Distribution and role of microprotozoa in the Southern Ocean

Verteilung und Einfluß von herbivoren Protozoen auf Phytoplanktonbestände und Vertikalflüsse im Südpolarmeer

Christine Klaas

**Ber. Polarforsch. 253 (1997)
ISSN 0176 - 5027**

DANKSAGUNG/ACKNOWLEDGEMENTS.....	3
SUMMARY.....	4
ZUSAMMENFASSUNG.....	6
1 INTRODUCTION.....	10
1.1 Historical aspects.....	10
1.2 The Southern Ocean.....	14
1.3 Aims of this thesis.....	16
2 MATERIALS AND METHODS.....	20
2.1 Area of study.....	20
2.2 Determination of microprotistplankton, empty diatom frustules and protozoan faecal pellet.....	22
2.2.1 Biomass and composition of microprotistplankton.....	22
2.2.2 Size composition of microprotistplankton and empty diatom frustules.....	23
2.3 Determination of net protozooplankton (>64 µm).....	24
2.4 Statistical analysis.....	24
2.5 Growth and grazing experiments with the heterotrophic dinoflagellate <i>Protoperidinium cf. pellucidum</i>	25
2.5.1 Isolation.....	25
2.5.2 Culturing.....	25
2.5.3 Growth and grazing experiments.....	26
2.5.4 Calculation of growth and grazing rates.....	27
2.5.5 Starvation experiment.....	29
2.6 Grazing impact of microprotozoa during ANT X/6.....	29
3 RESULTS.....	31
3.1 Microprotist, faecal pellet and empty diatom distribution.....	31
3.1.1 Hydrography.....	31
3.1.2 Microprotist standing stocks.....	33
3.1.3 Microprotozooplankton composition.....	37
3.1.4 Microprotist size composition during transect 5.....	43
3.1.5 Standing stocks of microprotozoan faecal pellets and empty diatom frustules.....	43
3.1.6 Size composition of empty diatom frustule assemblages during transect 5.....	48
3.2 Distribution of net (> 64 µm) protozoa.....	49
3.2.1 Hydrography and biotic conditions during transect 11.....	49
3.2.2 Abundance and standing stocks of net protozoa (> 64 µm).....	50
3.3 Grazing, growth and starvation experiments with <i>P. cf. pellucidum</i>	60
3.3.1 Experiment 1.....	60
3.3.2 Experiment 2.....	61
3.3.1 Starvation experiment.....	63
3.4 Grazing impact of microprotozoa during ANT X/6.....	65

4 DISCUSSION.....	68
4.1 Importance, seasonality and factors influencing microprotozoan standing stocks in the Southern Ocean.....	68
4.2 Factors influencing protozoan assemblage composition during ANTX/6.....	81
4.3 Experimental results on growth and grazing rates of <i>P. cf. pellucidum</i> and field estimates of microprotozoan grazing.....	89
4.4 Particle production by protozoa (> 20 µm) during ANT X/6.....	94
4.5 Role of micro and net protozoa in Southern Ocean carbon and silica fluxes and concluding remarks.....	102
5 REFERENCES.....	105
