Contents

Preface iii
Contributors xiii

Part I: Methods of Encapsulation and Advances in Production Technology

1. A Survey of Microencapsulation Processes
   Curt Thies 1

2. Microencapsulation of Oil-in-Water Emulsions by Proteins
   Shlomo Magdassi and Yelena Vinetsky 21

3. Biodegradable Microspheres: Advances in Production Technology
   Jean-Pierre Benoit, Hervé Marchais, Hervé Rolland, and Vincent Vande Velde 35

4. Advances in the Technology of Controlled-Release Pesticide Formulations
   Arie Markus 73

5. The Use of Factorial Design in the Development of Nanoparticulate Dosage Forms
   Baruch Magenheim, Pascal Wehrlé, and Simon Benita 93

Part II: Evaluation and Characterization of Micro- and Nanoparticulate Drug Delivery Systems

6. Microsphere Morphology
   Jean-Pierre Benoît and Curt Thies 133

ix
7. Drug Release from Microparticulate Systems  
   Clive Washington  
   Page 155

8. Nanoparticles: Preparation and Characterization  
   Patrick Couvreur, Guy Couarraze, Jean-Philippe Devissaguet, and Francis Puisieux  
   Page 183

9. Biodegradable Colloidal Drug Carrier Systems Based on Solid Lipids  
   Kirsten Westesen and Britta Siekmann  
   Page 213

10. Pharmaceutical Aspects of Liposomes: Perspectives in, and Integration of, Academic and Industrial Research & Development  
    Rimona Margalit and Noga Yerushalmi  
    Page 259

11. Stealth Liposomes  
    Danilo D. Lasic  
    Page 297

12. Nonionic Surfactant Vesicles (NSVs) Containing Estradiol for Topical Application  
    Don A. van Hal, Joke A. Bouwstra, and Hans E. Junginger  
    Page 329

Part III: Applications of Particulate Delivery Systems

13. Microcapsules: Preparation by Interfacial Polymerization and Interfacial Complexation and Their Applications  
    Tony L. Whateley  
    Page 349

14. Lipospheres for Controlled Delivery of Substances  
    Abraham J. Domb, Lev Bergelson, and Shimon Amselem  
    Page 377

15. Pharmaceutical Emulsions, Double Emulsions and Microemulsions  
    Nissim Garti and Abraham Aserin  
    Page 411

16. The Use of Drug-Loaded Nanoparticles in Cancer Chemotherapy  
    Jean-Christophe Leroux, Eric Doelker, and Robert Gurny  
    Page 535
Contents

17. Cosmetic Applications of Liposomes 577
   Gérard Redziniak and Pierre Perrier

18. Cosmetic Applications of Vesicular Delivery Systems 587
   Monique Seiller, Marie-Claude Martini, and Simon Benita

Index 633
