COCAINE: EFFECTS ON THE DEVELOPING BRAIN

Edited by John A. Harvey and Barry E. Kosofsky

The New York Academy of Sciences
New York, New York
1998
CONTENTS

Preface. By JOHN A. HARVEY and BARRY E. KOSOFSKY ...................... xi
Introduction. By JOHN A. HARVEY and BARRY E. KOSOFSKY ................. xiii
Foreword. By ALAN I. LESHNER ..................................................... xv
Keynote Address. By FLOYD E. BLOOM .......................................... xix

Part 1. Maternal-Fetal Effects

Maternal and Transplacental Effects of Cocaine. By JAMES R. WOODS, JR. . . . 1
Effects of Prenatal Cocaine on Hearing, Vision, Growth, and Behavior. By
MICHAEL W. CHURCH, WILLIAM J. CROSSLAND, PAMELA A. HOLMES,
GEORGE W. OVERBECK, and JACQUELINE P. TILAK .......................... 12
The Effects of Prenatal Protein Malnutrition and Cocaine on the
Development of the Rat. By J. R. GALLER and J. TONKISS ............... 29
Neonatal Neurobehavioral and Neuroanatomic Correlates of Prenatal
Cocaine Exposure. Problems of Dose and Confounding. By DEBORAH A.
FRANK, MARILYN AUGUSTYN, and BARRY S. ZUCKERMAN .................. 40
Selective Direct Toxicity of Cocaine on Fetal Mouse Neurons. Teratogenic
Implications of Neurite and Apoptotic Neuronal Loss. By MARIE-CÉCILE
NASSOGNE, PHILIPPE EVRARD, and PIERRE J. COURTOY .................. 51
Round Table 1. Drug Interactions in Cocaine Abuse: Methodologic Concerns
in Human and Animal Studies. Moderated by STEVEN E. HYMAN and
BARRY ZUCKERMAN ................................. 69

---

This volume is the result of a conference entitled Cocaine: Effects on the Developing Brain
sponsored jointly by the New York Academy of Sciences and the Allegheny University of the
Health Sciences and held in Washington, DC, September 16–19, 1997.
Part 2. Postnatal Effects: Neurobehavioral Models

Animal Behavior Models. Increased Sensitivity to Stressors and Other Environmental Experiences after Prenatal Cocaine Exposure. By LINDA P. SPEAR, JAMES CAMPBELL, KRISTYN SNYDER, MARISA SILVERI, and NINA KATOVIC .............................................................. 76

Prenatal Cocaine Exposure: Long-Term Deficits in Learning and Motor Performance. By ANTHONY G. ROMANO and JOHN A. HARVEY ............ 89

Neurological Correlates of Fetal Cocaine Exposure. By CLAUDIA A. CHIRIBOGA .............................................................. 109

Regulation of Arousal and Attention in Preschool Children Exposed to Cocaine Prenatally. By LINDA C. MAYES, CHRISTIAN GRILLON, RICHARD GRANGER, and RICHARD SCHOTTENFELD .......................... 126

Prenatal Cocaine Exposure. A Longitudinal Study of Development. By GALE A. RICHARDSON ......................................................... 144

Round Table 2. Consensus on Postnatal Deficits: Comparability of Human and Animal Findings. Moderated by THEODORE SLOTKIN .......... 153

Part 3. Developmental Mechanisms

Role of the Neurotrophic Properties of Serotonin in the Delay of Brain Maturation Induced by Cocaine. By PATRICIA M. WHITAKER-AZMITIA .............................................................. 158

Changes in the Midbrain-Rostral Forebrain Dopamine Circuitry in the Cocaine-Exposed Primate Fetal Brain. By OLINNE K. RÖNNKELEIV, YUAN FANG, WAN S. CHOI, and LIN CHAI .................................................. 165

Nonhuman Primate Model of the Effect of Prenatal Cocaine Exposure on Cerebral Cortical Development. By MICHAEL S. LIDOW .......... 182

Prenatal Exposure to Cocaine Impairs Neuronal Coding of Attention and Discriminative Learning. By MICHAEL GABRIEL and CARRIE TAYLOR ... 194

Round Table 3. Specificity of Developmental Effects in the CNS. Moderated by DONNA M. FERRIERO ......................................................... 213

Part 4. Functional Deficits

Prenatal Cocaine Exposure Alters Signal Transduction in the Brain D1 Dopamine Receptor System. By EITAN FRIEDMAN and HOAU-YAN WANG 238

A Mouse Model of Transplacental Cocaine Exposure. Clinical Implications for Exposed Infants and Children. By BARRY E. KOSOFSKY and AARON S. WILKINS .............................................................. 248
State Control in the Substance-Exposed Fetus. I. The Fetal Neurobehavioral Profile: An Assessment of Fetal State, Arousal, and Regulation Competency. By JEANNINE L. GINGRAS and KAREN J. O'DONNELL 262

Prenatal Coke: What's Behind the Smoke? Prenatal Cocaine/Alcohol Exposure and School-Age Outcomes: The SCHOO-BE Experience. By VIRGINIA DELANEY-BLACK, CHANDICE COVINGTON, TOM TEMPLIN, JOEL AGER, SUE MARTIER, SCOTT COMPTON, and ROBERT SOKOL 277

Round Table 4. Levels of Vulnerability in Functional Deficits: Specificity of Dysfunctional Brain Systems. Moderated by E. HAZEL MURPHY 289

Part 5. Longitudinal Studies in Humans/Public Policy

The Maternal Lifestyles Study. By BARRY M. LESTER 296

Long-Term Neurodevelopmental Risks in Children Exposed in Utero to Cocaine. The Toronto Adoption Study. By GIDEON KOREN, IRENA NULMAN, JOANNE ROVET, RACHEL GREENBAUM, MICHAL LOEBSTEIN, and TOM EINARSON 306

Prenatal Exposure to Cocaine and Other Drugs. Outcome at Four to Six Years. By IRA J. CHASNOFF, AMY ANSON, ROGER HATCHER, HERB STENSON, KAI IAUKEA, and LINDA A. RANDOLPH 314

Prevention and Treatment Issues for Pregnant Cocaine-Dependent Women and Their Infants. By KAROL KALTENBACH and LORETTA FINNEGAN 329

Policies towards Pregnancy and Addiction. Sticks without Carrots. By WENDY CHAVKIN, PAUL H. WISE, and DEBORAH ELMAN 335

Round Table 5. Nature-Nurture Issues. Moderated by JOSEPH COYLE 341

Round Table 6. Where Do We Go from Here and How Do We Get There? Moderated by ALAN I. LEISHNER 348

Part 6. Poster Papers

Prenatal Cocaine Exposure Produces Long-Term Impairments in Brain Serotonin Function in Rat Offspring. By GEORGE BATTAGLIA, THERESA M. CABRERA-VERA, LOUIS D. VAN DE KAR, FRANCISCA GARCIA, ALEKSANDRA VICENTIC, and WILFRED PINTO 355

Maternal Lifestyles Study (MLS). Caretaking Environment and Stability of Substance-Exposed Infants at One Month Corrected Age. By PENELMPO L. MAZA, LINDA L. WRIGHT, CHARLES R. BAUER, SEETHA SHANKARAN, HENRIETTA S. BADA, BARRY LESTER, HEIDI KRAUSE-STERNRAUFT, VINCENT L. SMEERGILIO, ANN BOWLER, and VASILIS KATSIKIOTIS 358

Sequential Neuromotor Examination of Children with Intrauterine Drug Exposure. By HAROLYN M. E. BELCHER, BRUCE K. SHAPIRO, MARY LEPPERT, ARLENE M. BUTZ, SHERRY SELLERS, ELLEN ARCH, KEN KOLODNER, MARGARET PULSIFER, KATE LEARS, and WALTER E. KAUFMANN 362
Prenatal Cocaine Exposure and Impulse Control at Two Years. *By Margaret Bendersky and Michael Lewis*............. 365

Cocaine-Induced Activation of c-fos Gene Expression Is Attenuated in Prenatal Cocaine-Exposed Rabbits. *By Nanda Tilakaratne, Guoping Cai, and Eitam Friedman* ............................. 368

Prenatal Cocaine Exposure Does Not Affect Selected GABA\(_\alpha\) Receptor Subunit mRNA Expression in Rabbit Visual Cortex. *By Jed S. Shumsky, Yunxing Wu, E. Hazel Murphy, Jonathan Nissanov, and Dennis R. Grayson* .......................... 371

Prenatal Cocaine Exposure and Stimulus-Seeking Behaviors during the First Year of Life. *By Robert L. Freedland, Bernard Z. Karmel, Judith M. Gardner, and David J. Lewkowicz* ..................... 386

Neonatal Neurobehavioral Assessment and Bayley I and II Scores of CNS-Injured and Cocaine-Exposed Infants. *By Bernard Z. Karmel, Judith M. Gardner, and Robert L. Freedland* ..................... 391

Perinatal Outcome after Cocaine ± Polydrug Exposure. *By O Greene, A. Varghese, F. Tuamokumo, W. K. Ashe, and P. Ting* ..................... 396

Effects of *in Utero* Exposure to Cocaine and/or Opiates on Infants’ Reaching Behavior. *By L. L. LaGasse, R. F. Van Vorst, S. M. Brunner, and B. M. Lester* ..................... 405

Effects of Prenatal Cocaine Exposure on Responsiveness to Multimodal Information in Infants between 4 and 10 Months of Age. *By David J. Lewkowicz, Bernard Z. Karmel, and Judith M. Gardner* ..................... 408

Effects of Prenatal Cocaine Exposure on Serotonin and Norepinephrine Transporter Density in the Rat Brain. *By Alison M. McReynolds and Jerrold S. Meyer* ..................... 412
Sources of Heart Rate Variation during Sleep in Cocaine-Exposed Neonates.  
By Michael G. Regalado, Vicki L. Schechtman, Michael C. K. Khoo, John Shin, and Xylina D. Bean .......................... 415

Prenatal Cocaine Exposure Increases Susceptibility to Drug-Induced Seizures.  
C-fos Induction and Brain Cocaine Levels. By Abigail Snyder-Keller and Richard W. Keller, Jr. ............... 419

Mortality in Neonatal Rats Is Increased by Moderate Prenatal Exposure to Some Monoamine Reuptake Inhibitors. A Brief Review. By Steven Sparenborg .......................... 423

Cocaine-Inhibited Neuronal Differentiation in NGF-Induced PC12 Cells and Altered C-fos Expression Are Reversed by C-fos Antisense Oligonucleotide. By Ditza A. Zachor, John F. Moore, Anne B. Theibert, and Alan K. Percy .......................... 427

Index of Contributors ........................................ 435

Financial assistance was received from:
• ALLEGHENY UNIVERSITY OF THE HEALTH SCIENCES
• NATIONAL INSTITUTE ON DRUG ABUSE (NIDA)
• NATIONAL INSTITUTE ON CHILD AND HUMAN DEVELOPMENT (NICHD)
• NATIONAL INSTITUTE OF MENTAL HEALTH (NIMH)
• MARCH OF DIMES
• CULPEPER FOUNDATION

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
