# Contents

<i>Chapter 1. Cocaine in the 1990s</i>	1
Prevention: The Best Treatment	3
The Persistence of Substance Abuse	6
The Evolution of Cocaine Trafficking	7
Remaining Challenges	9
<i>Chapter 2. The History of Cocaine</i>	11
The Cocaine "Miracle" of the 19th Century	13
The First Cocaine "Crash"	15
The Decline of Cocaine Use	18
The 1960s	19
The Evolution of Cocaine Use	22
Other Forms of Cocaine	23
The Rise of Polydrug Abuse	24
The Success of Antidrug Campaigns	24
Changes in Youth Attitudes	26
Changes in Adult Attitudes	27
Remaining Challenges	28
The Legalization Debate	29

<i>Chapter 3. The Neurobiology of Cocaine</i>	37
The Role of Reward in Drug Use	39
Stimulant Reinforcement	41
Serotonin and Other Factors in Stimulant Reward	45
Nonpharmacological Factors	46
The Physiological Aspects of Drug Memory	49
The Effects of Varying Routes of Administration	50
The Rewarding Effects of Other Drugs	51
Cannabis Reinforcement	51
Opiate Reinforcement	53
Learning as an Outcome of Reinforcement	55
Withdrawal	56
The Role of Craving in Relapse	64
Other Areas of Interest	67
The Nucleus Accumbens and Ventral Tegmental Area in Reward	67
The Locus Coeruleus in Withdrawal	68
Clinical Implications	71
<i>Chapter 4. The Clinical Manifestations of Cocaine Abuse</i>	81
Acute Effects of Cocaine	82
Chronic Effects of Cocaine	85
Medical Complications of Cocaine Abuse	87
Cardiovascular Complications	87
Respiratory Complications	90
Neurotoxic Effects	91
Impact on Sexuality	92
Cocaine and AIDS	93
Other Adverse Effects	94
Cocaine and Pregnancy	97
Cocaine and Other Psychiatric Disorders	100
Mood Disorders	101
Anxiety Disorders	101
Personality Disorders	102

Dissociative Disorders	103
Eating Disorders	103
The Medical Complications of Polydrug Abuse	104
Routes of Administration	105

### *Chapter 5. Outpatient Treatment* 115

Cocaine Treatment Programs	117
Group Therapy	125
The Role of Twelve-Step (Self-Help) Groups	127
Residential Treatment	128
Follow-Up Care and Family Involvement	131

### *Chapter 6. Inpatient Treatment and Relapse Prevention* 135

The Benefits of Inpatient Care	135
Qualities of an Inpatient Program	139
Relapse Prevention	141
Outcome of Treatment	144
Problems with Cocaine Treatment	145

### *Chapter 7. Pharmacological Treatments* 149

Pharmacological Treatment of Cocaine Craving	152
Bromocriptine	153
Tricyclic Antidepressants (TCAs)	157
Carbamazepine	158
Buprenorphine	159
Naltrexone	160
Miscellaneous Agents	161

### *Chapter 8. The Role of Drug Testing* 167

The Evolution of Drug Testing	170
The "Demographics" of Drug Testing	171
The Most Common Forms of Urinalysis	175
Immunoassay Screens	175

Chromatographic Screens	177
Confirmation Tests	178
Evaluation of Testing Facilities	179

## *Chapter 9. Eating Disorders and Substance Abuse* 183

The Demographics of Eating Disorders	184
Theories behind the Comorbidity of Eating Disorders and Substance Abuse	186
Common Biological Pathways for Eating Disorders and Substance Abuse	189
Treatment Implications	192

## *Chapter 10. Physicians, the Elderly, Adolescents, and Substance Abuse* 197

The Medical Profession	197
Drug Use among Medical Students and Residents	198
Drug Use among Physicians	200
Characteristics of the Impaired Physician	202
Identifying the Impaired Physician	203
Treating the Substance-Abusing Physician	204
The Elderly and Substance Abuse	205
Adolescents and Substance Abuse	206
Promoting Cigarettes to Adolescents	207
Family Strategies in Adolescent Drug Abuse	209
Treating the Adolescent Cocaine User	212
Multiple Substances of Abuse	214
Ecstasy	215
Methamphetamine ("Ice")	217

Index	223
