Human Medicinal Agents from Plants

A. Douglas Kinghorn, Editor
University of Illinois at Chicago

Manuel F. Balandrin, Editor
NPS Pharmaceuticals, Inc.

Developed from a symposium sponsored by the Division of Agricultural and Food Chemistry at the 203rd National Meeting of the American Chemical Society, San Francisco, California, April 5–10, 1992

American Chemical Society, Washington, DC 1993
Contents

Preface .............................................................................................................................................. xi

CURRENT ROLE AND IMPORTANCE
OF PLANT-DERIVED NATURAL PRODUCTS
IN DRUG DISCOVERY AND DEVELOPMENT

1. Plant-Derived Natural Products in Drug Discovery
   and Development: An Overview ................................................................. 2
   Manuel F. Balandrin, A. Douglas Kinghorn,
   and Norman R. Farnsworth

2. Tropical Forest Biodiversity and the Potential
   for New Medicinal Plants ........................................................................ 13
   Alwyn H. Gentry

3. Phytomedicines in Western Europe: Potential Impact
   on Herbal Medicine in the United States .............................................. 25
   Varro E. Tyler

4. Biological and Chemical Diversity and the Search for New
   Pharmaceuticals and Other Bioactive Natural Products ...................... 38
   James D. McChesney

5. The Renaissance of Plant Research
   in the Pharmaceutical Industry .............................................................. 48
   Melanie J. O’Neill and Jane A. Lewis

6. Secondary Metabolism in Plant Tissue Cultures Transformed
   with Agrobacterium tumefaciens and Agrobacterium rhizogenes .......... 56
   G. H. Neil Towers and Shona Ellis
7. Role of Plants in the National Cancer Institute
   Drug Discovery and Development Program ........................................ 80
   Gordon M. Cragg, Michael R. Boyd, John H. Cardellina II,
   Michael R. Grever, Saul A. Schepartz, Kenneth M. Snader,
   and Matthew Suffness

8. Logistics and Politics in Plant Drug Discovery: The Other End
   of the Spectrum .................................................................................. 96
   Djaja Doel Soejarto

9. Simple Bench-Top Bioassays (Brine Shrimp and Potato Discs)
   for the Discovery of Plant Antitumor Compounds: Review
   of Recent Progress ............................................................................. 112
   Jerry L. McLaughlin, Ching-jer Chang, and David L. Smith

10. Taxol, an Exciting Anticancer Drug from Taxus brevifolia:
    An Overview ..................................................................................... 138
    David G. I. Kingston

11. Camptothecin and Analogues: Synthesis, Biological In Vitro
    and In Vivo Activities, and Clinical Possibilities ......................... 149
    Monroe E. Wall and Mansukh C. Wani

12. Antineoplastic Agents and Their Analogues
    from Chinese Traditional Medicine ................................................. 170
    Kuo-Hsiung Lee

13. Novel Strategies for the Discovery of Plant-Derived
    Anticancer Agents ........................................................................... 191
    Geoffrey A. Cordell, Norman R. Farnsworth,
    Christopher W. W. Beecher, Djaja Doel Soejarto,
    A. Douglas Kinghorn, John M. Pezzuto, Monroe E. Wall,
    Mansukh C. Wani, Daniel M. Brown, Melanie J. O'Neill,
    Jane A. Lewis, R. Murray Tait, and Timothy J. R. Harris

14. Cancer Chemopreventive Agents: From Plant Materials
    to Clinical Intervention Trials ......................................................... 205
    John M. Pezzuto
ANTI-INFECTIVE AND ANTIMICROBIAL CHEMOTHERAPEUTIC AGENTS FROM PLANTS

15. National Cancer Institute Intramural Research on Human Immunodeficiency Virus Inhibitory and Antitumor Plant Natural Products ........................................... 218

16. Discovery and Development of Novel Prototype Antibiotics for Opportunistic Infections Related to Acquired Immunodeficiency Syndrome ........................................... 228
   Alice M. Clark and Charles D. Hufford

17. Artemisia annua: From Weed to Respectable Antimalarial Plant ........................................................................ 242
   Daniel L. Klayman

18. Search for Molluscicidal and Larvicidal Agents from Plants .... 256
   M. Maillard, A. Marston, and K. Hostettmann

PROMISING PLANT-DERIVED NATURAL PRODUCTS WITH MULTIPLE BIOLOGICAL ACTIVITIES

19. Algal Secondary Metabolites and Their Pharmaceutical Potential ........................................................................ 276
   Gabriele M. König and Anthony D. Wright

20. Activation of the Isotypes of Protein Kinase C and Other Kinases by Phorbol Esters of Different Biological Activities .... 294
   Fred J. Evans and Nahed M. Hassan

   Larry D. Lawson

22. Rohitukine and Forskolin: Second-Generation Immunomodulatory, Intraocular-Pressure-Lowering, and Cardiotonic Analogues ........................................... 331
   Noel J. de Souza
