INHIBITION OF MATRIX METALLOPROTEINASES: THERAPEUTIC POTENTIAL

Editors and Conference Organizers
ROBERT A. GREENWALD AND LORNE M. GOLUB

CONTENTS

Preface. By ROBERT A. GREENWALD ................................................................. i

Keynote Address: Clinical Importance of Metalloproteinases and Their Inhibitors. By STEPHEN M. KRANE ................................................................. 1

Part I. Overview

The Family of Matrix Metalloproteinases. By J. FREDERICK WOESSNER, JR. ... 11

Evidence for a Triple Helix Recognition Site in the Hemopexin-like Domains of Human Fibroblast and Neutrophil Interstitial Collagenases. By SARAH NETZEL-ARNETT, AMID SALARI, UMESH B. GOLI, and HAROLD E. VAN WART ................................................................. 22

Regulation of Matrix Metalloproteinase Activity. By GILLIAN MURPHY, FRANCES WILLENBROCK, THOMAS CRABBE, MARK O'SHEA, ROBIN WARD, SUSAN ATKINSON, JAMES O'CONNELL, and ANDREW DOCHERTY ... 31

Matrix Metalloproteinase Gene Expression. By LYNN M. MATRISIAN ............. 42

Part II. Tissue Inhibitor of Metalloproteinases—Mechanisms and Applications

Regulation of Tissue Inhibitor of Matrix Metalloproteinase Expression. By CHRISTOPHER M. OVERALL ................................................................. 51

Structure-Function Studies of Mouse Tissue Inhibitor of Metalloproteinases-1. By DAVID T. DENHARDT, SHYAMALA RAJAN, and SUSAN E. WALTHER ................................................................. 65

Role of TIMP and MMP Inhibition in Preventing Connective Tissue Breakdown. By TIM CAWSTON, TRACY PLUMPTON, VALERIE CURRY, ALISON ELLIS, and LIZ POWELL ................................................................. 75

This volume contains papers presented at a conference entitled Inhibition of Matrix Metalloproteinases: Therapeutic Potential, which was sponsored by the New York Academy of Sciences and the Long Island Jewish Medical Center and held in Tampa, Florida on January 19–22, 1994.
Analysis of the TIMP-1/FIB-CL Complex. By M. KIRBY BODDEN, L. JACK WINDSOR, NANCY C. M. CATERINA, AUDRA YERMOVSKY, BENTE BIRKEDAL-HANSEN, GRAZYNA GALAZKA, JEFFREY A. ENGLER, and HENNING BIRKEDAL-HANSEN

Part III. Tetracyclines—Dental

A Non-Antimicrobial Tetracycline Inhibits Gingival Matrix
Metalloproteinases and Bone Loss in Porphyromonas gingivalis-induced Periodontitis in Rats. By LORNE M. GOLUB, R. T. EVANS, T. F. McNAMARA, H. M. LEE, and NUNGAVARUM S. RAMAMURTHY

Effects of Tetracyclines on Neutrophil, Gingival, and Salivary Collagenases.
A Functional and Western-Blot Assessment with Special Reference to Their Cellular Sources in Periodontal Diseases. By TIMO SORSA, YANLI DING, TUULA SALO, ANNELI LAUHIO, OLLI TERONEN, TUULA INGMAN, HARUO OHTANI, NORIAKI ANDOH, SATOSHI TAKEHA, and YRJÖ T. KONTTINEN

Clinical Experiences with Tetracyclines in the Treatment of Periodontal Diseases. By SEBASTIAN G. CIANCIO

Doxycycline and Chemically Modified Tetracyclines Inhibit Gelatinase A (MMP-2) Gene Expression in Human Skin Keratinocytes. By VELI-JUKKA UITTO, JAMES D. FIRTH, LESLIE NIP, and LORNE M. GOLUB

Collagenolytic Enzymes in Gingival Crevicular Fluid as Diagnostic Indicators of Periodontitis. By C. A. G. McCulloch

Modulation of Bone Resorption by Tetracyclines. By BARRY R. RIFKIN, ANTHONY T. VERNILLO, LORNE M. GOLUB, and NUNGAVARUM S. RAMAMURTHY

Part IV. Tetracyclines—Medical

Treatment of Destructive Arthritic Disorders with MMP Inhibitors. Potential Role of Tetracyclines. By ROBERT A. GREENWALD

Insights into the Natural History of Osteoarthritis Provided by the Cruciate-Deficient Dog. An Animal Model of Osteoarthritis. By KENNETH D. BRANDT

Application of Peptide-Based Matrix Metalloproteinase Inhibitors in Corneal Ulceration. By ROBERT D. GRAY and CHRISTOPHER A. PATERSON

Part V. MMPs and Inhibitors in Cancer/Metastasis

Clinical Trials of a Low Molecular Weight Matrix Metalloproteinase Inhibitor in Cancer. By PETER D. BROWN

Matrix Metalloproteinases and Their Inhibitors in Tumor Progression. By YVES A. DE CLERCK, HIROYUKI SHIMADA, SHIRLEY M. TAYLOR, and KEITH E. LANGLEY

TIMP-2 Expression Modulates Human Melanoma Cell Adhesion and Motility. By JILL M. RAY and WILLIAM G. STETLER-STEVenson
Plasma Assay of Matrix Metalloproteinases (MMPs) and MMP-Inhibitor Complexes in Cancer. Potential Use in Predicting Metastasis and Monitoring Treatment. By STANLEY ZUCKER, RITA M. LYSIK, HOSEIN M. ZARRABI, UTE MOLL, SIMON P. TICKLE, WILLIAM STETLER-STEVENSON, TERRY S. BAKER, and ANDREW J. P. DOCHERTY ........................................ 248

Inhibition of Tumor Angiogenesis. By ERIC P. SIPOS, RAFAEL J. TAMARGO, JON D. WEINGART, and HENRY BREM .............................................................. 263

Round Table Discussion: Guidelines for Clinical Trial Design for Evaluation of MMP Inhibitors. By ROBERT A. GREENWALD ............................................. 273

Part VI. Other Inhibitors

Inhibition of Angiogenesis by Anthracyclines and Titanocene Dichloride. By MICHAEL E. MARAGOUDAKIS, PLATON PERISTERIS, ELEFTHERIA MISSIRLIS, ALEXIS ALETAS, PARASKEVI ANDRIOPOULOU, and GEORGE HARALABOPOULOS .......................................................... 280

Interaction of α2-Macroglobulin with Matrix Metalloproteinases and Its Use for Identification of Their Active Forms. By HIDEAKI NAGASE, YOSHIFUMI ITOH, and SHARON BINNER ............................................................. 294

Low Molecular Weight Inhibitors in Corneal Ulceration. By RICHARD E. GALARDY, MARIE E. CASSABONNE, CARLANNE GIESE, JAMES H. GILBERT, FRANCE LAPIERRE, HENRY LOPEZ, MARY E. SCHAEPFER, ROBERT STACK, MICHAEL SULLIVAN, BRENT SUMMERS, ROB TRESSLER, DAVE TIRRELL, JENNIFER WEE, SCOTT D. ALLEN, JOHN J. CASTELLOT, JOHN P. BARLETTA, GREGORY S. SCHULTZ, LEONARDO A. FERNANDEZ, SUSAN FISHER, TIAN-YI CUI, HARALD G. FOELLMER, DAMIAN GROBELNY, and WALTER M. HOLLERAN .......................................................... 315

Matrix Metalloproteinase-9 in Tumor Cell Invasion. By DEBORAH L. FRENCH, NOEMI RAMOS-DESIMONE, KAREN ROZINSKI, and GERARD J. NUOVO ................................................................................................. 324

Inhibition of Collagenase Gene Expression in Synovial Fibroblasts by All-trans and 9-cis Retinoic Acid. By LUYING PAN and CONSTANCE E. BRINCKERHOFF ........................................................................................................ 335

Poster Papers

A High Throughput Fluorogenic Substrate for Stromelysin (MMP-3). By D. MARK BICKETT, MICHAEL D. GREEN, CRAIG WAGNER, JEREMY T. ROTH, JUDD BERMAN, and GERARD M. MCGEEHAN ................................................. 351

Characterization of Stromelysin Enzyme Activity and Its Inhibition Using an Enzyme-Linked Immunosorbent Assay for Transferrin. By FELICIA R. COCHRAN and DOUGLAS B. SHERMAN ...................................................... 356

Characterization of Rat Matrixlysin and Its cDNA. By Susan R. Abramson and J. Frederick Woessner, Jr. ........................................................................................................ 362

The Binding of Gelatinases A and B to Type I Collagen Yields Both High and Low Affinity Sites. By J. A. Allan, A. J. P. Docherty, and G. Murphy ........................................................................................................ 365

Neutrophil Procollagenase Can Be Activated by Stromelysin-2. By Vera Knäuper, Gillian Murphy, and Harald Tschesche ........................................................................................................ 367

Relation between Substrate Specificity and Domain Structure of 92-kDa Type IV Collagenase. By Tayebeh Pourmotabbed ........................................................................................................ 372

Nutritional Supplementation with a Wheat Sprout Complex (a Metalloprotein) on Interleukin-1β–induced Bone Resorption. By B. Donn, L. Turoczy, Z. Baranowski, and M. Sileski ........................................................................................................ 379

Effects of Proteinase Inhibitors on Aggrecan Catabolism in Chondrocyte Cultures. By Carl R. Flannery and John D. Sandy ........................................................................................................ 380

Induction of Tissue Inhibitor of Metalloproteinase-2 in Injured Rat Artery. By Reza Forough, David Hasenstab, Nobuya Zempo, Keith Langley, Yves de Clerck, and Alexander Clowes ........................................................................................................ 384

Inhibition of Interleukin-1-Stimulated Collagen Degradation in Cartilage Explants. By Peter G. Mitchell, Lori Lopresti-Morrow, Sue A. Yocum, Francis J. Sweeney, and Lawrence A. Reiter ........................................................................................................ 395

Inhibition of Cartilage Metalloproteoglycanases and Stromelysin by Anionic Homopolymers. By Michael F. Sheff and Asher I. Sapolsky ........................................................................................................ 398

Inhibition of Matrix Metalloproteinases in Rheumatoid Arthritis and the Crystallographic Binding Mode of a Peptide Inhibitor. By H. Tschesche, J. Bläser, T. Kleine, S. Schnierer, P. Reinemeyer, W. Bode, U. Maasioshusmann, and C. Fricke ........................................................................................................ 400

Human TIMP-1 Binds to Pro-Mr 92K GL (Gelatinase B, MMP-9) through the “Second Disulfide Knot.” By M. Kirby Bodden, L. Jack Windsor, Nancy C. M. Caterina, Gregory J. Harber, Bente Birkedal-Hansen, and Henning Birkedal-Hansen ........................................................................................................ 403
Inhibition of Growth of Human Tumor Cells in Nude Mice by a Metalloproteinase Inhibitor. By Akira Okuyama, Kyozo Naito, Hajime Morishima, Hiroyuki Suda, Susumu Nishimura, and Nobuo Tanaka................................. 408

Preclinical Antiarthritic Activity of Matrix Metalloproteinase Inhibitors. By M. J. DiMartino, W. High, W. A. Galloway, and M. J. Crimmin........ 411

Elevation of Urinary Pyridinoline in Adjuvant Arthritic Rats and Its Inhibition by Doxycycline. By V. Ganiu, J. Doughty, S. Spirito, and R. Goldberg................................................................. 416

Low Dose Doxycycline Inhibits Pyridinoline Excretion in Selected Patients with Rheumatoid Arthritis. By Robert A. Greenwald, Susan A. Moak, and Lorne M. Golub....................................................... 419

Tissue Healing with Doxycycline and Chemically Modified Tetracycline Treatments in Rats with Porphyromonas gingivalis-induced Periodontitis. By N. Y. Karimbux, N. S. Ramamurthy, L. M. Golub, and I. Nishimura......................................................... 433

Procollagenase Is Reduced to Inactive Fragments upon Activation in the Presence of Doxycycline. By Gerald N. Smith, Jr., Kenneth D. Brandt, and Karen A. Hasty................................................................. 436

Gelatinases and Endogenous Inhibitors in the Preovulatory Rat Ovary. By T. A. Butler and J. F. Woessner, Jr................................................................. 444

Orthovanadate Inhibits Interleukin-1 and Phorbol Ester Induced Collagenase Production by Chondrocytes. By Julie A. Conquer, Daniel T. Grima, and Tony F. Cruz................................................................. 447

Gelatinase A Expression in Human Malignant Gliomas. By P. C. Costello, R. F. Del Maestro, and W. G. Stetler-Stevenson................................................................. 450

A Possible Role for MMP-2 and MMP-9 in the Migration of Primate Arterial Smooth Muscle Cells through Native Matrix. By Richard D. Kenagy and Alexander W. Clowes 462

Regulation of 92-kDa Gelatinase B Activity in the Extracellular Matrix by Tissue Kallikrein. By Suzanne Menashi, Rafael Fridman, Sylvane Desrivarès, He Lu, Yves Legrand, and Claudine Soria 466

Monoclonal Antibodies to Human MMP-9. By Noemi Ramos-Desimone and Deborah L. French 469

High Expression of 92-kDa Type IV Collagenase (Gelatinase) in the Osteoclast Lineage during Mouse Development. By P. Reponen, C. Sahlberg, C. Munaut, I. Thesleff, and K. Tryggvason 472

In Vitro Regulation of Stromelysin-1 in Human Endometrial Stromal Cells. By Frederick Schatz, Csaba Papp, Erno Toth-Pal, Stefan Aigner, Virginia Hausknecht, Graciela Kriken, Ronald E. Gordon, Richard Berkowitz, and Charles J. Lockwood 479

Pharmacologic Influence on the Activity of Stromelysin from Bovine Articular Cartilage. By J. Steinmeyer, S. Daufeldt, and D. A. Kalbhen 482

Localization and Characterization of Matrix Metalloproteinase-9 in Experimental Rat Adjuvant Arthritis. By Monica Stein-Picarella, Diane Ahrens, Carol Mase, Harry Golden, and Michael J. Niedbala 484

Electrospray Mass Spectrometry Study of Metal Ions in Matrilysin. Evidence That Two Zincs and Two Calciums Are Required for Inhibitor Binding. By Zhengyu Yuan, Rong Feng, Arlindo Castelhano, and Roland Billedeau 489

Effectiveness of a Cephalosporin, Cefotetan, in Inhibition of Uterine Matrix Metalloproteinases by a Non-Antibacterial Mechanism. By F. SCARPELLINI, L. SCARPELLINI, M. SBRACIA, and C. CURTO
