Trevor H. Levere

Chemists and Chemistry in Nature and Society
1770–1878

VARIORUM 1994
CONTENTS

Preface ix–xiii

Acknowledgements xiv

THE CHEMICAL REVOLUTION

I Martinus van Marum (1750–1837): The introduction of Lavoisier’s chemistry into the Low Countries 115–134

II Friendship and influence: Martinus van Marum, F.R.S. 113–120

III Relations and rivalry: Interactions between Britain and the Netherlands in eighteenth-century science and technology 42–53

IV Balance and Gasometer in Lavoisier’s chemical revolution 313–332

DR THOMAS BEDDOES: PNEUMATIC CHEMISTRY, MEDICINE, AND POLITICS

V Dr. Thomas Beddoes at Oxford: Radical politics in 1788–1793 and the fate of the Regius Chair in Chemistry 61–69
VI Dr. Thomas Beddoes (1750–1808): Science and medicine in politics and society 187–204

VII Dr. Thomas Beddoes and the establishment of his Pneumatic Institution: A tale of three presidents 41–49

VIII Dr. Thomas Beddoes: The interaction of pneumatic and preventive medicine with chemistry 1–17

THE NINETEENTH CENTURY: AN INTRODUCTION

IX The rich economy of nature: Chemistry in the nineteenth century 189–200

X Elements in the structure of Victorian science, or Cannon revisited 433–449

CHEMICAL PHILOSOPHY: DAVY, COLERIDGE, HEGEL, AND FARADAY

XI Humphry Davy and the idea of glory 247–261

XII S.T. Coleridge: A poet's view of science 33–44

XIII Coleridge, chemistry, and the philosophy of nature 349–379
XIV Hegel and the earth sciences

XV Faraday, electrochemistry, and natural philosophy

XVI Faraday, matter, and natural theology: Reflections on an unpublished manuscript

DEBATES ABOUT THEORY

XVII Affinity or structure: An early problem in organic chemistry

XVIII Gay-Lussac and the problem of chemical qualities

XIX Arrangement and structure: A distinction and a difference

Index 1–6
