CONTENTS

Foreword
R.B. Bryan & D. Oostwoud-Wijdenes
Field and Laboratory Experiments on the Evolution of Microsteps and Scour Channels on Low-angle Slopes 1

J. de Ploey
Gullying and the Age of Badlands: An Application of the Erosional Susceptibility Model Es 31

A. Yair
Climate Change and Environment at the Desert Fringe, Northern Negev, Israel 47

P.D. Jungerius & D. Schoonderbeek
The Use of the Leica Quantimet 970 for Scanning Blowout Development on Sequential Air Photos of the 'Dunes de Slack', N.W. France 59

J. de Lugt & I.A. Campbell
Mass Movements in the Badlands of Dinosaur Provincial Park, Alberta, Canada 75

M.A. Seidl & W.E. Dietrich
The Problem of Channel Erosion into Bedrock 101

O. Slaymaker
Ahnert’s Process-Response Models of Denudation and the Scale Dependence of Sediment Yield Models - An Attempted Reconciliation 125

K.-H. Schmidt
Stepped Pediments in the Henry Mountains, Utah: GILBERT’s Equilibrium Concept and Historical Geomorphology 135

P. Ergenzinger & J. Schmidt
Slope Geometry Resulting from the Spatial Variation of Soil Permeability 151

M.J. Kirkby
An Erosion-limited Hillslope Evolution Model 157

N.J. Cox
Precipitation Statistics for Geomorphologists: Variations on a Theme by Frank Ahnert 189
