL, SCOTT M. FREEMAN, KURT NEWMAN, DAVID DICHOK, UNA S. RYAN, and W. FRENCH ANDERSON ......................... 394

Part V. Complex Single or Multiple Agent Programmable Open- and Closed-Looped Delivery Systems

Overview and Evolution of Therapeutic Systems. By ALEJANDRO ZAFFARONI ................................................................. 405

Temporal Control of Drugs: An Engineering Perspective. By EARL E. BAKKEN and KENNETH HERUTH ....................... 422

Transdermal Delivery of Testosterone with TESTODERM® to Provide a Normal Circadian Pattern of Testosterone. By VIRGIL A. PLACE and KIRSTIN C. NICHOLS ................................................. 441

Electronic Control of Iontophoretic Drug Delivery. By GARY A. LATTIN, RAMA V. PADMANABHAN, and J. BRADLEY PHIPPS .............. 450

Part VI. Panel Discussion. Practical Chronotherapeutics: Opportunities and Concerns

Investigative Protocols for Chronotherapeutics: Basic Requirements and Illustrative Case Histories. By MICHAEL H. SMOLENSKY and GILBERT E. D’ALONZO ......................................................... 465

Panel A: Successful Chronotherapeutics (Drug-Specific Chronotherapy)

Drug Industry and Chronobiology: Achievements and Prospects. By AGOSTINO CARANDENTE and FRANZ HALBERG .............. 484

Chronotherapy of Reversible Airways Disease with Once-Daily Evening Doses of a Controlled-Release Theophylline. By PAUL D. GOLDENHEIM and LIANE K. SCHEIN ............................................. 490

The Evolution of Peptic Ulcer Therapy: A Role for Temporal Control of Drug Delivery. By C. W. WARNER and R. L. McISAAC .......... 504

Successful Drug-Specific Chronotherapy with the H₂ Blocker Famotidine in the Symptomatic Relief of Gastroesophageal Reflux Disease. By THOMAS J. HUMPHRIES, JANET K. ROOT, and KAREN HUFNAGEL ...... 517

Receptor Dynamics as Applied to the Delivery of Sex Steroids. By DAVID H. UPMALIS, MARVIN E. JAFFE, and ROBERT F. CASPER ...... 518
Panel B: Successful Chronotherapeutics
( Drug-Independent Approaches )

Real-Time Compliance Data to Help Define Optimal Drug Regimens. By JOHN URQUHART .......................................................... 522

The Role of Implanted Systems in the Control of Temporal Drug Delivery. By TODD LANGEVIN .................................................. 533

Ambulatory Pumps. By WILLIAM G. WEBSTER .................................. 544

Pulsatile Delivery Systems. By GEORGE W. CREASY and MARVIN E. JAFFE .............................................................. 548

Regulatory Implications of Chronotoxicology and Chronopharmacodynamics. By C. JELLEFF CARR ........................................... 558

Chronobiology: Suggestions for Integrating It into Drug Development. By JOHN G. HARTER and CARL C. PECK ................................ 563

Poster Papers

Praziquantel as Prophylactic in Schistosomiasis: Formulation and Stability Evaluation of a Liposomal Delivery System. By MOSTAFA AKBARIEH, RASHAD TAWASHI, MAMDOUH Ghorab, and MAHFOUZ KASSEM .......................................................... 572

Performance Evaluation of the Molluscicide Activity of Controlled-Release Niclosamide from a Porous Delivery System. By MOSTAFA AKBARIEH, RASHAD TAWASHI, MOHSEM SOLIMAN, EMAN EL-LEITHY, and MAHFOUZ KASSEM .......................................................... 575

Egalet®, a Novel Controlled-Release System. By DANIEL BAR-SHALOM, NIELS BUKH, and TURE KINDT LARSEN ........................................ 578

Controlled Non-Zero-Order Release of Caffeine Out of a Dry Peroral Dosage Form. By R. De NÊVE ................................................................. 584

Pharmacokinetic Study of a Novel Amphotericin B Colloidal Dispersion with Improved Therapeutic Index. By LUKE S. S. GUO, ROBERT M. FIELDING, and DANIEL MUFSON ................................................................. 586

Liposomes Enhance the Oral Availability of Certain Water-Insoluble Drugs. By MICHAEL J. MICKLUS ......................................................... 589

Interaction of a Cationic Protein with Electroactive Polypyrrole/poly(styrene sulfonate) and Poly(N-methylpyrrole)/poly(styrene sulfonate) Films. By LYNETTE A. PREZYNA, GARY E. WNEK, YONG-JIAN QIU, and JOHN R. REYNOLDS ................................................................. 592

Transdermal Delivery of Insulin by Iontophoresis. By YING SUN and HONG XUE ................................................................. 596

Variability in Responsiveness to Environmental Factors in Man: Significance for Evaluation of Drug Effects Given during Different Seasons. By PHILIP COHEN ........................................ 602

Hidden Variables in Drug-Delivery Systems. By ALEKSANDER P. DUBROV 604

Circadian Stage Dependent Variation of Cortisol Related to DNA Synthesis in Human Bone Marrow. By RUNE SMAALAND, KNUST LOTE, OLV SLETVOLD, ROBERT BJERKNES, ASBJORN AAKVAAG, STEIN E. VOLLSET, and OLE D. LAERUM ............................... 605

Differential Temporal Kinetics of Atropine at Central Nervous System versus Cardiac Effect Sites. By EVERETT H. ELLIWOOD, JR., SAMIR K. GUPTA, and ARLENE M. NIKAIDO ............................ 613

Pharmacokinetic Consequences of Spaceflight. By LAKSHMI PUTCHA and NITZA M. CINTRÓN .................................................. 615

Murine Cardiovascular Function during Pregnancy: The Fetus and Placenta as a Closed-Loop Drug-Delivery System. By SALVADOR SÁNCHEZ DE LA PEÑA, SILVIA AZAR, and WILLIAM J. M. HRUSHESKY ... 619

Fractionation and Assay of the Estrogen-Sensitive Growth Regulatory Forms of Murine Alpha Fetoprotein in Amniotic Fluid. By G. J. MIZEJEWSKI and J. F. KEENAN ............................................. 623

Index of Contributors .................................................. 627

Subject Index ......................................................... 629
