PATENTS FOR CHEMICALS, PHARMACEUTICALS AND BIOTECHNOLOGY

FUNDAMENTALS OF GLOBAL LAW, PRACTICE AND STRATEGY

by

PHILIP W. GRUBB
European Patent Attorney

CLARENDON PRESS • OXFORD
1999
## CONTENTS

*Preface to the Third Edition*  
*List of Figures and Tables*  
*Table of Cases*  
*List of Abbreviations*

### PART I: INTRODUCTION AND BACKGROUND TO THE MODERN PATENT SYSTEM

1. **The nature and origins of patent rights**  
   - What is a patent?  
   - Early history in England  
   - Early history in continental Europe  
   - Early history in America  
   - The consideration for the grant of a patent

2. **The development of patent law**  
   - UK 1800–1988  
   - USA 1790–1984  
   - Continental Europe  
   - International developments  
   - GATT–TRIPs—a major step forward

3. **Patents in developing countries**  
   - Level of patent protection  
   - Transfer of technology  
   - International developments in the 1970s  
   - New developments in the 1980s  
   - TRIPs implementation—changes to patent laws  
   - The Convention on Biological Diversity (CBD)  
   - Opposition to TRIPs  
   - Summary

### PART II: PATENT LAW AND PROCEDURE

4. **What can be patented**  
   - The requirements of the European Patent Convention  
   - The requirements of United States law  
   - Grace periods  
   - Special categories of inventions

5. **Filing a patent application**  
   - Should an application be filed?  
   - When to file  
   - Where to file  
   - The foreign filing decision
Non-convention filings 82
European patent applications 82
International applications 85
Registration and patents of importation 86

6 Obtaining a granted patent—national procedures 88
Types of examination 88
Deferred examination 91
Oppositions 94
Procedure in the United Kingdom 95
Procedure in the USA 103

7 Obtaining a granted patent—EPO and PCT procedures 112
Procedure in the European Patent Office 112
Appeals in the EPO 126
PCT Procedure 130

8 Maintaining a patent in force and extending the patent term 140
Patent term 140
Renewal fees 141
Extension of term 144
Extensions to compensate for regulatory delays 145
Working requirements 150
Licences of right 152

9 Enforcing patent rights 154
What constitutes infringement 154
Infringement in the United Kingdom 155
Infringement in the USA 160
Procedure in the United Kingdom 163
Procedure in the USA 169
Procedure in continental Europe 172
Procedure in Japan 174

10 Invalidity and amendment of granted patents 175
Grounds of invalidity in the United Kingdom 176
New grounds of invalidity 179
Revocation by the Patent Office 179
Partial validity 180
Amendment of British patents 180
Invalidity and amendment in the USA 182
Invalidity and amendment in the European Patent Office 185

PART III: PATENTABILITY OF INVENTIONS IN SPECIFIC TECHNICAL FIELDS

11 Chemical inventions 193
Novel compounds 193
CONTENTS

Selection inventions 196
Disclaimers 200
Compounds of unknown structure 202
Polymeric compounds 203
New physical forms 204
New synthetic processes 205
Analogy processes 206
New compositions and mixtures 207
New uses and new application processes 208

12 Pharmaceutical inventions 210
New chemical entities 210
Pharmaceutical compositions 215
First pharmaceutical use 217
Second pharmaceutical use 218
Scope of SPC protection 222

13 Biotechnological inventions 224
What is biotechnology? 224
Patents and biotechnology 225
Microbiological inventions 226
Recombinant DNA technology 230
Monoclonal antibody technology 238
More recent technologies 242

14 Patenting of genes, plants, and animals 245
Patents and life 245
Human genes 246
Transgenic animals 249
Transgenic plants 251
Patenting of animals and plants 252
Morality issues 256
Patents for life—from bacteria to oncomice 258
Why are patents being targeted? 260

15 Software-related inventions 261
Relevance of software inventions to chemistry and biotechnology 261
Patenting of software-related inventions in the EPO 262
Patenting of software-related inventions in the United Kingdom 266
Patenting of software-related inventions in the USA 267

PART IV: PATENTING IN PRACTICE

16 The patent practitioner and his functions 273
The British patent profession 274
The patent profession in the USA 277
The patent profession in other countries 278
European patent attorneys 279
Patent attorneys in private practice 281
Industrial practice 282
The job of the patent practitioner 283

17 Drafting the patent specification 288
Drafting the scope 288
The structure of the patent specification 289
Priority and foreign filing texts 291
Background of the invention and prior art 292
US sufficiency requirements 294
Sufficiency requirements in the United Kingdom and the EPO 297
Sufficiency requirements in other countries 299
Special requirements for biotechnology inventions 300
Length of text 301

18 Drafting the claims 303
The purpose and nature of patent claims 303
Form of claims 306
The scope of the claims 311

19 Prosecution of the patent application to grant. 313
Lack of unity 313
Lack of novelty 317
Lack of inventive step 321
Interviews with the examiner 326

20 Patents and information 328
The increasing volume of patent literature 328
Patents as a source of technical information 329
Availability of patents 331
Other patent information on the Internet 334
Legal information relevant to patents 334
Patent searching 335

PART V: COMMERCIAL EXPLOITATION OF PATENTS

21 Inventorship, ownership, and compensation 345
Inventorship in the United Kingdom 345
Inventorship in the EPO 348
Inventorship in the USA 349
Ownership 351
Compensation for employee inventors 356
The right to apply for a patent and to be granted a patent 359
Co-ownership 360
Disputes as to ownership 361
CONTENTS

Registration and transfer of ownership 363

22 Commercial exploitation of patents 364
   Patents to exclude the competition—the pharmaceutical industry 364
   Patents for survival—the biotechnology industry 370
   Patents as a source of royalty income—universities 373
   Patents as lottery tickets—individual inventors 376
   Patents as bargaining chips—the electronics industry 376

23 How to catch the infringer—and how not to be caught 378
   From the viewpoint of the patentee 378
   From the viewpoint of the potential infringer 391

24 Patent aspects of licensing 395
   Patent conflict licences 395
   Technology transfer licences 396
   The In-licensing process 398
   Out-licensing—patent strategy for the licensor 402
   Research collaboration agreements 405
   Licence contracts 407

25 Patents and competition law 412
   Charges against the patent system 412
   Competition law—United Kingdom 413
   Competition law—EU 414
   Patent licence agreements in the EU 420
   Competition law—USA 426
   EU/US collaboration 431

Glossary of Patent Terms and Jargon 432

Index 443
