ADVANCES IN LIMNOLOGY 53

Series editor: WINFRIED LAMPERT, Plön

Lake Constance
Characterization of an ecosystem in transition

edited by Erich Bäuerle and Ursula Gaedke
with 9 plates, 218 figures and 48 tables

E. Schweizerbart'sche Verlagsbuchhandlung
(Nägele u. Obermiller) · Stuttgart 1998
Contents

Preface ................................................................. V

WESSELS, M.: Geological history of the Lake Constance area
(with 4 figures and 2 tables) ........................................ 1-12

STABEL, H.-H. Chemical composition and drinking water quality of the water
from Lake Constance (with 6 figures and 2 tables) ............. 13-30

BÄUERLE, E., OLLINGER, D. & ILMBERGER; J.: Some meteorological,
hydrological, and hydrodynamical aspects of Upper Lake Constance
(with 30 figures and 2 tables) .................................... 31-83

GÜDE, H., ROSSKNECHT, H. & WAGNER, G.: Anthropogenic impacts on the trophic
state of Lake Constance during the 20th century (with 7 figures and 2 tables) .... 85-108

KÜMMERLIN, R.E.: Taxonomical response of the phytoplankton community of
Upper Lake Constance (Bodensee-Obersee) to eutrophication and
re-oligotrophication (with 1 figure and 2 tables) ............... 109-117

GAEDKE, U.: Functional and taxonomical properties of the phytoplankton
community of large and deep Lake Constance: Interannual variability and
response to re-oligotrophication (1979-1993) (with 7 figures) .......... 119-141

response to re-oligotrophication in large and deep Lake Constance:
Photosynthetic rates and chlorophyll concentrations (with 7 figures and 2 tables) 159-178

GEGE, P.: Characterization of the phytoplankton in Lake Constance for
classification by remote sensing (with 6 figures and 2 tables) ........ 179-193

dynamics in Lake Constance (Bodensee): Substrate utilization, growth control,
and long-term trends (with 8 figures and 4 tables) ................. 195-221

WEISSE, T. & MÜLLER, H.: Planktonic protozoa and the microbial food web in
Lake Constance (with 9 figures and 3 tables) ...................... 223-254

STRAILE, D. & GELLER, W.: Crustacean zooplankton in Lake Constance from
1920 to 1995: Response to eutrophication and re-oligotrophication (with 9 figures) 255-274

HOFMANN, W.: The response of Bosmina (Eubosmina) to eutrophication of Upper
Lake Constance: the subfossil record (with 4 figures) .............. 275-283

ECKMANN, R. & RÖSCH, R.: Lake Constance fisheries and fish ecology (with
4 figures and 2 tables) ........................................... 285-301

APPENZELLER, A.R.: Persistent large-scale heterogeneity of pelagic fish in Upper
Lake Constance and its possible causes (with 5 figures and 3 tables) .... 303-316
GAEDKE, U.: The response of the pelagic food web to re-oligotrophication of a large and deep lake (L. Constance): Evidence for scale-dependent hierarchical patterns? (with 2 figures and 2 tables) .................................................. 317-333

WESSELS, M. & SCHRÖDER, H.-G.: Lead and zinc in the sediments of Lake Constance, SW Germany (with 4 figures and 1 table) .................................................. 335-349

SCHRÖDER, H.G., WESSELS, M. & NIESSEN, F.: Acoustic facies and depositional structures of Lake Constance (with 9 figures) .................................................. 351-368

KAMINSKI, S., KONOPOLEV, A., LINDNER, G. & SCHRÖDER, H.-G.: The fate of artificial caesium radionuclides in Lake Constance (with 22 figures and 4 tables) . 369-409

WESSELS, M.: Late-Glacial and postglacial sediments in Lake Constance (Germany) and their palaeolimnological implications (with 19 figures and 1 table) 411-449

SCHNEIDER, K.: Spatial heterogeneity of pigment concentration and water surface temperature determined from satellite data (with 13 figures, 9 plates and 2 tables) 451-488

HEEGE, T. & APPENZELLER, A.R.: Correlations of large-scale patterns of turbidity and pelagic fish biomass using satellite and acoustic methods (with 4 figures and 5 tables) .................................................. 489-503

GÜDE, H. & GRIES, T.: Phosphorus fluxes in Lake Constance (with 12 figures and 4 tables) .................................................. 505-544

STRAILE, D.: Biomass allocation and carbon flow in the pelagic food web of Lake Constance (with 9 figures and 1 table) .................................................. 545-563

GAEDKE, U., OLLINGER, D., BÄUERLE, E. & STRAILE, D.: The impact of the interannual variability in hydrodynamic conditions on the plankton development in Lake Constance in spring and summer (with 7 figures) .................................................. 565-585

GAEDKE, U. & STRAILE, D.: DAPHNIDS: Keystone species for the pelagic food web structure and energy flow.- A body size-related analysis linking seasonal changes at the population and ecosystem levels (with 6 figures and 2 tables) ...... 587-610
