San Diego London Boston New York Sydney Tokyo Toronto

CONTENTS

PREFACE	xiii
---------------	------

Occurrence of Starch

I. Introduction	1
II. Seeds	1
III. Storage Roots and Tubers	3
IV. Starch in the Gravitational Response of Roots and Stems	3
V. Leaves	4
VI. Green Algae	4
VII. Other Reserve Polysaccharides	5
VIII. Experimental Systems in the Study of Starch Metabolism	6
Further Readings	12

Physicochemical Structure of the Starch Granule

I. The Starch Granule	13
II. Amylose and Amylopectin	13
III. Molecular Orientation in the Granule	27
IV. Methodology and Nomenclature Used in Starch Analysis	29
V. Other Constituents of the Starch Granule	30
VI. Lipids	30

VII.	Phosphorus	30
VIII.	Proteins	31
	Further Readings	32

Biosynthetic Reactions of Starch Synthesis

I.	Introduction	33
II.	Pioneering Studies	33
III.	The ADPglucose Pathway Is the Major Pathway of Starch Synthesis <i>in Vivo</i>	34
IV.	Alternative Pathways	37
V.	Rate of Starch Synthesis versus Activities of the Starch Biosynthetic Enzymes	38
VI.	A Missing Step?	40
VII.	Summary	40

Synthesis of the Glucosyl Donor: ADPglucose Pyrophosphorylase

I.	Regulatory Properties	43
II.	Physiologic Relevance of the ADPGlc PPase Regulatory Properties	46
III.	Subunit Structure	47
IV.	Structure–Function Relationships	49
V.	Function of the Higher Plant ADPGlc PPase Subunits ..	50
VI.	Identification of the Substrate Binding Sites	51
VII.	Cloning of the ADPGlc PPase Genes and Comparison of Their Sequences	58
VIII.	Hydrophobic Cluster Analysis	68
IX.	Transcription	72
X.	Genomic DNA	73

Starch Synthases

I.	Introduction	75
II.	Soluble Starch Synthases	75
III.	Starch Synthases Bound to the Starch Granule	78
IV.	Isolation of the Waxy Protein Structural Gene	81
V.	Studies of <i>Chlamydomonas reinhardtii</i> Mutants	85
	Further Readings	87

Branching Enzymes

I. Introduction	89
II. Assay	89
III. Purification of Branching Enzyme Multiforms	92
IV. Mode of Action	93
V. How Many Genes for Three Maize-Branching Enzymes?	95
VI. Other Species	98
VII. Relationship between Structure and Function	101

Open Questions and Hypotheses in Starch Biosynthesis

I. Initiation of Starch Biosynthesis	107
II. How Is the Starch Granule Formed?	110
III. A Complete Pathway	111

The Site of Starch Synthesis in Nonphotosynthetic Plant Tissues: The Amyloplast

I. Microscopy and Immunocytochemical Studies	116
II. Cell Fractionation	118
III. Transport of Carbon into Amyloplasts	119

Regulation of the Starch Synthesis Pathway: Targets for Biotechnology

I. Introduction	125
II. Genetic Engineering	125
III. Vectors	126
IV. Protoplast Isolation and Transformation	127
V. Plant Regeneration	128
VI. Tissue- and Organelle-Specific Expression	128
VII. Antisense Technology	129
VIII. Other Uses of Gene Technology	130
IX. Transformation of Plants with an <i>Escherichia coli</i> Allosteric Mutant <i>glg C</i> Gene Increases Starch Content	131

X.	Are Other Starch Biosynthetic Enzymes Rate Limiting?	134
XI.	Other Physiologic Effects of Manipulation of Starch Synthesis	135
XII.	Conclusions	136
	Further Readings	137

Starch Accumulation in Photosynthetic Cells

I.	Introduction	139
II.	The Reductive Pentose Phosphate Pathway	140
III.	The Chloroplast as a Transporting Organelle	143
IV.	Control of Carbohydrate Metabolism	144
V.	Regulation of the ADPGlc Pathway in the Chloroplast	145
VI.	Starch Synthesis in Young Leaves	148
VII.	Synthesis of Starch and Sucrose in C_4 Plants	148
VIII.	The Regulation of Starch Synthesis in C_4 Plants	150
IX.	Starch in CAM Plants	150
	Further Readings	152

Starch Degradation

I.	Plant Amylases and Phosphorylases	153
II.	Debranching Enzymes	154
III.	The Pathway of Starch Degradation in Plants	155
IV.	Starch Degradative Enzymes Located Outside the Chloroplast: Possible Function	156
V.	Digestion of Starch in Humans	157
VI.	Mechanism of Action of Amylases and Phosphorylases	159
	Further Readings	160

Industrial Applications of Starch

I.	Industrial Applications of Starch	163
II.	Manufacture and Properties of Starch	164
III.	Physical Analysis of Starch and Derivatives in the Industrial Setting	167
IV.	Chemical Modification of Starch	168

CONTENTS

xi

V. Conversion of Starch into Sweeteners	169
VI. Biodegradable Polymers	169
Further Readings	170
