BETA\textsubscript{2}-AGONISTS IN ASTHMA TREATMENT

Edited by

Romain Pauwels
University Hospital
Ghent, Belgium

Paul M. O’Byrne
McMaster University
Hamilton, Ontario, Canada
CONTENTS

Introduction Claude Lenfant iii
Preface v
Contributors vii

1. On the History of Sympathomimetics in Asthma 1

Carl G. A. Persson

I. Introduction 1
II. "Curative Influence of Violent Emotion" 2
III. "Stress Therapies" of Asthma 2
IV. Adrenal Extract 4
V. "Adrenal Substance" 5
VI. Adrenaline 7
VII. Sympathomimetics and Mechanisms of Asthma 8
VIII. Life-Threatening Asthma 9
IX. Cocaine and Ephedrine 11
5. Pharmacokinetics of Beta$_2$-Adrenoceptor-Stimulating Drugs  87
Lars Nyberg

I. Introduction  87
II. Analytical Methods  89
III. Routes of Administration  90
IV. Common Pharmacokinetic Characteristics of Beta$_2$-Agonists  94
V. Pharmacokinetics of Individual Beta$_2$-Agonists  102
VI. Conclusions  117
References  117

6. Mechanisms of Duration of Action of Inhaled Long-Acting Beta$_2$-Adrenoceptor Agonists  131
Klaus F. Rabe and Anders Lindén

I. Introduction  131
II. Physicochemical Properties of Formoterol and Salmeterol  132
III. Animal Airways  132
IV. Human Airways  142
V. Hypothesis on Long Duration of Action  147
VI. Interactions with the Cell Membrane of Airway Smooth Muscle  149
VII. Role of Non-beta-Adrenoceptor-Mediated Relaxation?  151
VIII. Conclusions  152
References  152
Discussion  Gary P. Anderson  156

7. Bronchodilatation  161
Eric Derom and Romain Pauwels

I. Introduction  161
II. Mechanisms Underlying the Bronchodilating Action  162
III. Oral and Parenteral Administration of Beta$_2$-Agonists  162
IV. Inhalation of Beta$_2$-Agonists  164
V. Comparison Between Bronchodilating Capacity of Beta$_2$-Agonists and Other Bronchodilating Drugs  169
VI. Combination of Short-Acting Beta$_2$-Agonists with Other Drugs  169
References  171
Discussion  Dirkje S. Postma  176
8. Effects of Beta₂-Agonists on Airway Responsiveness and Allergen-Induced Responses

Paul M. O'Byrne

I. Introduction 179
II. Airway Hyperresponsiveness in Asthma 180
III. Effects of Inhaled β₂-Agonists on Airway Responsiveness 181
IV. Allergen-Induced Airway Responses 183
V. Effects of β₂-Agonists on Allergen-Induced Responses 184
VI. Effects of Regular Use of Inhaled β₂-Agonists 186
VII. Tachyphylaxis to Functional Antagonism 187
VIII. Conclusions 188
References 188
Discussion Eric Derom 192

9. Effect of Beta-Adrenergic Agonists on Cough and Mucociliary Clearance

Kian Fan Chung

I. Cough 197
II. Mucociliary Clearance 205
III. Conclusions 211
References 212
Discussion Jan-Anders Karlsson 222

10. Inhalation Technique and Inhalation Devices

Myrna Dolovich

I. Introduction 229
II. Physical Characteristics of Aerosols 231
III. Components of the Inhalation Technique 232
IV. Methods to Improve Inhalation Technique 237
V. Patient Instruction in the Use of Inhalers 246
VI. Conclusions 246
References 246
Discussion Lars Borgström 252

11. Adverse Effects of Beta₂-Agonists

Carl D. Burgess, Richard Beasley, Julian Crane, and Neil Pearce

I. Introduction 257
II. Acute Pharmacological Changes 258
12. Clinical Studies of Beta-Agonists in Adults 283

A. E. Tattersfield

I. Introduction 283
II. Shorter-Acting β-Agonists 284
III. Longer-Acting β-Agonists 292
IV. Conclusions 298
References 300
Discussion Malcolm R. Sears 305
Discussion Kenneth R. Chapman 312

13. Clinical Studies of Beta$_2$-Adrenergic Agonists in Children 319

F. Estelle R. Simons

I. Introduction 319
II. Chronic Asthma 322
III. Acute Asthma 330
IV. Additional Safety Issues Regarding β$_2$-Adrenergic Agonists in Children 334
V. Conclusions 335
References 336
Discussion Andrea von Berg 342

Brian Jonathon Lipworth

I. Introduction 349
II. Requisites for Clinical Studies 350
III. Studies with Short-Acting β$_2$-Agonists 350
IV. Studies with Long-Acting β$_2$-Agonists 352
V. Conclusions 358
References 360
Discussion Peter J. Sterk 361
15. Role of Beta₂-Agonists in the Treatment of Asthma in Adults

Romain Pauwels

I. Introduction 367
II. Inhaled Sympathomimetics in the Chronic Treatment of Asthma 367
III. Inhaled Sympathomimetics in the Treatment of Acute Severe Asthma 370
IV. Place of Oral β₂-Agonists in the Treatment of Asthma 371
Discussion  Albert L. Sheffer 373

References 371

16. The Role of Beta₂-Agonists in the Treatment of Asthma in Children

Søren Pedersen

I. Introduction 379
II. Acute Severe Asthma 380
III. Reversal of Acute Bronchoconstriction 383
IV. Inhibition of Acute Bronchoconstriction 384
V. Chronic Treatment of Symptoms 385
VI. Modes of Administration 386
VII. Conclusions 387
Discussion  James P. Kemp 392

References 387
