BIOLOGY INTEGRATING SCIENTIFIC FUNDAMENTALS

Contributions to the History of Interrelations between
Biology, Chemistry, and Physics from the 18th to the
20th Centuries

Edited by
BRIGITTE HOPPE

INSTITUT FÜR GESCHICHTE DER
NATURWISSENSCHAFTEN
MÜNCHEN 1997

Contents

Brigitte HOPPE	
Introduction	5
Biology Developed by Integrating Scientific Knowledge, Methods, and New Research Programs	9
Brigitte HOPPE	
Structural Development of Experimental Methods in the Researches on Gas-Exchange and Photosynthesis	10
Gilles DENIS	
Agronomie, Chimie et Botanique (1755–1805) en France. L'exemple des maladies des plantes: principe chimique ou plante microscopique para- site?	31
Ilse JAHN	
The Transformation of Plant and Animal Physiology in the Program- matic Work of A. v. Humboldt (1797) compared with the Programs and Practice of Physiological Institutes in the 19th Century	101
Illustrations for JAHN	114
Illustrations for HOPPE, Structural Development	119
Illustrations for SRETENOVA, A Contribution	126
Nikolina M. SRETENOVA	
A Contribution of Bulgarian Science to European Science at the End of the 19th Century – Porfirij Bakhmetiev's Theory of Anabiosis and the Idea of Selforganization	133

Vera N. GUTINA The Science Program of the Past Oriented to the Present	149
Searching the Biochemical Fundamentals of Life	164
Svetlana S. KRIVOBOKOVA	
The Development of Biochemistry in Russia and the Role of Scientists of German Origin.....	165
Ekkehard HÖXTERMANN	
Oscar Brefeld (1839–1925) and the Complementary Perspective of Chem- istry and Botany toward Alcoholic Fermentation in the 1870s	174
Brigitte HOPPE	
Early Appreciation of Brefeld's Fermentation Studies in an Unknown Document	190
Beatrix BÄUMER	
Eugen Baumann und die biochemische Arzneimittelforschung in Deutsch- land im 19. Jahrhundert	193
Ria MÜLLER	
Botanische und physikalisch-chemische Forschungen über Stärkekörner vom 19. Jahrhundert bis zur Gegenwart.....	204
Lambert BUCK	
Die “Aldehyd-Natur” des Lebens, eine Hypothese von Oscar Loew (1844–1941)	229
Alfred NEUBAUER	
On the Difficulties Related to the Change of Theories in Biochemistry	247

Soňa STRBÁŇOVÁ	
Enzyme Adaptation – The Road to its Understanding: Early Theoretical Explanation	260
A. N. SHAMIN and M. A. BLANKO	
History of Biochemistry in the Institute of the History of Science and Technology of the Academy of Sciences at Moscow. A Report with Bibliography (ca. 1960–1990)	286
From Mechanistic Interpretation and Reductionism to Holism in Biology	
Jan JANKO	300
Botanical Parallels to Developmental Physiology, <i>Entwicklungsmechanik</i> , 1870–1910	301
Brigitte HOPPE	
Die “mechanische Molekularphysiologie” der Stärkekörner, eine Erörterung zwischen C. W. Nägeli und S. Schwendener 1881/1882	331
Abbildungen zu HOPPE, Die “mechanische Molekularphysiologie” ...	354
Illustrations for KREMER	359
Richard L. KREMER	
The Eye as Inscription Device in the 1870s: Optograms, Cameras and the Photochemistry of Vision	364
Nikolina M. SRETENOVA	
From Physics to Biology	382
