THE NEUROCHEMISTRY OF DRUGS OF ABUSE
COCAINe, IBOGAINE, AND SUBSTITUTED AMPHETAMINES

Edited by Syed F. Ali

Contents

Preface. By THE EDITOR ................................................................. x

Part I. Gene Expression and Molecular Mechanisms of Drug Addiction

Cocaine and the AP-1 Transcription Factor Complex. By BRUCE T. HOPE ........ 1

The Serotonergic System Modulates the Cocaine-Induced Expression of the Immediate Early Genes egr-1 and c-fos in Rat Brain. By N. HUMBLOT, N. THIRIET, S. GOBAILLE, D. AUNIS, AND J. ZWILLER ......................... 7

Immunohistochemical Changes of the Transcription Regulatory Factors in Rat Striatum after Methamphetamine Administration. By TATSUYUKI MURATAKE, KAZUHIKO TOYOOKA, SHIGENOBU HAYASHI, TOMIO ICHIKAWA, TOSHIRO KUMANISHI, AND YASUO TAKAHASHI ............. 21

Unraveling Dopamine D3 Receptor Function in Response to Psychostimulants Using a Genetic Approach. By MING XU .............................................. 27

The MAP Kinase Cascade Is Activated prior to the Induction of Gliosis in the 1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) Model of Dopaminergic Neurotoxicity. By JAMES P. O’CALLAGHAN, PARTHENIA M. MARTIN, AND MARC J. MASS .......................................... 40

Cell Death Mediated by Amino Acid Transmitter Receptors in Human Alcoholic Brain Damage: Conflicts in the Evidence. By P. R. DODD AND J. M. LEWOHL .............................................................. 50

*This volume contains the papers from a satellite meeting of the International Society for Neurochemistry and the American Society for Neurochemistry entitled Cellular and Molecular Mechanisms of Drugs of Abuse: Cocaine, Ibogaine, and Substituted Amphetamines, which was held in Hamilton, Bermuda on July 16-18, 1997.
Part II. Drugs of Abuse and Medication Development: Cocaine

Research Issues Related to Development of Medications for Treatment of Cocaine Addiction. By MICHAEL KLEIN ................................. 75

Part III. Role of Free Radicals in Drugs of Abuse-Induced Neurotoxicity

Methamphetamine-Induced Changes in Antioxidant Enzymes and Lipid Peroxidation in Copper/Zinc-Superoxide Dismutase Transgenic Mice. By SUBRAMANIAM JAYANTHI, BRUCE LADENHEIM, AND JEAN LUD CADET .... 92

Methamphetamine-Induced Rapid and Reversible Reduction in the Activities of Tryptophan Hydroxylase and Dopamine Transporters: Oxidative Consequences? By GLEN R. HANSON, JAMES W. GIBB, RYAN R. METZGER, JERRY M. KOKOSKA, AND ANNETTE E. FLECKENSTEIN ...... 103

Effects of 7-Nitroindazole, an NOS Inhibitor on Methamphetamine-Induced Dopaminergic and Serotonergic Neurotoxicity in Mice. By SYED F. ALI AND YOSSEF ITZHAK .................................. 122

Part IV. Specific Neuronal Markers in Substituted Amphetamines-Induced Neurotoxicity

In Vivo Correlates of Central Serotonin Function after High-Dose Fenfluramine Administration. By MICHAEL H. BAUMANN, MARIO A. AYESTAS, AND RICHARD B. ROTHMAN .................................. 138

The Impact of Gender and Estrogen on Striatal Dopaminergic Neurotoxicity. By DIANE B. MILLER, SYED F. ALI, JAMES P. O'CALLAGHAN, AND SUSAN C. LAWS .................................................. 153

Noradrenergic Modulation of Methamphetamine-Induced Striatal Dopamine Depletion. By FRANCESCO FORNAI, MARIA GRAZIA ALESSANDRI, MARIA TILDE TORRACCA, LUCIA BASSI, VERA SCALORI, AND GIOVANNI UMBERTO CORSINI ........................................... 166

The Effects of Cocaine on Nonhuman Primate Brain Function Are Age Dependent. By MERLE G. PAULE, MICHAEL P. GILLAM, AND PAUL MORRIS .......... 178
Acute Effects of Dexfenfluramine (d-FEN) and Methylene-dioxymethamphetamine (MDMA) before and after Short-Course, High-Dose Treatment. By David L. Frederick, Syed F. Ali, Michael P. Gillam, Jeff Gossett, William Slikker, Jr., and Merle G. Paule ............... 183

Calcium Channel Antagonist Isradipine Attenuates Cocaine-Induced Motor Activity in Rats: Correlation with Brain Monoamine Levels. By K. Mills, T. A. Ansa, S. F. Ali, and D. C. Shockley .............. 201

Part V. Drugs of Abuse and Medication Development: Ibogaine

Mechanisms of Antiaddictive Actions of Ibogaine. By Stanley D. Glick and Isabelle M. Maisonneuve ................................. 214

In Vivo Ibogaine Blockade and In Vitro PKC Action of Cocaine. By Emmanuel S. Onaivi, Syed F. Ali, and Amitabha Chakrabarti .... 227

Effect of Ibogaine on the Various Sites of the NMDA Receptor Complex and Sigma Binding Sites in Rat Brain. By Yossef Itzhak and Syed F. Ali ... 245

Alteration in Electroencephalogram and Monoamine Concentrations in Rat Brain following Ibogaine Treatment. By Zbigniew Binienda, Michael A. Beaudoin, Brett T. Thorn, D. Rebecca Prapurna, John R. Johnson, C. Matthew Fogle, William Slikker, Jr., and Syed F. Ali .......... 265

Medication Development of Ibogaine as a Pharmacotherapy for Drug Dependence. By Deborah C. Mash, Craig A. Kovera, Billy E. Buck, Michael D. Norenberg, Paul Shapshak, W. Lee Hearn, and Juan Sanchez-Ramos .................................................. 274

Part VI. Prenatal Exposure and Postnatal Outcome

Repeated Neonatal Phencyclidine Treatment Impairs Performance of a Spatial Task in Juvenile Rats. By RATNA SIRCAR AND JERRY W. RUDY .......... 303

Uterine Position Determines the Extent of Dopamine Reduction after Chronic Prenatal Cocaine Exposure. By JACK W. LIPTON, HEATHER S. ROBIE, ZAO DUNG LING, DEBRA E. WEESE-MAYER, AND PAUL M. CARVEY ................. 314

The Effects of Gestational Cocaine Exposure on Pregnancy Outcome, Postnatal Development, Cognition and Locomotion in Rats. By SUN-JO CHOI, ELIZABETH MAZZIO, AND KARAM F. A. SOLIMAN .......... 324

Subject Index .......... 356

Index of Contributors .......... 361
